Preface	iii
Prologue Lifespan Development: Issues, Theories, and Research	1
The Study of Human Development	2
The subject matter of human development	3;
The role of theory	5
Major Contemporary Theories: An Introduction	7
Psychosexual/psychosocial development: Freud and Erikson	7;
Cognitive development: Piaget	10;
The learning of behavior: B. F. Skinner and other behaviorists	14;
How theories differ	17
Research	18
Experimental Design	18
Conceptualizing a study	20;
Research data	22;
Data collection	23;
Results and discussion	24;
Ethical considerations	24
Features	
Summary	26
Further Readings	28
Observational Activities: Prologue	29
<i>Instructions for Observational Activities</i>	
<i>Adult-Infant Interaction</i>	

## **Part One Birth and Infancy 31**

### **Chapter 1 Prenatal Development 33**

Genetic Influences	34
Mechanisms of heredity	35;
Inherited characteristics	41;
Birth defects	45
Stages of Gestation	48
Ovum stage	48;
Embryo stage	50;
Fetal stage	52
Prenatal Environmental Influences	54
Teratogens	54;
Hormones	57;
The mother	60;
The RH factor	62
To Have or Not Have Children	62
Features	
Prenatal Testing	49
Advice on Alcohol in Pregnancy	58
Summary	65
Further Readings	66

### **Chapter 2 Birth and the Neonate 67**

Labor	68
Complications	72;
Drugs during labor	72;
Anoxia	74

- Prematurity and Low Birth Weight 75
- Physical Characteristics of the Newborn 77
  - Respiration 77; Circulation 79; Digestion 79; Skeleton 80;
  - Temperature regulation 80; Immunity to infection 80
- Postpartum Separation 81
- Behavior of the Neonate 85
  - Sensory capabilities 87; Learning 88; Individual differences 89
- Features
  - Alternate Birth Centers 71
  - Gentle Birth 74
  - Learning To Be a Parent 84
  - Summary 91
  - Further Readings 92

### **Chapter 3 The Young Infant 93**

- Physical Growth 93
  - Development in body structures 94; Differential maturation 95
- Daily Routines 98
  - Eating 99; Sleeping 105
- Perception and Learning 108
  - Sight 108; The nonvisual senses 112; Moving and manipulating 113
- Cognitive Development 116
  - The sensorimotor period 116; Piaget's six stages of sensorimotor development 118; The preliminaries to language 121
- Social Relationships 122
  - Attachment 123; Parent-infant attachment 124; Basic trust 128; Fear of strangers 132
- Features
  - Crib Death 100
  - Sleep, Over the Life Span 107
  - Piaget's Periods of Cognitive Development 119
  - The Quality of Father-Infant Interaction 130
  - Erikson's Crises in Psychological Development 131
  - Summary 135
  - Further Readings 136
  - Observational Activities: Part One 138
    - Environmental Factors and the Health of the Unborn Baby*
    - Preparing for Fatherhood*

## **Part Two Toddlerhood 141**

### **Chapter 4 Growth, Cognition, and Language 143**

- Physical Development 143
  - Body growth 144; Motor skills 145
- Perception 148
  - Perception and motor development 150; Perception and the environment 152; Learning theory 152; Classical conditioning 153;
  - Operant conditioning 155; Punishment 156
- Cognition and Language 159

- Later Stages of Sensorimotor Intelligence 160
  - Tertiary circular reactions 160; The beginning of symbolic thought 162
- Language 166
  - Language acquisition 167; Language and grammar 170; Language and thought 175
- Features
  - Caution: Toddlers Ahead 149
  - Piaget's Periods of Cognitive Development 161
  - Talking Apes 176
  - Summary 178
  - Further Readings 179

## **Chapter 5 Social Relationships 181**

- Attachment and Separation 181
  - Long-term separation 184
- Socialization 185
  - Autonomy 187; Managing troublesome emotions 191
- Approaches to Child-Rearing 195
  - Changing views 195; Parenting 198; Discipline 199
- Child Abuse 204
- Culture and Upbringing 207
  - Child-rearing in other cultures 207
- Features
  - Erikson's Crises in Psychological Development 191
  - Parent Effectiveness Training 202
  - What Can We Do About Child Abuse? 209
  - Child-Rearing in Different American Subcultures 210
  - Summary 213
  - Further Readings 215
  - Observational Activities: Part Two 217
    - Television Viewing Patterns and Response*
    - The Young Child's Verbal and Nonverbal Communication*

## **Part Three Preschool Years 219**

### **Chapter 6 Physical and Perceptual Development 221**

- Physical Growth 222
  - Diet and health 223; Physique and personality 227; Locomotion and manipulation 229; Manipulating materials 230
- Perception 231
  - Attention 232; Discrimination 234
- Features
  - Deprivation Dwarfism 226
  - Summary 238
  - Further Readings 239

