

Contents

PART I: GENERAL CONCEPTS/TREATMENT PLANNING

1 Partially Edentulous Epidemiology, Physiology, and Terminology 2

Tooth Loss and Age	4
Consequences of Tooth Loss	5
Functional Restoration with Prosthesis	5
Current Removable Partial Denture Use	6
Need for Removable Partial Dentures	7

2 Considerations for Managing Partial Tooth Loss 8

Managing Tooth Loss Over Time	8
Tooth-Supported Prosthesis	9
Tooth- and Tissue-Supported Prosthesis	10
The Phases of Partial Denture Service	12
Reasons for Failure of Clasp-Retained Partial Dentures	14

3 Classification of Partially Edentulous Arches 16

Requirements of an Acceptable Method of Classification	17
Kennedy Classification	17
Applegate's Rules for Applying the Kennedy Classification	20

4 Biomechanics of Removable Partial Dentures 21

Biomechanics and Design Solutions	21
Biomechanical Considerations	22
Impact of Implants on Movements of Partial Dentures	22
Simple Machines	23
Possible Movements of Partial Dentures	24

5 Major and Minor Connectors 29

Role of Major Connectors in Control of Prosthesis Movement	30
Minor Connectors	45
Finishing Lines	50
Reaction of Tissue to Metallic Coverage	50
Major Connectors in Review	52

6 Rests and Rest Seats 56

Role of Rests in Control of Prosthesis Movement	56
Form of the Occlusal Rest and Rest Seat	58
Extended Occlusal Rest	59
Interproximal Occlusal Rest Seats	60
Internal Occlusal Rests	61

Implants as a Rest	61
Support for Rests	61
Lingual Rests on Canines and Incisor Teeth	63
Incisal Rests and Rest Seats	65

7 Direct Retainers 67

Direct Retainer's Role in Control of Prosthesis Movement	67
Basic Principles of Clasp Design	68
Types of Direct Retainers	70
Criteria for Selecting a Given Clasp Design	71
Types of Clasp Assemblies	71
Implants as Direct Retainers	81
Analysis of Tooth Contours for Retentive Clasps	83
Amount of Retention	84
Other Types of Retainers	89
Internal Attachments	90

8 Indirect Retainers 93

Role of Indirect Retainers in Control of Prosthesis Movement	93
Factors Influencing Effectiveness of Indirect Retainers	96
Auxiliary Functions of Indirect Retainers	96
Forms of Indirect Retainers	96

9 Denture Base Considerations 99

Functions of Denture Bases in Control of Prosthesis Movement	99
Methods of Attaching Denture Bases	102
Methods for Incorporating Dental Implants	103
Ideal Denture Base Material	103
Advantages of Metal Bases	104
Methods of Attaching Artificial Teeth	106
Need for Relining	109
Stress-Breakers (Stress Equalizers)	110

10 Principles of Removable Partial Denture Design 112

Difference in Prosthesis Support and Influence on Design	112
Differentiation Between Two Main Types of Removable Partial Dentures	113
Essentials of Partial Denture Design	115
Components of Partial Denture Design	117
Implant Considerations in Design	122
Examples of Systematic Approach to Design	122
Additional Considerations Influencing Design	125

