

Contents

PART I **General Concepts and Techniques 1**

Chapter 1 Therapeutic Exercise: Foundational Concepts 3

- Therapeutic Exercise: Impact on Physical Function 3
 - Definition 4
 - Aspects of Physical Function: Definition of Key Terms 4
 - Types of Therapeutic Exercise Interventions 5
- Process and Models of Disablement 5
 - The Disablement Process 5
 - Models of Disablement 6
- Patient Management and Clinical Decision Making: An Interactive Relationship 11
 - Clinical Decision Making 12
 - A Patient Management Model 12
- Strategies for Effective Exercise Instruction 24
 - Preparation for Exercise Instruction 24
 - Concepts of Motor Learning: A Foundation of Exercise Instruction 24
 - Adherence 29
- Independent Learning Activities 30
 - Critical Thinking and Discussion 30

Chapter 2 Range of Motion 34

- Types of Range of Motion (ROM) Exercises 35
- Indications and Goals for Range of Motion 35
 - Passive Range of Motion 35
 - Active and Active-Assistive ROM 35
- Limitations of Range of Motion Exercises 36
 - Limitations of Passive Motion 36
 - Limitations of Active ROM 36
- Precautions and Contraindications to Range of Motion 36
- Principles and Procedures for Applying Range of Motion Techniques 37
 - Examination, Evaluation, and Treatment Planning 37
 - Prepare the Patient 37
 - Application of Techniques 37
 - To Apply PROM 37

- To Apply AROM 37
- Techniques for Joint and Muscle Range of Motion 38
 - Upper Extremity 38
 - Lower Extremity 43
 - Cervical Spine 47
 - Lumbar Spine 48
 - Combined Patterns of Motion 48
- Self-Assisted ROM (S-AROM) 49
 - Self-Assistance 49
 - Wand (T-bar) Exercises 51
 - Finger Ladder/Wall Climbing 53
 - Overhead Pulleys 53
 - Skate Board/Powder Board 54
 - Reciprocal Exercise Unit 54
- Continuous Passive Motion 54
 - Benefits of CPM 55
 - General Guidelines 55
- Range of Motion Through Functional Patterns 56
- Independent Learning Activities 56
 - Critical Thinking and Discussion 56
 - Laboratory Practice 57

Chapter 3 Resistance Exercise 58

- Muscle Performance and Resistance Exercise—Definitions and Guiding Principles 59
 - Strength 59
 - Power 60
 - Endurance 60
 - Overload Principle 61
 - SAID Principle 61
 - Reversibility Principle 62
- Skeletal Muscle Function and Adaptation to Resistance Exercise 62
 - Factors that Influence Tension Generation in Normal Skeletal Muscle 62
 - Physiological Adaptations Associated with Resistance Exercise 68
- Determinants of Resistance Exercise 70
 - Alignment and Stabilization 71

- Intensity 72
- Volume 74
- Frequency 75
- Duration 75
- Rest Interval (Recovery Period) 75
- Mode 76
- Speed of Exercise 77
- Periodization 78
- Integration of Function into a Resistance Exercise Program 79
- Types of Resistance Exercise 79
 - Manual and Mechanical Resistance Exercise 80
 - Isometric Exercise (Static Exercise) 80
 - Dynamic Exercise: Concentric and Eccentric 83
 - Dynamic Exercise: Constant Versus Variable Resistance 85
 - Isokinetic Exercise 86
 - Open-Chain and Closed-Chain Exercise 89
- Resistance Exercise: Principles, Precautions and Contraindications 95
 - General Principles of Resistance Training 95
 - Precautions During Resistance Training 98
 - Contraindications to Resistance Training 103
- Manual Resistance Exercise 103
 - Definition and Use in Rehabilitation 103
 - Guidelines and Special Considerations for Manual Resistance Exercise 103
 - Techniques of Manual Resistance Exercise for the Extremities:
 - General Background 105
 - The Upper Extremity 105
 - The Lower Extremity 109
- Proprioceptive Neuromuscular Facilitation: Principles and Techniques 113
 - The Diagonal Patterns 113
 - Basic Procedures and Principles Used with PNF Patterns 113
 - Upper Extremity Patterns 115
 - Lower Extremity Patterns 117
 - Specific Techniques Associated with PNF 120
- Mechanical Resistance Exercise 122
 - Definition and Use 122
 - Special Considerations for Children and Older Adults 123
 - Specific Exercise Regimens 124
- Use of Equipment with Resistance Exercise 130
 - Free Weights and Simple Weight-Pulley Systems 130
 - Variable Resistance Machines 133
 - Elastic Resistance 134
 - Equipment for Closed-Chain Training 136
 - Reciprocal Exercise Equipment 137
 - Equipment for Dynamic Stabilization Training 138
 - Isokinetic Testing and Training Equipment 139
- Independent Learning Activities 141
 - Critical Thinking and Discussion 141
 - Laboratory Practice 141

