Preface

1 Wound Healing Subsequent to Injury 1

E. GOTTRUP & J. O. ANDREASEN

Definition	1
Nature of a traumatic injury	1
Wound healing biology	3
Dynamics of wound repair	4
Types of wound after injury	8
Tissues and compounds in wound healing	9
Inflammatory phase mediators	13
Growth factors	14
Cells in wound healing	19
Angiogenesis	31
Wound strength development	35
Remodeling phase	37
Microenvironment in wounds	39
Factors affecting the wound healing process	41
Optimizing oral wound healing	45
Essentials	46
References	46

2 Response of Oral Tissues to Trauma 66

J. O. ANDREASEN, H. LØVSCHALL & D. RICUCCI

Repair and regeneration of oral tissues	66
Developing teeth	67
Teeth with developed roots	77
Pulp-dentin complex	92
Internal root resorption	103
Oral mucosa and skin	103
Essentials	105
References	106

3 Response of Traumatized Dental Tissues to Various Treatment Procedures 125

J. O. ANDREASEN

Role of repositioning	125
Role of splinting	125
Role of antibiotics	127
Role of treatment delay	128

Essentials	129
References	129

4 Prediction and Timing of Healing Complications 132

J. O. ANDREASEN

Introduction	132
Observation time until complications can be diagnosed	134
Use of predictors in an interactive dental trauma guide	136
Essentials	137
References	137

5 Characteristics of Oral Stem Cells and Their Role in Dental Tissue Regeneration 139

G. T.-J. HUANG, P. GAUTHIER, M. JAMAL & M. AL-HABIB

Introduction	139
General concept of stem cells	139
Dental pulp stem cells	142
Stem cells from apical papilla	144
Periodontal ligament stem cells	149
Gingival mesenchymal stem cells	154
Dental follicle stem cells	155
Conclusion	155
Essentials	155
References	156

6 Development of a Bio-Root 161

S. WANG, F. WEI, Z. GAO & L. HU

Introduction	161
Definition	161
Development history	161
Components of stem cell-mediated bio-root regeneration	162
Stem cell-mediated root regeneration in miniature pig models	163
Regeneration procedure of stem cell-mediated bio-roots	165
Evaluation	165
Challenges and prospects	166
Essentials	167
References	167

7 Bone-Resorbing Osteoclasts	169	11 Classification, Epidemiology and Etiology	252
U. H. LERNER		L. ANDERSSON, S. PETTI, P. DAY, K. KENNY, U. GLENDOR & J. O. ANDREASEN	
Introduction	169	Classification	252
Osteoclastogenesis	169	Epidemiology	260
Osteoclastic resorption	174	Etiology	266
Regulation of RANKL-induced differentiation of mononuclear osteoclast progenitors	177	Mechanisms of traumatic dental injuries	274
Regulation of mature osteoclast activity	181	Treatment need	278
Osteoclast progenitor origin	181	Organization of emergency care	279
Physiologic role of osteoclasts	182	Future models	281
Role of osteoclasts in skeletal diseases	185	Essentials	281
Role of osteoclasts in the jaw bone	187	References	282
Role of osteoclasts in tooth resorption	191		
Osteoclast heterogeneity	191	12 Examination and Diagnosis of Dental Injuries	295
Essentials	192	F. M. ANDREASEN, J. O. ANDREASEN, M. TSUKIBOSHI & N. COHENCA	
References	192		
8 Physical and Chemical Methods to Optimize Pulpal and Periodontal Healing After Traumatic Injuries	202	Introduction	295
M. TROPE		History	296
Introduction	202	Clinical examination	298
Treatment strategies	203	Pulp testing principles	301
General strategies	205	Mechanical stimulation	303
Systemic methods to limit inflammation	215	Thermal tests	303
Fluoride pretreatment of the root	218	Electrometric pulp testing	305
Essentials	224	Laser Doppler flowmetry	308
References	224	Pulse oximetry	309
		Radiographic examination	309
9 Psychosocial Aspects of Traumatic Dental Injuries	227	Effect of treatment delay	318
J. TRAEBERT, U. RYDÅ & A. ROBERTSON		Essentials	320
Introduction	227	References	320
Psychosocial impacts of traumatic dental injuries	227	13 Crown Fractures	327
Stages of psychological development	229	F. M. ANDREASEN, E. LAURIDSEN & J. O. ANDREASEN	
Implications for treatment	230	Terminology, frequency and etiology	327
Treatment assessment	230	Clinical findings	327
Treatment plan	231	Radiographic findings	329
Essentials	237	Healing and pathology	329
References	237	Treatment	332
		Provisional treatment of crown fractures	334
10 Child Physical Abuse and Neglect	241	Definitive treatment of crown fractures	336
R. R. WELBURY & A. M. CAIRNS		Reattachment of the original crown fragment	336
Definitions	241	Prognosis of crown fractures	343
Historical aspects	241	Essentials	346
Prevalence	242	References	347
Etiology	242	14 Crown-Root Fractures	355
Diagnosis	242	J. O. ANDREASEN, F. M. ANDREASEN, M. TSUKIBOSHI & F. EICHELSBACHER	
Types of orofacial injuries in child physical abuse	243	Terminology, frequency and etiology	355
Differential diagnosis	247	Clinical findings	355
The dentist's role in the management of child physical abuse	247	Radiographic findings	355
The dentist's role in the management of dental neglect	248	Healing and pathology	358
Essentials	249	Treatment	358
References	249	Bonding of coronal fragment	358
		Removal of coronal fragment and supragingival restoration	362

