Chapter 1	Introduction	1
1.1	Need for a 3D Cadastre	3
1.2	Research Scope	6
1.2.1	Topics within the Scope of This Book	7
1.2.2	Topics outside the Scope of This Book	8
1.3	Research Objectives	8
1.4	Previous and Related Research	9
1.4.1	Related Research on 3D Cadastres	9
1.4.2	Related Research on 3D Tools and 3D Modeling	9
1.5	Contribution of the Work	10
1.6	Organization of the Book	11

Part I

Analysis of the Background 13

Chapter 2	Scope of a 3D Cadastre	15
2.1	Elementary Cadastral Model	15
2.2	Types of Cadastral Registrations	16
2.2.1	Deed vs. Title Registration	17
2.2.2	A Centralized or Decentralized Cadastral Registration	18
2.2.3	Land Registration with Separate or Integrated Cadastre	19
2.2.4	Fiscal or Legal Cadastre	19
2.2.5	General or Fixed Boundaries	20
2.2.6	Financed by Government or Cost Recovery	20
2.3	3D Cadastral Recordings and Private Law	20
2.3.1	Right of Ownership	21
2.3.2	Right of Superficies	23
2.3.3	Right of Long Lease	23
2.3.4	Right of Easement	24
2.3.5	Apartment Right and Strata Title	24
2.3.6	Joint Ownership via Other Real Estate Objects	27
2.4	3D Cadastral Recordings and Public Law	27
2.4.1	Belemmeringenwet Privaatrecht	28
2.4.2	Law on Monuments	28
2.4.3	Law on Soil Protection	29
2.5	Conclusions	30

Chapter 3	3D Recordings in Current Cadastral Registrations	33
3.1	The Netherlands	35
3.1.1	Underground Objects in the Cadastral Registration	35
3.1.2	Telecom Networks in the Cadastral Registration	35
3.1.3	Case Studies in the Netherlands	36
3.1.4	Evaluating 3D Cadastre in the Netherlands	48
3.2	Norway	49
3.2.1	Evaluating 3D Cadastre in Norway	51
3.3	Sweden	51
3.3.1	Evaluating 3D Cadastre in Sweden	53
3.4	Queensland, Australia	54
3.4.1	Restricted, Building, and Volumetric Parcels	54
3.4.2	A Case Study in Queensland	56
3.4.3	Evaluating 3D Cadastre in Queensland	57
3.5	British Columbia, Canada	60
3.5.1	Evaluating 3D Cadastre in British Columbia	63
3.6	The United States	63
3.6.1	Case Studies in the United States	65
3.6.2	Evaluating 3D Cadastre in the United States	75
3.7	Argentina	76
3.7.1	A Case Study in Argentina	77
3.7.2	Evaluating 3D Cadastre in Argentina	80
3.8	Conclusions	81

Chapter 4	Needs and Opportunities for a 3D Cadastre	83
4.1	Current Cadastral Registrations and 3D	83
4.1.1	Surface-Oriented Cadastral Registrations	84
4.1.2	3D Property Units in Cadastral Registrations	87
4.2	Basic Needs for a 3D Cadastre	87
4.3	Opportunities for a 3D Cadastre	88
4.4	3D Applications outside the Cadastral Domain	90
4.5	Conclusions	92

Part II

Framework for Modeling 2D and 3D Situations 95

Chapter 5	Theory of Spatial Data Modeling	97
5.1	Data Models	97
5.1.1	Data Models in GIS	99
5.1.2	Design Phases in Modeling	101
5.2	Conceptual Model	101

5.3	Logical Model	101
5.3.1	Relational Model	102
5.3.2	Object-Oriented Model	103
5.3.3	Object Relational Model	104
5.4	Physical Model	105
5.5	UML	106
5.6	Spatial Data Modeling and DBMS	110
5.7	Standardization Initiatives	111
5.7.1	OpenGeospatial Consortium	111
5.7.2	ISO TC/211	115
5.8	Conclusions	116
Chapter 6 Geo-DBMSs		119
6.1	Geometrical Primitives in DBMSs	120
6.1.1	2D Geometrical Primitives in DBMSs	120
6.1.2	3D Geometrical Primitives in DBMSs	122
6.2	Topological Structure in DBMSs	125
6.2.1	OGC, ISO and Planar Partition Topology	126
6.2.2	User-Defined DBMS Implementation of 2D Topological Structure	127
6.2.3	Commercial DBMS Implementations of 2D Topological Structure	136
6.2.4	User-Defined DBMS Implementation of 3D Topological Structure	138
6.3	Spatial Analyses in DBMSs	140
6.3.1	2D Spatial Analyses Using Geometrical Primitives	141
6.3.2	3D Spatial Analyses Using Geometrical Primitives	143
6.3.3	Spatial Analyses Using the Topological Structure	145
6.3.4	Case Study: Topological Structure or Geometrical Primitives?	146
6.4	Implementation of a 3D Geometrical Primitive in a DBMS	148
6.4.1	Definition of 3D Primitive	149
6.4.2	Validation	152
6.4.3	Spatial Indexing in 3D	156
6.4.4	3D Functions	158
6.5	Conclusions	159
Chapter 7 3D GIS and Accessing a 3D Geo-DBMS with Front Ends		163
7.1	3D GIS	163
7.1.1	Organization of 3D Data	164
7.1.2	3D Data Collection and Object Reconstruction	165
7.1.3	Visualization and Navigation in 3D Environments	166
7.1.4	3D Analyses and 3D Editing	168