Chapter 4 Principles of Aerobic Exercise 149

Terri M. Glenn, PhD, PT, and Janet A. Mulcare, PhD, FASCM

- Key Terms 150
 - Fitness 150
 - Maximum Oxygen Consumption 150
 - Endurance 150
 - Aerobic Exercise Training (Conditioning) 150
 - Adaptation 151
 - Myocardial Oxygen Consumption 151
 - Deconditioning 152
 - Energy Systems, Energy Expenditure, and Efficiency 152
 - Functional Implications 153
 - Energy Expenditure 153
 - Efficiency 154
- Physiologic Response to Aerobic Exercise 154
 - Cardiovascular Response to Exercise 154
 - Respiratory Response to Exercise 155
 - Responses Providing Additional Oxygen to Muscle 155
- Testing as a Basis for Exercise Programs 155
 - Fitness Testing of Healthy Subjects 156
 - Stress Testing for Convalescing Individuals and Individuals at Risk 156
 - Multistage Testing 157
- Determinants of an Exercise Program 157
 - Intensity 157
 - Duration 159
 - Frequency 159
 - Mode 159
 - The Reversibility Principle 159
- The Exercise Program 160
 - The Warm-Up Period 160
 - The Aerobic Exercise Period 160
 - The Cool-Down Period 161
 - Application 161
- Physiologic Changes that Occur with Training 162
 - Cardiovascular Changes 162
 - Respiratory Changes 162
 - Metabolic Changes 162
 - Other System Changes 163
- Application of Principles of an Aerobic Conditioning Program for the Patient with Coronary Disease 163
 - In-Patient Phase (Phase I) 163
 - Out-Patient Phase (Phase II) 163
 - Out-Patient Program (Phase III) 164
 - Special Considerations 165
 - Adaptive Changes 165
- Applications of Aerobic Training for the Deconditioned Individual and the Patient with Chronic Illness 165
 - Adaptations for Disabilities, Functional Limitations, and Deconditioning 166
 - Impairments, Goals, and Plan of Care 166

- Age Differences 167
 - Children 167
 - Young Adult 168
 - Older Adult 169
- Independent Learning Activities 169
 - Critical Thinking and Discussion 169

Chapter 5 *Stretching* 171

- Definition of Terms Related to Mobility and Stretching 172
 - Flexibility 172
 - Hypomobility 172
 - Contracture 172
 - Types of Contractures 173
 - Interventions to Increase Mobility of Soft Tissues 174
 - Selective Stretching 175
 - Overstretching and Hypermobility 175
- Properties of Soft Tissue that Affect Response to Immobilization and Elongation 175
 - Mechanical Properties of Contractile Tissue 176
 - Neurophysiologic Properties of Contractile Tissue 178
 - Mechanical Characteristics of Noncontractile Soft Tissue 179
- Determinants of Stretching Exercises 183
 - Alignment and Stabilization 183
 - Intensity of Stretch 184
 - Duration of Stretch 184
 - Speed of Stretch 186
 - Frequency of Stretch 186
 - Mode of Stretch 187
 - Neuromuscular Inhibition and Muscle Elongation 189
 - Integration of Function into a Stretching Program 191
- Guidelines for Applications of Stretching Procedures 192
 - Examination and Evaluation of the Patient Prior to Stretching 192
 - Prior to the Initiation of Stretching 193
 - When Applying Manual Stretching Procedures 193
 - Special Considerations for Teaching Self-Stretching Exercises 194
 - Special Considerations for Use of Mechanical Stretching Devices 194
 - After Stretching 194
- Application of Inhibition and Relaxation Procedures 195
 - Neuromuscular Inhibition Techniques: Procedures for Application 195
 - General Relaxation Training 196
 - Additional Adjuncts to Stretching Interventions for Local Relaxation 197
- Precautions 198
 - General Precautions 198
 - Special Precautions for Mass-Market Flexibility Programs 199
- Manual Stretching Techniques Using Anatomic Planes of Motion 200

