Preface ix
Preface to the First Edition xiii

1 Remote sensing: basic principles 1
1.1 Introduction 1
1.2 Electromagnetic radiation and its properties 2
1.2.1 Terminology 2
1.2.2 Nature of electromagnetic radiation 3
1.2.3 The electromagnetic spectrum 5
1.2.4 Sources of electromagnetic radiation 13
1.2.5 Interactions with the Earth's atmosphere 15
1.3 Interactions with Earth-surface materials 17
1.3.1 Introduction 17
1.3.2 Spectral reflectance of Earth-surface materials 19
1.4 Summary 27
1.5 Questions 27

2 Remote sensing platforms and sensors 28
2.1 Introduction 28
2.2 Characteristics of imaging remote-sensing instruments 30
2.2.1 Spatial resolution 30
2.2.2 Spectral resolution 33
2.2.3 Radiometric resolution 34
2.3 Optical, near-infrared and thermal imaging sensors 37
2.3.1 Along Track Scanning Radiometer (ATSR) 37
2.3.2 Advanced Very High Resolution Radiometer (AVHRR) 38
2.3.3 Advanced Visible and Near-Infrared Radiometer (AVNIR) 38
2.3.4 Coastal Zone Colour Scanner (CZCS) 38
2.3.5 IRS-1 LISS 39
2.3.6 Landsat instruments 40
2.3.7 SPOT sensors 41
2.3.8 Other sensors 42
2.4 Microwave imaging sensors 43
2.4.1 ERS SAR 44
2.4.2 JERS SAR 45
2.4.3 RADARSAT 46
2.4.4 SIR-C/X-SAR 46
2.5 Summary 47
2.6 Questions 48

3 Digital computers and image processing 49
3.1 Introduction 49
3.2 Computer basics 50
3.2.1 Hardware and software 50
3.2.2 Networks 55
3.3 Image display subsystem 56
3.3.1 Colour display systems 56
3.3.2 Hard-copy systems 62
3.4 Data formats for digital satellite imagery 64
3.5 Image file formats and data compression 64
3.6 MIPS software 65
3.7 Summary 66
3.8 Questions 66

4 Pre-processing of remotely-sensed data 67
4.1 Introduction 67
4.2 Cosmetic operations 69
4.2.1 Missing scan lines 69
4.2.2 De-striping methods 70
4.3 Geometric correction and registration 75
4.3.1 Coordinate transformations 76
4.4 Atmospheric correction methods 87
4.5 Illumination and view angle effects 90
4.6 Sensor calibration 91
4.7 Terrain effects 94
4.8 Summary 95
4.9 Questions 95

5 Image enhancement techniques 97
5.1 Introduction 97

5.2 Human visual system 98
5.3 Contrast enhancement 100
5.3.1 Linear contrast stretch 100
5.3.2 Histogram equalisation 104
5.3.3 Gaussian stretch 105
5.4 Pseudocolour enhancement 108
5.4.1 Density slicing 109
5.4.2 Pseudocolour transform 110
5.5 Summary 111
5.6 Questions 111

6 Image transforms 112
6.1 Introduction 112
6.2 Arithmetic operations 113
6.2.1 Image addition 113
6.2.2 Image subtraction 114
6.2.3 Image multiplication 115
6.2.4 Image division 117
6.3 Empirically based image transforms 122
6.3.1 Perpendicular vegetation index 123
6.3.2 Tasselled cap (Kauth–Thomas) transformation 124
6.4 Principal components analysis 126
6.4.1 Standard principal components analysis 126
6.4.2 Noise-adjusted principal components analysis 133
6.4.3 Decorrelation stretch 137
6.5 Hue, saturation and intensity (HSI) transform 138
6.6 Fourier transform 139
6.7 Summary 146
6.8 Questions 146

7 Filtering techniques 147
7.1 Introduction 147
7.2 Low-pass (smoothing) filters 148
7.2.1 Moving-average filter 148
7.2.2 Median filter 152
7.2.3 Adaptive filters 153
7.3 High-pass (sharpening) filters 155
7.3.1 Image subtraction method 155
7.3.2 Derivative-based methods 155
7.4 Edge detection 159
7.5 Frequency-domain filters 161
7.6 Summary 165
7.7 Questions 165

8 Classification 167
8.1 Introduction 167
8.2 Geometrical basis of classification 168
8.3 Unsupervised classification 171
8.4 Supervised classification 174
8.4.1 Training samples 174
8.4.2 Statistical classifiers 178
8.4.3 Neural classifiers 185
8.5 Fuzzy classification and linear spectral unmixing 189
8.5.1 The linear mixture model 189
8.5.2 Fuzzy classifiers 195
8.6 Other approaches to image classification 197
8.7 Incorporation of non-spectral features 198
8.7.1 Texture 198
8.7.2 Use of external data 201
8.8 Contextual information 202
8.9 Feature selection 203
8.10 Classification accuracy 206
8.11 Summary 209
8.12 Questions 209

Appendix A: MIPS display program 211
Appendix B: Stand-alone programs 230
Appendix C: Installing the MIPS software 258
Appendix D: Description of sample image data sets 261
Appendix E: World Wide Web bookmarks 265
