Glossary	ix	4. Diagnosis of pregnancy	57
The Internet and obstetrics	x	Symptoms and signs	58
1. Physiology of reproduction	1	Pregnancy tests	63
Ovulation	2	5. Antenatal care	65
Ovulation and menstruation	3	Pre-pregnancy care	66
Menstruation	4	Care in pregnancy	67
Fertilisation	5	Booking visit	69
Development of the embryo	6	The first examination	71
Placental development and physiology	9	General recommendations at the booking visit	73
Placental function	12	Subsequent antenatal examinations	74
Development of the membranes	14	Abdominal examination	75
2. Fetal and maternal physiology	15	Abdominal palpation	76
Differentiation of fetal tissue	16	Vaginal examination in pregnancy	80
Cardiovascular system	17	Common complaints	81
Fetal haematology	18	Physiotherapy in the antenatal period	84
Maternal physiology	19	6. Assessment of the fetus	87
Weight increase	20	Fetal maturity	88
Carbohydrate metabolism	21	Fetal abnormality	90
Protein metabolism	23	Fetal growth	93
Fat metabolism	24	Fetal wellbeing	97
Respiratory changes	25	Fetal functional maturity	100
Cardiovascular physiology	26	7. Diseases of pregnancy	101
Blood volume changes	28	Vomiting in pregnancy	102
Haematological changes	29	Rhesus incompatibility	104
Gastro-intestinal tract	31	Antibody formation and detection	106
Renal system	32	Effects on fetus and neonate	107
Reproductive system	34	Prevention of rhesus haemolytic disease	109
Endocrine changes in pregnancy	35	Management of pregnancy	110
3. Obstetrical anatomy	37	Treatment	112
Pelvic organs	38	Hypertension in pregnancy	114
Vulva	39	Severe pre-eclampsia and eclampsia	120
Pelvic floor	40	Coagulation failure in pregnancy	122
Ischiorectal fossa	42	8. Systemic diseases in pregnancy	125
Perineum	44	Cardiac disease	126
Pelvic blood supply	45	Effects of pregnancy on heart disease	127
Pelvic sympathetic nerves	46	Effect of heart disease on pregnancy	128
Supports of uterus	47		
Bony pelvis — sagittal view	48		
Bony pelvis — brim	49		
Bony pelvis — cavity	50		
Bony pelvis — outlet	51		
Pelvic types	52		
Fetal skull	54		

Heart disease — labour and delivery	129	Invasive mole and choriocarcinoma	184
Respiratory diseases	131	Invasive mole and choriocarcinoma — chemotherapy	185
Venous thrombo-embolism	132	Antepartum haemorrhage	186
Pulmonary embolism	136	Placenta praevia (inevitable haemorrhage)	187
Anaemia	137	Placental abruption (accidental haemorrhage)	188
Iron deficiency	139	A clinical approach to antepartum haemorrhage	191
Folic acid deficiency	140		
Haemoglobinopathies and idiopathic thrombocytopenia	142	10. Multiple pregnancy and other antenatal complications	193
Diabetes	143	Multiple pregnancy	194
Urinary tract infection	146	Preterm labour	204
Chronic renal disease/epilepsy	148	Preterm premature rupture of membranes	206
Jaundice	149	Postmaturity	207
Thyroid disease	151	Prolapse and presentation of the cord	208
Infections	152	Polyhydramnios	210
Management of therapeutic drug exposure in pregnancy	156	Unstable lie	212
Acute abdominal conditions	157	Special cases	213
		Uterine displacements and anomalies	214
9. Vaginal bleeding in pregnancy	159	Tumours complicating pregnancy	217
Summary of causes	160	Recurrent miscarriage	220
Ectopic pregnancy	161	Female genital mutilation	222
Tubal pregnancy — aetiology	162		
Tubal pregnancy — implantation	163	11. Normal labour	223
Tubal pregnancy — outcome	164	Labour	224
Tubal pregnancy — symptoms and signs	166	Labour — the birth canal	226
Tubal pregnancy — differential diagnosis	167	The mechanism of labour	228
Tubal pregnancy — aids to diagnosis	168	Diagnosis of labour	232
Tubal pregnancy — treatment	169	Progress in labour	233
Abdominal pregnancy	170	Management of labour	236
Miscarriage	171	Partograms in the management of labour	244
Miscarriage — aetiology	173	Management — delivery	246
Miscarriage — clinical features	174	Management — third stage	249
Miscarriage — treatment	175		
Missed miscarriage	176	12. Abnormal labour	251
Septic miscarriage	177	Induction of labour	252
Hydatidiform mole/choriocarcinoma	178	Failure to progress in labour	257
Hydatidiform mole	179	Malposition/malpresentation	258
Hydatidiform mole — aetiology	180	Diagnosis of malpresentation	259
Hydatidiform mole — diagnosis	181		
Hydatidiform mole — follow-up	183		

Occipito-posterior position	261	16. The newborn baby	355
Face presentation	266	The normal newborn baby	356
Malpresentations	267	Management of the newborn baby	357
Cephalopelvic disproportion (CPD)	268	Neonatal apnoea	359
Breech presentation	269	Secondary apnoea	361
Labour in women previously delivered by caesarean section	280	Apnoea — resuscitation	362
13. Abnormalities of the third stage of labour and of the placenta and cord	281	Heat loss in the newborn	363
Retained placenta	282	Inspection for congenital defects	364
Primary postpartum haemorrhage	285	Routine screening tests	365
Acute inversion of the uterus	288	Nursing care	367
Abnormalities of the placenta	291	Breastfeeding	368
Abnormalities of the cord	293	Physiology of the newborn	369
14. Obstetrical operations and maternal injuries	295	Routine observations	371
Episiotomy	296	Low birthweight babies	372
Forceps delivery/Obstetric forceps	298	Estimation of gestational age	373
Vacuum extractor (ventouse)	312	Idiopathic respiratory distress syndrome (IRDS)	374
Symphysiotomy	313	Jaundice of the newborn	377
Caesarean section	314	Intracranial haemorrhage	379
Destructive operations	319	Birth injuries	381
Sterilisation	320	Congenital defects	384
Induction of abortion	321	17. Maternal and perinatal mortality	395
Maternal injuries	323	Maternal mortality	396
15. Puerperium — normal and abnormal	335	Definitions of maternal mortality	397
The puerperium	336	Causes of maternal death	398
Clinical aspects	339	Perinatal mortality	399
Feeding the newborn	340	Management of perinatal loss	401
Lactation and breastfeeding	342	18. Contraception	403
Secondary postpartum haemorrhage	345	Hormonal contraception	404
Puerperal pyrexia	346	The intra-uterine contraceptive device (IUCD)	410
Genital tract infection	347	Barrier methods	413
Mental illness in the puerperium	350	Natural methods	415
Postnatal physiotherapy	351	Post-coital contraception	416
The postnatal examination	352	Male methods	417
Clinical examination	353	Female sterilisation	418
		Failure rates in contraception	419
		Index	421