- The Upper Extremity 200
- The Lower Extremity 205
- The Neck and Trunk 211
- Self-Stretching Techniques 211
- Independent Learning Activities 211
 - Critical Thinking and Discussion 211
 - Laboratory Practice 211

Chapter 6 *Peripheral Joint Mobilization* 216

- Definitions of Terms 216
 - Mobilization/Manipulation 216
 - Self-Mobilization (Automobilization) 216
 - Mobilization with Movement (MWM) 217
 - Physiologic Movements 217
 - Accessory Movements 217
 - Thrust 217
 - Manipulation Under Anesthesia 217
 - Muscle Energy 217
- Basic Concepts of Joint Motion: Arthrokinematics 217
 - Joint Shapes 217
 - Types of Motion 217
 - Passive-Angular Stretching Versus Joint-Glide Stretching 219
 - Other Accessory Motions that Affect the Joint 220
 - Effects of Joint Motion 220
- Indications for Joint Mobilization 221
 - Pain, Muscle Guarding, and Spasm 221
 - Reversible Joint Hypomobility 221
 - Positional Faults/Subluxations 221
 - Progressive Limitation 222
 - Functional Immobility 222
- Limitations of Joint Mobilization Techniques 222
- Contraindications and Precautions 222
 - Hypomobility 222
 - Joint Effusion 222
 - Inflammation 222
 - Conditions Requiring Special Precautions for Stretching 222
- Procedures for Applying Passive Joint Mobilization Techniques 223
 - Examination and Evaluation 223
 - Grades or Dosages of Movement 223
 - Positioning and Stabilization 225
 - Treatment Force and Direction of Movement 225
 - Initiation and Progression of Treatment 226
 - Speed, Rhythm, and Duration of Movements 226
 - Patient Response 227
 - Total Program 227
- Mobilization with Movement, Principles and Procedures 228
 - Principles of MWM in Clinical Practice 228
 - Pain Is Always the Guide 228

Theoretical Framework 228
 Techniques 229
 Peripheral Joint Mobilization Techniques 229
 Shoulder Girdle Complex 229
 The Elbow and Forearm Complex 235
 The Wrist Complex 239
 The Hand and Finger Joints 242
 The Hip Joint 244
 The Knee and Leg 246
 Ankle and Tarsal Joints 251
 Independent Learning Activities 255
 Critical Thinking and Discussion 255
 Laboratory Practice 256

Chapter 7 Aquatic Exercise 257
Robert Schrepfer, MS, PT
 Definition of Aquatic Exercise 257
 Goals and Indications for Aquatic Exercise 257
 Precautions and Contraindications to Aquatic Exercise 258
 Precautions 258
 Contraindications 258
 Properties of Water 258
 Physical Properties of Water 258
 Hydromechanics 259
 Thermodynamics 259
 Center of Buoyancy 260
 Aquatic Temperature and Therapeutic Exercise 260
 Temperature Regulation 260
 Mobility and Functional Control Exercise 261
 Aerobic Conditioning 261
 Special Equipment for Aquatic Exercise 261
 Collars, Rings, Belts, and Vests 261
 Swim Bars 262
 Gloves, Hand Paddles, and Hydro-tone® Bells 262
 Fins and Hydro-tone® Boots 262
 Kickboards 263
 Stretching Exercises 263
 Manual Stretching Techniques 263
 Self-Stretching with Aquatic Equipment 267
 Strengthening Exercises 268
 Manual Resistance Exercises 268
 Independent Strengthening Exercises 274
 Aerobic Conditioning 277
 Treatment Interventions 277
 Physiologic Response to Deep Water Walking/Running 277
 Proper Form for Deep Water Running 278
 Exercise Monitoring 278
 Equipment Selection 278
 Independent Learning Activities 278
 Case Studies 278