7.2	Accessing a Geo-DBMS with a CAD Front End.....	168
7.2.1	Geometrical Data Initially Organized in Oracle Spatial 9i.....	169
7.2.2	Geometrical Data Initially Organized in MicroStation Design Files	171
7.2.3	Spatial Viewer	172
7.3	Accessing a Geo-DBMS with a GIS Front End.....	173
7.4	Accessing a Geo-DBMS Using Web Technology.....	177
7.4.1	VRML and X3D	177
7.4.2	Prototypes	178
7.5	Conclusions	187

Chapter 8 Integrating 2D Parcels and 3D Objects in One Environment 189

8.1	Absolute or Relative Coordinates	189
8.2	Introduction of a Case Study	190
8.2.1	Description of Data Sets	192
8.2.2	Combining Point Heights and 3D Objects.....	192
8.2.3	Assigning Height to Parcels	193
8.3	Integrated TINs of Point Heights and Parcels	195
8.3.1	Unconstrained TIN	195
8.3.2	Constrained TIN	198
8.3.3	Conforming TIN	199
8.3.4	Refined Constrained TIN	200
8.4	Analyzing and Querying Parcel Surfaces	202
8.5	Generalization of the Integrated TIN	204
8.5.1	Detailed-to-Coarse Approach.....	204
8.5.2	Coarse-to-Detailed Approach.....	204
8.5.3	Integrated Height and Object Generalization	206
8.6	Generalization Prototype	206
8.7	Conclusions	210

Part III

Models for a 3D Cadastre 213

Chapter 9 Conceptual Model for a 3D Cadastre 215

9.1	Introduction of Possible Solutions	215
9.1.1	A Full 3D Cadastre	216
9.1.2	A Hybrid Solution.....	216
9.1.3	3D Tags in Current 2D Cadastral Registrations	217
9.2	A 2D Cadastre with 3D Tags	218
9.3	Hybrid Approach	218
9.3.1	Registration of Right-Volumes	219
9.3.2	Registration of 3D Physical Objects	221

9.4	Full 3D Cadastre	223
9.4.1	Combined 2D/3D Alternative	224
9.4.2	Pure 3D Cadastre	226
9.5	Evaluating the Conceptual Models	227
9.5.1	Solutions Seen from a Cadastral Point of View	227
9.5.2	Solutions Seen from a Technical Point of View	228
9.5.3	The Optimal Solution for a 3D Cadastre	230
9.6	Conclusions	231

Chapter 10 Logical Model for a 3D Cadastre 233

10.1	Right-Volumes in the DBMS	233
10.1.1	Spatial Data Model	233
10.1.2	Administrative Data Model	236
10.1.3	Data Collection	238
10.1.4	Querying	238
10.2	3D Physical Objects in the DBMS	238
10.2.1	Spatial Data Model	239
10.2.2	Administrative Data Model	240
10.2.3	Data Collection	241
10.2.4	Fundamental Issues When Linking GIS and CAD	243
10.2.5	Querying	244
10.3	Volume Parcels in the DBMS	244
10.3.1	Spatial Data Model	244
10.3.2	Administrative Data Model	245
10.3.3	Data Collection	246
10.3.4	Querying	247
10.4	Maintaining History in the 3D Cadastre	247
10.4.1	History for Right-Volumes	248
10.4.2	History for 3D Physical Objects	248
10.4.3	History in a Full 3D Cadastre	248
10.5	Conclusions	249

Part IV

Realization of a 3D Cadastre 251

Chapter 11	Prototypes Applied to Case Studies	253
11.1	Prototypes of the Hybrid Cadastre	253
11.1.1	Case Study 1: Building Complex in The Hague	254
11.1.2	Case Study 2: The Hague Central Station	256
11.1.3	Case Study 3: Apartment Complex	261
11.1.4	Case Study 4: Railway Tunnel in Urban Area	262
11.1.5	Case Study 5: Railway Tunnel in Rural Area	264
11.1.6	Evaluation of Hybrid Cadastre	267

11.2	Prototype of the Full 3D Cadastre	269
11.2.1	The Gabba Stadium in Queensland	269
11.2.2	Evaluation of Full 3D Cadastre	274
11.3	Conclusions	275
11.3.1	Hybrid Cadastre	277
11.3.2	Full 3D Cadastre	277
Chapter 12	Summary, Conclusions, and Further Research	279
12.1	Analysis of the Background	279
12.1.1	Surface-Oriented Cadastral Registrations	279
12.1.2	3D Property Units in Cadastral Registrations	280
12.1.3	Needs and Requirements for a 3D Cadastre	281
12.2	Framework for Modeling 2D and 3D Situations	282
12.2.1	2D and 3D Geo-Objects in Geo-DBMS	282
12.2.2	3D GIS	284
12.2.3	Accessing Spatial Information Organized in a DBMS	284
12.2.4	2D Parcels and 3D Geo-Objects in One 3D Environment	285
12.3	Models for a 3D Cadastre	286
12.3.1	Conceptual Solutions for a 3D Cadastre	286
12.3.2	The Optimal Solution for a 3D Cadastre	287
12.4	Realization of a 3D Cadastre	288
12.4.1	Full 3D Cadastre	288
12.4.2	Hybrid Cadastre	289
12.5	Future Directions for a 3D Cadastre	291
12.6	Further Research	292
12.6.1	Institutional Aspects of 3D Cadastral Registration	293
12.6.2	Geo-Information Infrastructure	293
12.6.3	3D in the New-Generation GIS Architecture	293
12.7	Main Results of the Research Presented in This Book	296
References	297
Appendix A	Visualizing Attributes in VRML	309
Appendix B	XSLT Stylesheet to Transform XML to X3D	311
Index	315
