

# Table of Contents

FOREWORD	7
INTRODUCTION	9
1. THE IMPORTANCE OF GEOGRAPHICAL INFORMATION	11
1.1 Introduction	11
1.2 Geographical Information	11
1.3 Geographical Information Systems	13
1.4 The History of GIS	14
1.5 GIS as a Product of Different Sciences	16
1.6 The General Purpose GIS of Today and Tomorrow	16
1.7 Importance of GI	16
1.8 Effect of GI on the efficiency of the economy	17
1.9 GI is a rapidly growing business	18
1.10 Impediments to the use of GI in Europe	18
1.11 Conclusion	19
2. BASIC CONCEPTS OF GIS	21
2.1 Modelling Reality in a Geographical Information System	21
2.2 Spatial Concepts as Implemented in GIS	23
2.3 From IT to GIS	29
2.4 Geographical Analysis in GIS	35
2.5 Visualisation in GIS	36
3. ORGANISATION AND BUSINESS ASPECTS OF GIS	43
3.1 Strategies for the Introduction of GIS	44
3.2 The Decision to Realise a GIS Project	48
3.3 Organisations, People and GIS	50
3.4 Methodologies for System Design and Selection	51
3.5 The Economics of Geographical Information	56
3.6 Electronic Commerce in GIS	58
3.7 Misperceptions and Pitfalls	59
4. GEOGRAPHICAL INFORMATION INFRASTRUCTURES	63
4.1 The birth of Geographical Information Infrastructures	63
4.2 GII definitions	64
4.3 Legal issues to be addressed in a National Geographical Information Infrastructure	64
4.4 National Geographical Information Infrastructures	66
4.5 Regional (Multi-Country) Geographical Information Infrastructures	73
4.6 Global Spatial Data Infrastructure	74
4.7 Conclusions	75
5. NATIONAL GII SOLUTIONS: THE PORTUGUESE EXPERIENCE (PROJECT SNIG)	77
5.1 Institutional and Legal Framework	77
5.2 Network Characteristics	79
5.3 SNIG's Structure	79
5.4 SNIG's users	81
5.5 SNIG Network Consolidation Programs	82
5.6 Final Remarks	82
6. STANDARDISATION AND INTEROPERABILITY – FROM A EUROPEAN PERSPECTIVE	85
6.1 Introduction	85
6.2 The Standardisation Processes	86
6.3 Interoperability Movements	98
6.4 Conclusions	99

7.	GIS APPLICATION DOMAINS	101
7.1	Agriculture	101
7.2	Land registration and cadastre	103
7.3	Environment	103
7.4	Forestry	106
7.5	Soils	106
7.6	Natural hazards	108
7.7	Geology, geophysics and geotechnical applications	109
7.8	Spatial planning	109
7.9	Transport	112
7.10	Tourism	112
7.11	Health, social policy and humanitarian aid	113
7.12	Telecommunications	113
7.13	Public sector - local and regional administration	114
7.14	Utilities management	114
7.15	Socio-economy	115
7.16	Geo-marketing	115
8.	TRENDS	117
8.1	From Batch processing to Interactive and Network computing	117
8.2	Technology Push versus User Demand	118
8.3	GIS based on Cost-Benefit Assessment	118
8.4	Distributed GIS	118
8.5	Metadata and Open GIS	119
8.6	Small, Business-Oriented GI	120
8.7	e-Commerce	121
8.8	GI and Telecommunication	121
8.9	General Integration of GI into Mainstream Computing	122
8.10	Easily and cheaply available data is the fuel for GI business take-off	122
	CONCLUSIONS	123
	ANNEX 1: LINKS	125
	ANNEX 2: Panel-GI Glossary	129