PART II

Application of Therapeutic Exercise Techniques to Regions of the Body 283

Chapter 8 Principles of Treating Soft Tissue, Bony, and Postsurgical Conditions 285

Soft Tissue Lesions 285
 Examples of Soft Tissue Lesions 285
 Clinical Conditions Resulting from Trauma or Pathology 286
 Severity of Tissue Injury 286
 Irritability of Tissue: Stages of Inflammation and Repair 287
 Management During the Acute Stage 288
 Tissue Response—Inflammation 288
 Management Guidelines—The Protection Phase 288
 Management During the Subacute Stage 290
 Tissue Response—Repair and Healing 290
 Management Guidelines—The Controlled Motion Phase 291
 Management During the Chronic Stage 293
 Tissue Response—Maturation and Remodeling 293
 Management Guidelines—Return to Function Phase 294
 Cumulative Trauma—Chronic Recurring Pain 296
 Tissue Response—Chronic Inflammation 296
 Etiology of Chronic Inflammation Leading to Prolonged or Recurring Pain 296
 Contributing Factors 297
 Management Guidelines—Chronic Inflammation 297
 Arthritis—Arthrosis 299
 Clinical Signs and Symptoms 299
 Rheumatoid Arthritis (RA) 300
 Osteoarthritis (OA) 302
 Fractures—Post-Traumatic Immobilization 304
 Tissue Response and Management Guidelines—Period of Immobilization 304
 The Postimmobilization Period 305
 Surgery 306
 Guidelines for Preoperative Management 307
 Guidelines for Postoperative Management 307
 Overview of Common Orthopedic Surgical Procedures and Guidelines for Postoperative Management 308
 Independent Learning Activities 316
 Critical Thinking and Discussion 316

Chapter 9 The Shoulder and Shoulder Girdle 319

Review of the Structure and Function of the Shoulder and Shoulder Girdle 319
 Bony Parts: Proximal Humerus, Scapula, and Clavicle 319
 Synovial Joints 319
 Functional Articulations 321
 Shoulder Girdle Function 322

