

## 9 Tables and figures legend

### 9.1 Tables:

Table 1: Test results for linear sprint and vertical jump performances from different studies within elite male and female soccer players.....	12
Table 2: Test results from different agility test protocols used in soccer players testing for both male and female. ....	14
Table 3: Test results from different repeated sprint ability (RSA) test protocols used in soccer players testing for both male and female.....	16
Table 4: Participant characteristics across studies (mean $\pm$ SD). ....	33
Table 5: Periodization of sprint training with resistance running band in study III (session one of every week).....	36
Table 6: Periodization of repeated sprint training in study III (session two of every week).....	36
Table 7: Strength training program followed by the strength-training group in study III. ....	37
Table 8: Periodization of the repeated agility training in study IV. ....	38
Table 9: Periodization of the linear repeated sprint training in study IV. ....	39
Table 10: Reliability measures for the Newtest Powertimer, NOC and the force platform (Study I). ....	46
Table 11: Mean differences between groups from pre to post-test (Study II). ....	47
Table 12: Mean (SD) results of combined agility with repeated sprint training group on the various performance variables (Study III). ....	48
Table 13: Mean (SD) results of strength training group on the various performance variables (Study III). ....	49
Table 14: Repeated agility training group pairwise comparison from the pre- and post-test (Study IV).....	49
Table 15: Repeated sprint training group pairwise comparison from the pre- and post-test (Study IV).....	50
Table 16: Correlation coefficients between measures of jumping performance, sprinting abilities and measures of aerobic fitness (Study V). ....	52
Table 17: Correlation coefficients between sprinting variables (Study V). ....	53

### 9.2 Figures:

Figure 1: The 4 agility exercises performed during the resisted running sessions in study III.....	37
Figure 2: The repeated agility exercise performed by the repeated agility-training group during the intervention period in study IV. ....	39
Figure 3: Within groups performance change from pre- to post-test (Study II).....	47