### **Chapter 7 Cognition and Language 240**

- Cognitive Development 240
  - Symbolic function 241; Characteristics of preoperational thought 246;

- Reasoning 249
- Concepts 250
  - Time 250; Space 251; Quantity 252; Relation 253;
  - Classification 254; Concepts and imaginative play 255
- Language 256
  - Word meaning 257; Toward communication 258
- IQ Tests for Preschoolers 259
- Day Care and Development 260
  - Differences between the day-care and home-care environments 263;
  - Effects of day care 264; Cognitive development 264; Social development 265;
  - Difficulties in interpreting current research 265
- Features
  - Children's Drawings 245
  - Piaget's Periods of Cognitive Development 247
  - Television: An Influential Teacher 262
  - The National Day-Care Study 266
  - Summary 268
  - Further Readings 269

## **Chapter 8 Personality and Society**

- Sex, Gender, and Self 271
  - Sex Differences 271; Gender Roles 273; Becoming a Boy or a Girl 276;
  - Theories of Gender Identification 277
- Emotional Development 279
  - Dependency 279; Dependency and Self-Image 279; Initiative versus Guilt 281;
  - Aggression 282; Fear and Anxiety 284
- Altruism and Moral Development 286
- Play and Fantasy 288
  - Social Play 290; Fantasy 293; Imaginary Companions 295;
  - Humor 296
- Features
  - Erikson's Crises in Psychosocial Development 282
  - Fairy Tales 289
  - Developmental Views of Friendship 292
  - Summary 296
  - Further Readings 297
- Observational Activities: Part Three 299
  - Number-Object Correspondence*
  - Sex Stereotyping*

## **Part Four Middle Childhood 301**

### **Chapter 9 Growth and Personality 303**

- Physical Development 304
  - Physical appearance 304; Health 307; Maturation 310;
  - Environment and growth 310
- Self-Awareness 311
  - Self-esteem 313; Industry versus inferiority 315
- Gender-Role Development 315
  - Social learning and modeling 316; Fathers' influence on gender roles 317

- Personality Problems 320
  - Fear and anxiety 321; Phobias and other problems 322;
  - Childhood psychosis 324
- Features
  - Secular Growth Trends 306
  - Teaching the Hyperactive Child 312
  - Erikson's Crises in Psychosocial Development 318
  - Summary 326
  - Further Readings 327

## **Chapter 10 Learning and Cognition 328**

- Problem-Solving 328
  - Memory 329; Applying hypotheses 331
- Cognitive Styles 332
- Standardized Testing 334
  - Intelligence quotient 335
- Reading 337
  - Reading disorders 339
- Learning Disabilities 342
- Stage of Concrete Operations 343
  - Decentration 344; Measurement 346
- Social Cognition 347
- Moral Development 349
- Features
  - The Gifted 336
  - Piaget's Periods of Cognitive Development 344
  - Kohlberg's Levels of Moral Development 352
  - Summary 353
  - Further Readings 355

## **Chapter 11 Home, Peers, and School 356**

- The Home 356
  - Autonomy and control 357; Fathers 360; Divorce 362;
  - Stepfamilies 366; Death in the family 367; Single-parent families 369;
  - Adoption 372; Siblings 373
- The Peer Group 376
  - Group norms 376; Solidarity against grownups 377; Status in the group 378; Socialization and peers 379; Friendship 380; Racial awareness and prejudice 282
- The School 382
  - Teaching methods 383
- Features
  - Working Mothers 364
  - What Should Adopted Children Know? 374
  - Teacher Expectations and Pupil Performance 385
  - Summary 385
  - Further Readings 387
  - Observational Activities: Part Four 388
    - Assessing a Child's Cognitive Ability*
    - Definition of Family*

## **Part Five Adolescence 391**

### **Chapter 12 Growing into Adulthood 393**

- Physical and Sexual Development 394
  - Physical growth 394; Puberty 395; Varying rates of development 399;
  - Sexual behavior 401
- Cognitive Development 407
  - Formal operations 408; Postconventional morality 411; Value systems 412;
  - Political awareness 414
- Features
  - Rites of Passage 398
  - Teen-Age VD 404
  - Teen-Age Pregnancy 406
  - Piaget's Periods of Cognitive Development 410
  - Kohlberg's Levels of Moral Development 412
  - Summary 415
  - Further Readings 416

### **Chapter 13 The Meaning of Identity 418**

- Adolescent Egocentrism 420
- Independence from the Family 422
- Peers and Society 424
  - The society of adolescents 425
- Ethnic and Racial Issues 429
- Problem Behavior 431
  - Disorders 431; Delinquency 436
- Vocational Choice 437
- Features
  - Erikson's Crises in Psychosocial Development 420
  - A Report Card for Marihuana 434
  - Teen-Age Drinking 438
  - Summary 443
  - Further Readings 443
  - Observational Activities: Part Five 445
    - Teen-Agers' Values*
    - Problems of Adolescence*