- Referred Pain: Common Sources of Pain in the Shoulder Region 323
- Nerve Injury: Common Sites in the Shoulder Girdle 324
- Joint Hypomobility: Nonoperative Management 324
- Glenohumeral (GH) Joint 324
- Joint Lesions: Acromioclavicular (AC) and Sternoclavicular (SC) Joints 329
- Glenohumeral Joint Surgery and Postoperative Management 330
- Glenohumeral Arthroplasty 331
- Arthrodesis of the Shoulder 335
- Painful Shoulder Syndromes: Rotator Cuff Disease, Impingement Syndromes, and Shoulder Instabilities 335
- Related Diagnoses and Etiology of Symptoms 336
- Common Impairments 338
- Common Functional Limitations/Disabilities 339
- Nonoperative Management: Painful Shoulder Syndromes (Without Dislocation) 340
- Impingement Syndromes: Surgical and Postoperative Management 342
- Rotator Cuff Tears: Surgical and Postoperative Management 345
- Shoulder Dislocations 350
- Related Diagnoses and Mechanisms of Injury 350
- Common Impairments 351
- Common Functional Limitations/Disabilities 351
- Nonoperative Management: Dislocations 351
- Glenohumeral Joint Instabilities: Surgical and Postoperative Management 353
- Thoracic Outlet Syndrome 359
- Related Diagnoses 359
- Etiology of Symptoms 359
- Location of Compression or Entrapment and Tests of Provocation 360
- Restricted Nerve Mobility 360
- Summary of Contributing Factors 360
- Common Impairments 361
- Common Functional Limitations/Disabilities 361
- Nonoperative Management 361
- Reflex Sympathetic Dystrophy 361
- Related Diagnoses and Symptoms 361
- Etiology and Symptoms 362
- Common Impairments 362
- Management 362
- Exercise Techniques for Management During Acute and Early Subacute Stages of Tissue Healing (Protection and Early Controlled Motion Phases of Intervention) 363
- Early Motion of the Glenohumeral Joint 363
- Early Motion of the Scapula 364
- Early Neuromuscular Control 365
- Exercise Techniques to Increase Flexibility and Range of Motion 365
- Self-Stretching Techniques 365
- Manual and Self-Stretching Exercises for Specific Muscles 367
- Exercises to Develop and Improve Muscle Performance and Functional Control 370
- Isometric Exercises 371
- Stabilization Exercises 373
- Dynamic Strengthening—Open- and Closed-Chain 375
- Functional Activities 384
- Independent Learning Activities 385
- Critical Thinking and Discussion 385
- Laboratory Practice 386
- Case Studies 386
- Chapter 10 The Elbow and Forearm Complex 392**
- Review of the Structure and Function of the Elbow and Forearm 392
- Bony Parts: Distal Humerus, Radius, and Ulna 392
- Elbow Joint Characteristics and Arthrokinematics 392
- Forearm Joint Characteristics and Arthrokinematics 392
- Muscle Function at the Elbow and Forearm 394
- Wrist and Hand Muscles 394
- Major Nerves Subject to Pressure and Trauma Around the Elbow 395
- Joint Hypomobility: Nonoperative Management 395
- Related Diagnoses and Etiology of Symptoms 395
- Common Impairments 395
- Common Functional Limitations/Disabilities 396
- Joint Management: Protection Phase 396
- Joint Management: Controlled Motion Phase 396
- Joint Management: Return to Function Phase 398
- Joint Surgery and Postoperative Management 398
- Excision of the Radial Head 399
- Total Elbow Arthroplasty 400
- Myositis Ossificans 403
- Etiology of Symptoms 403
- Management 404
- Overuse Syndromes: Repetitive Trauma Syndromes 404
- Related Diagnoses 404
- Etiology of Symptoms 404
- Common Impairments 405
- Common Functional Limitations/Disabilities 405
- Nonoperative Management of Overuse Syndromes: Protection Phase 405
- Nonoperative Management: Controlled Motion and Return to Function Phases 406
- Exercises Techniques to Increase Flexibility and Range of Motion 407
- Manual, Mechanical, and Self-Stretching Techniques 408

