	<i>Contributors</i>	vii
PART I	INTRODUCTION	1
1	Landscape ecology and spatial information systems <i>R. Haines-Young, D. R. Green and S. Cousins</i>	3
PART II	OVERVIEWS	9
2	The role of geographic information systems for landscape ecological studies <i>D. A. Stow</i>	11
3	Landscape ecology, geographic information systems and nature conservation <i>P. B. Bridgewater</i>	23
PART III	CONCEPTUAL ISSUES	37
4	The tradition of landscape ecology in Czechoslovakia <i>J. R. Petch and J. Kolejka</i>	39
5	Equilibrium landscapes and their aftermath: spatial heterogeneity and the role of the new technology <i>C. J. Lavers and R. H. Haines-Young</i>	57
6	Hierarchy in ecology: its relevance to landscape ecology and geographic information systems <i>S. Cousins</i>	75
7	Landscape response units: process-based self-organising systems <i>F. Perez-Trejo</i>	87
PART IV	TECHNIQUES AND TECHNICAL ISSUES	99
8	Problems of sampling the landscape <i>A. R. Harrison and R. Dunn</i>	101
9	A methodology for acquiring information on vegetation succession from remotely sensed imagery <i>D. R. Green, R. Cummins, R. Wright and J. Miles</i>	111

- 10 Landscape structural analysis of central Belgium using SPOT data 129
H. Gulinck, O. Walpot and P. Janssens
- 11 Using cover-type likelihoods and typicalities in a geographic information system data structure to map gradually changing environments 141
T. F. Wood and G. M. Foody
- 12 The use of remote sensing (SPOT) for the survey of ecological patterns, applied to two different ecosystems in Belgium and Zaire 147
R. Goossens, T. Ongena, E. D'Haluin and G. Larnoe
- PART V APPLICATIONS 161**
- 13 Managing environmental radioactivity monitoring data: a geographic information system approach 163
I. Heywood and S. Cornelius
- 14 Using hydrological models and geographic information systems to assist with the management of surface water in agricultural landscapes 181
R. A. MacMillan, P. A. Furley and R. G. Healey
- 15 The effects of management on heath and mire hydrology: a framework for a geographic information system approach 211
A. M. Gurnell, P. J. Edwards and C. T. Hill
- 16 Use of geographic information systems for interpreting land-use policy and modelling effects of land-use change 223
R. Aspinall
- 17 Effects of beaver and moose on boreal forest landscapes 237
C. A. Johnston, J. Pastor and R. J. Naiman
- 18 The ecological interpretation of satellite imagery with special reference to bird habitats 255
G. H. Griffiths, J. M. Smith, N. Veitch and R. Aspinall
- 19 The use of landscape models for the prediction of the environmental impact of forestry 273
C. Lavers, R. Haines-Young and M. Avery
