Foreword	xi
Credits	xiii
Preface	xxi
Chapter 1. Mapping Your Life	1
1. Put a Map on It: Mapping Arbitrary Locations with Online Services	1
2. Route Planning Online	7
3. Map the Places You've Visited	12
4. Find Your House on an Aerial Photograph	14
5. The Road Less Traveled by in MapQuest	16
6. Make Route Maps Easier to Read	22
7. Will the Kids Barf?	25
8. Publish Maps of Your Photos on the Web	28
9. Track the Friendly Skies with Sherlock	32
10. Georeference Digital Photos	33
11. How Far? How Fast? Geo-Enabling Your Spreadsheet	36
12. Create a Distance Grid in Excel	42
13. Add Maps to Excel Spreadsheets with MapPoint	46
Chapter 2. Mapping Your Neighborhood	54
14. Make Free Maps of the United States Online	54
15. Zoom Right In on Your Neighborhood	61
16. Who Are the Neighbors Voting For?	65
17. Map Nearby Wi-Fi Hotspots	69

18. Why You Can't Watch Broadcast TV	73
19. Analyze Elevation Profiles for Wireless Community Networks	82
20. Make 3-D Raytraced Terrain Models	85
21. Map Health Code Violations with RDFMapper	92

Chapter 3. Mapping Your World **97**

22. Digging to China	98
23. Explore David Rumsey's Historical Maps	99
24. Explore a 3-D Model of the Entire World	106
25. Work with Multiple Lat/Long Formats	110
26. Work with Different Coordinate Systems	113
27. Calculate the Distance Between Points on the Earth's Surface	116
28. Experiment with Different Cartographic Projections	120
29. Plot Arbitrary Points on a World Map	135
30. Plot a Great Circle on a Flat Map	140
31. Plot Dymaxion Maps in Perl	148
32. Hack on Base Maps in Your Favorite Image Editor	151
33. Georeference an Arbitrary Tourist Map	156
34. Map Other Planets	160

Chapter 4. Mapping (on) the Web **165**

35. Search Local, Find Global	166
36. Shorten Online Map URLs	170
37. Tweak the Look and Feel of Web Maps	171
38. Add Location to Weblogs and RSS Feeds	173
39. View Your Photo Thumbnails on a Flash Map	175
40. Plot Points on a Spinning Globe Applet	178
41. Plot Points on an Interactive Map Using DHTML	183
42. Map Your Tracklogs on the Web	189
43. Map Earthquakes in (Nearly) Real Time	191
44. Plot Statistics Against Shapes	195
45. Extract a Spatial Model from Wikipedia	199
46. Map Global Weather Conditions	204

Chapter 5. Mapping with Gadgets **207**

47. Get Maps on Your Mobile Phone	211
48. Accessorize Your GPS	213

49. Get Your Tracklogs in Windows or Linux	216
50. The Serial Port to USB Conundrum	219
51. Speak in Geotongues: GPSTabel to the Rescue	222
52. Show Your Waypoints on Aerial Photos with Terrabrowser	227
53. Visualize Your Tracks in Three Dimensions	229
54. Create Your Own Maps for a Garmin GPS	237
55. Use Your Track Memory as a GPS Base Map	249
56. Animate Your Tracklogs	252
57. Connect to Your GPS from Multiple Applications	254
58. Don't Lose Your Tracklogs!	259
59. Geocode Your Voice Recordings and Other Media	266
60. Improve the Accuracy of Your GPS with Differential GPS	269
61. Build a Map of Local GSM Cells	273
62. Build a Car Computer	278
63. Build Your Own Car Navigation System with GpsDrive	288
Chapter 6. Mapping on Your Desktop	293
64. Mapping Local Areas of Interest with Quantum GIS	295
65. Extract Data from Maps with Manifold	303
66. Java-Based Desktop Mapping with Openmap	311
67. Seamless Data Download from the USGS	317
68. Convert Geospatial Data Between Different Formats	319
69. Find Your Way Around GRASS	326
70. Import Your GPS Waypoints and Tracklogs into GRASS	333
71. Turn Your Tracklogs into ESRI Shapefiles	336
72. Add Relief to Your Topographic Maps	344
73. Make Your Own Contour Maps	351
74. Plot Wireless Network Viewsheds with GRASS	356
75. Share Your GRASS Maps with the World	366
76. Explore the Effects of Global Warming	371
77. Become a GRASS Ninja	382
Chapter 7. Names and Places	393
78. What to Do if Your Government Is Hoarding Geographic Data	394
79. Geocode a U.S. Street Address	399
80. Automatically Geocode U.S. Addresses	403

81. Clean Up U.S. Addresses	409
82. Find Nearby Things Using U.S. ZIP Codes	413
83. Map Numerical Data the Easy Way	417
84. Build a Free World Gazetteer	421
85. Geocode U.S. Locations with the GNIS	426
86. Track a Package Across the U.S.	430
Chapter 8. Building the Geospatial Web	433
87. Build a Spatially Indexed Data Store	437
88. Load Your Waypoints into a Spatial Database	440
89. Publish Your Geodata to the Web with GeoServer	446
90. Crawl the Geospatial Web with RedSpider	454
91. Build Interactive Web-Based Map Applications	456
92. Map Wardriving (and other!) Data with MapServer	465
Chapter 9. Mapping with Other People	472
93. Node Runner	473
94. Geo-Warchalking with 2-D Barcodes	475
95. Model Interactive Spaces	479
96. Share Geo-Photos on the Web	484
97. Set Up an OpenGuide for Your Hometown	489
98. Give Your Great-Great-Grandfather a GPS	498
99. Map Your Friend-of-a-Friend Network	503
100. Map Imaginary Places	508
Index	515