11 Surveying	127	Periodontal Preparation	193
Description of Dental Surveyor	128	Optimization of the Foundation for Fitting and Function of the Prosthesis	200
Purposes of the Surveyor	129		
Factors that Determine Path of Placement and Removal	133	15 Preparation of Abutment Teeth	206
Step-by-Step Procedures in Surveying a Diagnostic Cast	135	Classification of Abutment Teeth	207
Final Path of Placement	138	Sequence of Abutment Preparations on Sound Enamel or Existing Restorations	207
Recording Relation of Cast to Surveyor	139	Abutment Preparations Using Conservative Restorations	207
Surveying the Master Cast	140	Abutment Preparations Using Crowns	209
Measuring Retention	140	Splinting of Abutment Teeth	213
Blocking out the Master Cast	141	Use of Isolated Teeth as Abutments	214
Relieving the Master Cast	142	Missing Anterior Teeth	215
Paralleled Blockout, Shaped Blockout, Arbitrary Blockout, and Relief	144	Temporary Crowns when a Removable Partial Denture is Being Worn	216
		Fabricating Restorations to Fit Existing Denture Retainers	216
12 Considerations for the Use of Dental Implants with Removable Partial Dentures	146		
Physiologic Distinction Between Prosthesis	147	16 Impression Materials and Procedures for Removable Partial Dentures	219
Replacing Anatomy and Functional Ability	147	Elastic Materials	219
Strategically Placed Implants for Removable Partial Denture Stability and Improved Patient Accommodation	148	Rigid Materials	221
Movement Control With Selective Implant Placement	148	Thermoplastic Materials	221
Treatment Planning	149	Impressions of the Partially Edentulous Arch	222
Clinical Examples	149	Individual Impression Trays	225
Summary	149		
Acknowledgment	149	17 Support for the Distal Extension Denture Base	231
		Distal Extension Removable Partial Denture	232
		Factors Influencing the Support of a Distal Extension Base	232
		Anatomic form Impression	236
		Methods for Obtaining Functional Support for the Distal Extension Base	236
		18 Occlusal Relationships for Removable Partial Dentures	242
		Desirable Occlusal Contact Relationships for Removable Partial Dentures	243
		Methods for Establishing Occlusal Relationships	244
		Materials for Artificial Posterior Teeth	250
		Establishing Jaw Relations for a Mandibular Removable Partial Denture Opposing a Maxillary Complete Denture	251
		19 Laboratory Procedures	253
		Duplicating a Stone Cast	253
		Waxing the Removable Partial Denture Framework	254
		Spruing, Investing, Burnout, Casting, and Finishing of the Removable Partial Denture Framework	258
		Making Record Bases	266
		Occlusion Rims	268
PART II: CLINICAL AND LABORATORY			
13 Diagnosis and Treatment Planning	155		
Purpose and Uniqueness of Treatment	155		
Patient Interview	155		
Shared Decision Making	156		
Clinical Examination	156		
Objectives of Prosthodontic Treatment	156		
Oral Examination	157		
Diagnostic Casts	161		
Diagnostic Findings	169		
Interpretation of Examination Data	169		
Infection Control	177		
Differential Diagnosis: Fixed or Removable Partial Dentures	178		
Choice Between Complete Dentures and Removable Partial Dentures	183		
Clinical Factors Related to Metal Alloys used for Removable Partial Denture Frameworks	185		
Summary	187		
14 Preparation of the Mouth for Removable Partial Dentures	188		
Pre-Prosthetic Considerations in Partially Edentulous Mouths	189		

Making a Stone Occlusal Template from a Functional Occlusal Record	270		
Arranging Posterior Teeth to an Opposing Cast or Template	271		
Types of Anterior Teeth	272		
Waxing and Investing the Removable Partial Denture Before Processing Acrylic-Resin Bases	273		
Processing the Denture	276		
Remounting and Occlusal Correction to an Occlusal Template	279		
Polishing the Denture	280		
20 Work Authorizations for Removable Partial Dentures	283		
Work Authorization	283		
Definitive Instructions by Work Authorizations	285		
Legal Aspects of Work Authorizations	288		
Delineation of Responsibilities by Work Authorizations	288		
21 Initial Placement, Adjustment, and Servicing of the Removable Partial Denture	289		
Adjustments to Bearing Surfaces of Denture Bases	290		
Occlusal Interference from Denture Framework	291		
Adjustment of Occlusion in Harmony with Natural and Artificial Dentition	291		
Instructions to the Patient	294		
Follow-Up Services	296		
PART III: MAINTENANCE			
22 Relining and Rebasling the Removable Partial Denture	298		
Relining Tooth-Supported and Tooth Implant-Supported Denture Bases	299		
Relining Distal Extension Denture Bases	300		
Methods of Reestablishing Occlusion on a Relined Removable Partial Denture	301		
23 Repairs and Additions to Removable Partial Dentures		304	
Broken Clasp Arms		304	
Fractured Occlusal Rests		306	
Distortion or Breakage of Other Components—Major and Minor Connectors		306	
Loss of a Tooth or Teeth not Involved in Support or Retention of the Restoration		307	
Loss of an Abutment Tooth Necessitating its Replacement and Making a New Direct Retainer		307	
Other Types of Repairs		307	
Repair by Soldering		307	
24 Interim Removable Partial Dentures		310	
Appearance		310	
Space Maintenance		311	
Reestablishing Occlusal Relationships		311	
Conditioning Teeth and Residual Ridges		311	
Interim Restoration During Treatment		312	
Conditioning the Patient for Wearing a Prosthesis		312	
Clinical Procedure for Placement		313	
25 Removable Partial Denture Considerations in Maxillofacial Prosthetics		315	
Maxillofacial Prosthetics		315	
Timing of Dental and Maxillofacial Prosthetic Care for Acquired Defects		316	
Intraoral Prostheses: Design Considerations		322	
Surgical Preservation for Prosthesis Benefit		322	
Maxillary Prostheses		327	
Mandibular Prostheses		330	
Jaw Relation Records for Mandibular Resection Patients		336	
Summary		336	
Appendix A Glossary		337	
Appendix B Selected Reading Resources		340
