
Table of Contents

Foreword	vii
Preface	ix
1. Introduction to Digital Mapping	1
The Power of Digital Maps	1
The Difficulties of Making Maps	2
Different Kinds of Web Mapping	5
2. Digital Mapping Tasks and Tools	12
Common Mapping Tasks	13
Common Pitfalls, Deadends, and Irritations	14
Identifying the Types of Tasks for a Project	17
3. Converting and Viewing Maps	21
Raster and Vector	21
OpenEV	22
MapServer	22
Geospatial Data Abstraction Library (GDAL)	25
OGR Simple Features Library	30
PostGIS	32
Summary of Applications	35
4. Installing MapServer	36
How MapServer Applications Operate	36
Walkthrough of the Main Components	37
Installing MapServer	41
Getting Help	57

5. Acquiring Map Data	59
Appraising Your Data Needs	59
Acquiring the Data You Need	64
6. Analyzing Map Data	69
Downloading the Demonstration Data	69
Installing Data Management Tools: GDAL and FWTools	70
Examining Data Content	71
Summarizing Information Using Other Tools	82
7. Converting Map Data	92
Converting Map Data	92
Converting Vector Data	93
Converting Raster Data to Other Formats	98
8. Visualizing Mapping Data in a Desktop Program	103
Visualization and Mapping Programs	103
Using OpenEV	105
OpenEV Basics	111
9. Create and Edit Personal Map Data	129
Planning Your Map	129
Preprocessing Data Examples	132
10. Creating Static Maps	150
MapServer Utilities	150
Sample Uses of the Command-Line Utilities	151
Setting Output Image Formats	170
11. Publishing Interactive Maps on the Web	173
Preparing and Testing MapServer	173
Create a Custom Application for a Particular Area	183
Continuing Education	209
12. Accessing Maps Through Web Services	211
Web Services for Mapping	212
What Do Web Services for Mapping Do?	212
Using MapServer with Web Services	214
Reference Map Files	235

13. Managing a Spatial Database	241
Introducing PostGIS	241
What Is a Spatial Database?	241
Downloading PostGIS Install Packages and Binaries	244
Compiling from Source Code	247
Steps for Setting Up PostGIS	247
Creating a Spatial Database	252
Load Data into the Database	253
Spatial Data Queries	256
Accessing Spatial Data from PostGIS in Other Applications	266
14. Custom Programming with MapServer's MapScript	276
Introducing MapScript	276
Getting MapScript	276
MapScript Objects	278
MapScript Examples	278
Other Resources	285
Parallel MapScript Translations	286
A. A Brief Introduction to Map Projections	289
B. MapServer Reference Guide for Vector Data Access	307
Index	337