Surgical exposure of fracture surface	362	Healing and pathology	450
Orthodontic extrusion of apical fragment	365	Clinical findings	450
Surgical extrusion of apical fragment	369	Radiographic findings	451
Vital root submergence	369	Treatment	451
Extraction	369	Prognosis	454
Essentials	374	Pulp necrosis	454
References	375	Pulp canal obliteration	457
15 Root Fractures	377	Root resorption (external)	457
E. M. ANDREASEN, J. O. ANDREASEN & G. TSILINGARIDIS		Root resorption (internal)	457
Terminology, frequency and etiology	377	Marginal bone loss	464
Clinical findings	377	Predictors of healing	464
Radiographic findings	377	Tooth survival	465
Healing and pathology	382	Essentials	466
Treatment	391	References	467
Prognosis	398	19 Intrusive Luxation	469
Follow-up	398	J. O. ANDREASEN, F. M. ANDREASEN & G. TSILINGARIDIS	
Orthodontic treatment of root-fractured teeth	405	Definition	469
Predictors of healing	405	Frequency	469
Essentials	407	Healing and pathology	469
References	408	Clinical findings	469
16 Luxation Injuries of Permanent Teeth:		Radiographic findings	469
General Findings	413	Treatment	473
E. M. ANDREASEN, J. O. ANDREASEN & E. LAURIDSEN		Prognosis	477
Terminology, frequency and etiology	413	Diagnosis of healing complications	477
Clinical findings	413	Predictors for healing	482
Radiographic findings	414	Treatment guidelines	482
Healing and pathology	415	Essentials	484
Treatment	417	References	484
Prognosis	417	20 Avulsions	486
Pulp necrosis	418	J. O. ANDREASEN, F. M. ANDREASEN & G. TSILINGARIDIS	
Pulp canal obliteration	424	Terminology, frequency and etiology	486
Root resorption	428	Clinical findings	486
Loss of marginal bone support	436	Radiographic findings	486
Essentials	437	Healing and pathology	486
References	438	Treatment of the avulsed tooth	499
17 Concussion and Subluxation	443	Prognosis	503
E. M. ANDREASEN, E. LAURIDSEN & J. O. ANDREASEN		Tooth survival and tooth loss	507
Definitions	443	Pulpal healing and pulp necrosis	507
Frequency	443	Periodontal healing and root resorption	510
Pathology	443	Root development and disturbances in root growth	515
Radiographic findings	443	Gingival healing and loss of marginal attachment	517
Treatment	443	Complications due to early loss of teeth	517
Follow-up	444	Essentials	519
Complications	444	References	520
Predictors for healing and prognosis	445	21 Injuries to the Supporting Bone	529
Essentials	448	J. O. ANDREASEN & E. LAURIDSEN	
References	449	Terminology, frequency and etiology	529
18 Extrusive Luxation and Lateral Luxation	450	Clinical findings	529
E. M. ANDREASEN, E. LAURIDSEN & J. O. ANDREASEN		Radiographic findings	530
Definitions	450	Pathology	536
Frequency	450	Treatment	536
		Fractures of the mandible or maxilla	540
		Prognosis	544