## **Part Six Young Adulthood 447**

### **Chapter 14 Physical, Cognitive, and Personality Development 449**

- Youth: An Optional Period 450
- Physical Development 452
- Cognitive Development 454
  - Beyond formal operations 457
- Moral Development 459
- Personality and Adjustment 461
  - Growth trends in adjustment 462

- Sequencing of Life Events 463
- Identity 465
  - Identity statuses in young adulthood 465
- Intimacy 467
  - Intimacy and attachment 469; Sexual intimacy 470; Nonsexual intimacy 472
- Features
  - Premenstrual Blues: Real or Imagined? 456
  - Piaget's Periods of Cognitive Development 458
  - Kohlberg's Levels of Moral Development 461
  - Psychological Androgyny 468
  - Erikson's Crises in Psychosocial Development 471
  - Summary 472
  - Further Readings 474

## **Chapter 15 Family and Occupational Development 475**

- Marriage 475
- Mate selection 477; Courtship 478
- Marital Adjustment 479
- Sexual adjustment and fidelity 480; Role adjustment 481; Work roles and marital roles 483; Personality factors in marital adjustment 485
- Divorce 485
- Nonmarital Life-Styles 487
  - Cohabitation 488; Single (never married) life-style 489
- Parenting 489
  - Fertility motivation 490; Parenting as a developmental process 492; Adjusting to parenthood 493; Working mothers 495; The family life cycle 495
- Occupational Development 496
  - Stages in occupational development and self-concept 498; Career choice and sex role identity 501
- Features
  - Sex Therapy 482
  - Benefits and Costs of Having Children 491
  - Women in Male-dominated Occupations 500
  - Summary 502
  - Further Readings 504
  - Observational Activities: Part Six 505
    - The Value of Children to Young Adults*
    - Shared Roles in Marriage*

## **Part Seven Middle Adulthood 507**

### **Chapter 16 Physical, Cognitive, and Personality Development 509**

- Physical Development 510
  - Factors related to health and aging 512
- Health and Nutrition Tips 513
  - Type A behavior: a factor in heart disease 515; Life stresses 516;
  - The climacteric and menopause 517
- Cognitive Development 521

- Intelligence scores 521; Fluid and crystallized abilities 522; Logic and morality 523; Creativity 523
- Personality Development 525
  - Personality stability and change 526; Developmental tasks of middle adulthood 528; Psychological reactions to aging 531;
  - Psychological reactions to death 532
- Features
  - Midlife Pregnancy 518
  - Erikson's Crises in Psychosocial Development 530
  - Summary 533
  - Further Readings 534

## **Chapter 17 Family and Occupational Development 535**

- Family Life 536
  - Families with adolescents 536; Families with adult children 538;
  - Relationships with aged parents 540; Grandparenthood 542
- Marriage 543
  - Marital adjustment 543; Marital styles 544; Midlife sexuality 547;
  - Midlife divorce 549; Widowhood 550; Singlehood 550
- Occupational Development 551
  - Occupational advancement 551; Job satisfaction 553; Integrating work and leisure 554
- Features
  - Wife-beating: A Common Practice 546
  - Second Careers 554
  - Summary 555
  - Further Readings 557
  - Observational Activities: Part Seven 558
    - Vocational Development*
    - How Old Is Old?*

## **Part Eight Late Adulthood 561**

### **Chapter 18 Physical, Cognitive, and Personality Development 563**

- Physical Development 564
  - Health factors in late adulthood 567; Central nervous system and behavior 569; Theories of aging 573
- Cognitive Development 574
  - Intelligence scores 574; Learning and memory 575; Logical abilities 577;
  - Interpreting age-related cognitive decline 577
- Personality Development 579
  - Development tasks in late adulthood 580; Social image and self-concept 583;
  - Personality and adjustment 584
- Features
  - Exercise and the Aged 570
  - Erikson's Crises in Psychosocial Development 582
  - Older Students 585
  - Summary 587
  - Further Readings 588

**Chapter 19 Family Life, Retirement, and the Final Years 590**

## Family Life 591

Marriage in late adulthood 591; Psychosexual adjustment 593;  
Relations with children 596; Relationships with  
grandchildren 597; Relationships with siblings 598;  
Singlehood 598; Widowhood 600; Institutionalization 601

## Retirement 605

## The Terminal Stage 609

Psychological changes 609; Social losses 613; Terminal hospitalization  
613; Attitudes about death 614; The dying process 616; Stages of  
dying 617

## Features

Senior Power 602

Double Jeopardy: To Be Old and a Minority Group Member 610

Hospices 615

Sunset Walk in Thaw-Time in Vermont 619

Summary 620

Further Readings 622

Observational Activities: Part Eight 623

*Media Stereotyping of the Aged*

*Life Review*

Glossary 624
