

# Contents

Preface .....	IX
Introduction .....	XI
Acknowledgements .....	XV
Additions to Basic Literature .....	XVII
1 Polyphasic (Combined) Approach to Cyanobacterial Taxonomy .....	1
2 Phenotypic Characters of Heterocytous Cyanobacteria .....	7
Cells, Cell Division, Trichome Morphology .....	7
Ultrastructure .....	13
Heterocytes and their Position in Trichomes .....	16
Akinetes and Arthrospores .....	23
Filament Morphology, False Branching, Polarity .....	31
Thallus Morphology, Colonies .....	32
Reproduction, Life Cycles .....	33
Ecophysiological and Biochemical Features .....	39
3 Ecology and Distribution .....	43
4 Classification System .....	47
Phylogenetic Background, Relation to Morphology .....	47
Principles of the Modern Taxonomic Classification .....	48
Nomenclature .....	51
System of Heterocytous Cyanoprokaryotes – Nostocineae (State in 2012, the Generic Level) .....	52
5 Glossary (Morphological Terms) .....	59
6 Systematic part .....	67
1. Family <b>Scytonemataceae</b> Rabenhorst ex Bornet et Flahault 1887 ..	67
2. Family <b>Symphyonemataceae</b> Hoffmann et al. 2005 .....	183
3. Family <b>Rivulariaceae</b> Kützing ex Bornet et Flahault 1886 .....	207
4. Family <b>Microchaetaceae</b> Lemmermann 1910 .....	377
5. Family <b>Chlorogloeopsidaceae</b> (Mitra) Mitra et Pandey 1967 .....	489
6. Family <b>Hapalosiphonaceae</b> Elenkin 1916, nom. cons. ....	495
7. Family <b>Nostochopsidaceae</b> Geitler 1925 .....	539
8. Family <b>Fischerellaceae</b> Anagnostidis et Komárek 1990 .....	550
9. Family <b>Stigonemataceae</b> Borzi 1892, nom. cons. ....	585
10. Family <b>Nostocaceae</b> C.A. Agardh 1824 ex Kirchner 1898 .....	652
7 Main Literature .....	1019
8 Index .....	1087