Fractures of the mandible or maxilla in children	545	26 Regenerative Endodontics	718
Fractures of the mandible or maxilla in adults	546	B. KAHLER & L. M. LIN	
Essentials	550	Overview	718
References	551	Diagnosis of traumatic dental injuries and revascularization of teeth with an open apex	718
22 Injuries to the Primary Dentition	556	Essentials	732
M. T. FLORES, G. HOLAN, J. O. ANDREASEN & E. LAURIDSEN		References	733
Introduction	556	27 Reinforcing Endodontically Treated Teeth	739
Epidemiology and etiology	557	A. KISHEN	
Clinical and radiographic findings and treatment of various injury types	562	Introduction	739
Complications in the primary dentition	576	Structural consideration in endodontically treated teeth	739
Space loss after premature tooth loss	581	Biomechanical considerations in endodontically treated teeth	739
Speech problems due to early loss of primary incisors	581	Fractures in endodontically treated teeth	740
Essentials	582	Strengthening of coronal structure	741
References	584	Steps to strengthen coronal tooth structure	741
23 Injuries to Developing Teeth	589	Strengthening of root structure	744
J. O. ANDREASEN, M. T. FLORES & E. LAURIDSEN		Steps to strengthening the root structure	745
Terminology, frequency and etiology	589	Conclusions	748
Clinical, radiographic and pathologic findings	593	Essentials	749
Treatment	611	References	749
Essentials	616	28 Orthodontic Management of the Traumatized Dentition	752
References	618	O. MALMGREN & B. MALMGREN	
24 Soft Tissue Injuries	626	Introduction	752
L. ANDERSSON & J. O. ANDREASEN		Orthodontic treatment planning	753
Terminology, frequency and etiology	626	Treatment principles for various trauma types	759
Types of soft tissue trauma	626	Avulsions	764
Emergency management	627	Treatment principles	779
Wound closure materials and principles	642	Essentials	785
Antibiotic prophylaxis	642	References	787
Tetanus prophylaxis	643	29 Restoration of Traumatized Teeth with Resin Composites	792
Essentials	644	U. PALLESEN & J. W. V. VAN DIJKEN	
References	644	Long-term prognosis of resin composite restorations	792
25 Management of Trauma-Related Pulp Disease and Tooth Resorption	648	Material considerations	793
M. CVEK, P. V. ABBOTT, L. K. BAKLAND & G. S. HEITHERSAY		Clinical implications	797
Introduction – Tribute to Miomir Cvek, DDS, Odont Dr. 1927–2008	648	Critical points in the restorative procedure	798
Trauma-related pulp disease	648	Essentials	804
Crown and crown-root fractures without pulp exposure	648	References	804
Crown and crown-root fractures with pulp exposure	650	30 Restorations Using Porcelain Laminate Veneers	807
Root fractures	663	D. M. LAYTON & T. R. WALTON	
Luxation and avulsion injuries	670	Introduction	807
Prognosis	698	Patient assessment	807
External invasive tooth resorption following trauma	699	Choosing the material	809
Essentials	707	Tooth preparation and veneer design	810
References	709	Impressions	814
		Bonding	814
		Review and maintenance	815
		Essentials	820
		References	821

