

CONTENTS

Abstract	5
1. Introduction	7
2. Geological setting	8
2.1 Moldanubicum of South Bohemia	9
2.2 Moldanubicum of SW Moravia	12
2.3 Strážek Moldanubicum	14
2.4 Crystalline complex of Kutná Hora	16
2.5 Moravian Mica-schist Zone	17
3. Brief characteristics of the sampled localities	18
3.1 Moldanubicum of South Bohemia	18
3.2 Moldanubicum of SW Moravia	20
3.3 The Strážek Moldanubicum	21
3.4 Crystalline complex of Kutná Hora	22
3.5 Moravian Mica-schist Zone	23
4. Petrography	24
4.1 Quantitative mineral composition	24
4.2 Nomenclature	25
4.3 Description of samples	29
4.4 Results of petrographic investigations	40
5. Major element composition, radioactivity and trace elements	43
5.1 Methods of measurements	43
5.2 Major element composition	44
5.3 Radioactivity and trace elements	48
5.4 Correlations between petrography and geochemistry of rocks	54
5.5 Results of geochemical investigations	58
6. Discussion	63
7. Conclusions	77
References	79
Appendix	84
Czech summary	100
Russian summary	101