31 Resin-Bonded Bridges and Conventional Bridges in the Anterior Region	824	Orthodontic space closure	879
K. GOTFREDSEN & B. PJETURSSON		Important consideration when planning for later implant treatment	882
Indications	824	Essentials	886
Different types of RBBs	824	References	886
Disadvantages with tooth supported FDPs	828	35 Implant Therapy in the Esthetic Zone	888
Prognosis of tooth supported FDPs, RBBs and implant-supported single crowns (ISC)	829	S. STORGÅRD JENSEN, V. CHAPPUIS & D. BUSER	
Complications of FDPs, RBBs and ISC	831	Indications for dental implants in trauma patients	888
Essentials	831	Treatment planning	888
References	832	Biologic aspects in esthetic implant sites	890
32 Dentoalveolar Ankylosis, Decoronation and Alveolar Bone Preservation	834	Ideal implant position	891
B. MALMGREN, O. MALMGREN & L. ANDERSSON		The concept of comfort and danger zones	892
Introduction	834	To create and maintain a harmonious soft tissue	893
The normal and damaged periodontal ligament	834	To create and maintain a harmonious alveolar process	894
Development of dentoalveolar ankylosis	835	Horizontal augmentation techniques	894
Clinical diagnosis of ankylosis	835	GBR technique: simultaneous approach	895
Methods to prevent ankylosis	835	GBR technique: staged approach	897
Progression of ankylosis	835	Rationale for the described techniques	900
Ankylosis in adult patients	835	Vertical augmentation techniques	901
Ankylosis in young, still growing, patient	836	Segment osteotomy with interpositional graft	902
Infraposition (infraocclusion)	836	Bone harvesting	902
Treatment options of infraposition	836	Long-term prognosis	905
Decoronation	838	References	905
Alveolar bone development after decoronation of ankylosed teeth	838	36 Esthetic Considerations in Restoring the Traumatized Dentition: a Biologic Approach	912
Rate of infraposition	846	B. U. ZACHRISSON & S. TORESKOG	
Preservation of the alveolar process	847	Tribute to Sverker Toreskog 1936–2013	912
Implants and root remnants	849	Introduction	912
Essentials	850	Replacement of a missing maxillary central incisor	912
References	850	Replacement of a missing maxillary lateral incisor	926
33 Autotransplantation of Teeth to the Anterior Region	853	Replacement of a canine	927
J. O. ANDREASEN, L. ANDERSSON, M. TSUKIBOSHI & E. M. CZOCHROWSKA		Replacement after loss of multiple maxillary anterior teeth	928
Treatment planning	853	Restoring fractured teeth	928
Surgical considerations	853	The Toreskog/Myrin concept	930
Surgical procedure	854	Essentials	930
Orthodontic considerations	862	References	931
Restorative considerations	864	37 Prevention of Dental and Oral Injuries	933
Prognosis	872	A. SIGURDSSON & N. COHENCA	
Essentials	874	Introduction	933
References	875	Means to prevent dental maxillofacial injuries	936
34 Strategies for Treatment of Tooth Loss after Trauma to the Anterior Region of Young Patients	878	Appliances to prevent dental injuries	936
L. ANDERSSON, B. MALMGREN, O. MALMGREN & S. STORGÅRD JENSEN		Other applications for the use of mouthguards	949
Introduction	878	Essentials	951
Growth of the anterior maxilla	878	References	952
Prosthetic alternatives in the early mixed dentition	879	38 Prognosis of Traumatic Dental Injuries: Statistical Considerations	955
		P. K. ANDERSEN, F. M. ANDREASEN & J. O. ANDREASEN	
		Identifying prognosis related factors	955
		Expressing prognosis quantitatively	955

Comparing life tables	959	42 Information to the Public, Patients and Emergency Services on Traumatic Dental Injuries	992
Essentials	960	M. T. FLORES, M. AL-SANE & L. ANDERSSON	
References	960	Introduction	992
39 Splinting of Traumatized Teeth	962	Prevention	992
J. O. ANDREASEN & K. S. OIKARINEN		Information aiming at increasing the knowledge on how to act at the place of accident	993
Influence of splinting on dental tissues	962	Development of a public awareness campaign	999
Requirements for an acceptable splint	963	Information to emergency services	1001
Splinting methods	963	Information to patients	1001
Testing the mechanical properties of various splinting types	963	Essentials	1004
Recommendations for splinting type and duration	968	References	1004
Essentials	970	43 Dental Trauma Guide	1009
References	970	J. O. ANDREASEN, E. LAURIDSEN & T. A. GERDS	
40 Bleaching of the Discolored Traumatized Tooth	972	www.dentaltraumaguide.org	1009
J. E. DAHL, S. E. KOPPERUD & U. PALLESEN		Essentials	1012
Etiology of discoloration	972	References	1014
Medicaments	972	44 International Association of Dental Traumatology (IADT)	1015
Intracoronal bleaching	973	L. ANDERSSON, J. O. ANDREASEN & A. MOULE	
External tooth bleaching	976	The IADT	1015
Clinical recommendations	978	Start of the organization	1015
Essentials	978	IADT World Congresses	1016
References	979	IADT Treatment Guidelines for Traumatic Dental Injuries	1016
41 Economic Aspects of Traumatic Dental Injuries	982	References	1018
U. GLENDOR, L. ANDERSSON & J. O. ANDREASEN		Appendix 1	1020
Introduction	982	Appendix 2	1023
Costs of traumatic dental injuries	982	Appendix 3	1024
Time and costs	983	Appendix 4	1025
Essentials	987	Index	1027
References	989