- Self-Stretching Techniques: Muscles of the Medial and Lateral Epicondyles 409
- Exercises to Develop and Improve Muscle Performance and Functional Control 410
 - Isometric Exercises 410
 - Dynamic Strengthening and Endurance 410
 - Functional Patterns—Open- and Closed-Chain Strengthening Exercises 412
- Independent Learning Activities 416
 - Critical Thinking and Discussion 416
 - Laboratory Practice 416
 - Case Studies 416
- Chapter 11 The Wrist and Hand 419**
 - Review of the Structure and Function of the Wrist and Hand 419
 - Bony Parts 419
 - Joints of the Wrist Complex and Their Movements 419
 - Joints of the Hand Complex and Their Movements 421
 - Hand Function 421
 - Hand Control 421
 - Major Nerves Subject to Pressure and Trauma at the Wrist and Hand 423
 - Referred Pain and Sensory Patterns 423
 - Joint Hypomobility: Nonoperative Management 424
 - Related Diagnoses and Etiology of Symptoms 424
 - Common Diagnoses and Impairments 424
 - Common Functional Limitations/Disabilities 425
 - Joint Management: Protection Phase 425
 - Joint Management: Controlled Motion and Return to Function Phases 425
 - Joint Surgery and Postoperative Management 427
 - Radiocarpal Implant Arthroplasty and Total Wrist Replacement 428
 - Metacarpophalangeal (MCP) Implant Arthroplasty 431
 - Proximal Interphalangeal (PIP) Implant Arthroplasty 434
 - Carpometacarpal (CMC) Arthroplasty of the Thumb 436
 - Tendon Rupture Associated with RA: Surgical and Postoperative Management 438
 - Repetitive Trauma Syndromes/Overuse Syndromes 440
 - Carpal Tunnel Syndrome 441
 - Compression in Tunnel of Guyon 443
 - Tenosynovitis, Tendinitis 444
 - Traumatic Lesions in the Hand 444
 - Simple Sprain: Nonoperative Management 444
 - Lacerated Flexor Tendons of the Hand: Surgical and Postoperative Management 445
 - Lacerated Extensor Tendons of the Hand: Surgical and Postoperative Management 452
 - Techniques for Tendon and Muscular Mobility 456
 - Flexor Tendon-Gliding Exercises 456
 - Flexor Tendon-Blocking Exercises 457
 - Extensor Exercises to Reduce Extensor Lag 458
 - Extensor Tendon-Gliding Exercises 458
- Exercise Techniques to Increase Flexibility and Range of Motion 459
 - General Stretching Techniques 459
 - Stretching Techniques of the Intrinsic and Multijoint Muscles 460
 - Techniques to Mobilize Scar Tissue (Adhesions) that Restrict Gliding of Long Finger Flexor Tendons 461
 - Techniques to Mobilize Scar Tissue (Adhesions) that Restrict Gliding of Extensor Tendons and Extensor Mechanism 461
- Exercises to Develop and Improve Muscle Performance, Neuromuscular Control, and Coordinated Movement 462
 - Techniques to Strengthen Muscles of the Wrist and Hand 462
 - Functional Activities 464
- Independent Learning Activities 464
 - Critical Thinking and Discussion 464
 - Laboratory Practice 465
 - Case Studies 465
- Chapter 12 The Hip 469**
 - Review of the Structure and Function of the Hip 469
 - Bony Parts: Proximal Femur and the Pelvis 469
 - Hip Joint 469
 - Functional Relationships of the Hips and Pelvis in the Kinematic Chain 470
 - Balance and Posture Control 473
 - Nerves in the Hip and Buttock Region 473
 - Referred Pain Into the Hip and Buttock Region 473
 - Joint Hypomobility: Nonoperative Management 473
 - Related Diagnoses and Etiology of Symptoms 473
 - Common Impairments 474
 - Common Functional Limitations/Disabilities 474
 - Management: Protection Phase 474
 - Management: Controlled Motion and Return to Function Phases 474
 - Joint Surgery and Postoperative Management 476
 - Total Hip Arthroplasty 476
 - Hemiarthroplasty of the Hip 483
 - Fractures of the Proximal Femur and Postoperative Management 484
 - Background 484
 - Open Reduction and Internal Fixation of Hip Fracture 485
 - Painful Hip Syndromes/Overuse Syndromes: Nonoperative Management 489
 - Related Diagnoses and Etiology of Symptoms 489
 - Common Impairments 489
 - Common Functional Limitations/Disabilities 489
 - Management: Protection Phase 489
 - Management: Controlled Motion Phase 490
 - Management: Return to Function Phase 490

Exercise Techniques to Increase Flexibility and Range of Motion	491
Techniques to Stretch Range-Limiting Hip Structures	491
Techniques to Stretch Range-Limiting Two-Joint Muscles	492
Exercises to Develop and Improve Muscle Performance and Functional Control	495
Nonweight-Bearing Exercises	495
Closed-Chain Weight-Bearing Exercises	497
Independent Learning Activities	502
Critical Thinking and Discussion	502
Laboratory Practice	502
Case Studies	502
Chapter 13 The Knee	506
Review of the Structure and Function of the Knee	506
Bony Parts	506
Knee Joint Complex	506
Knee and Patellar Function	507
Referred Pain and Nerve Injuries	509
Joint Hypomobility: Nonoperative Management	510
Related Diagnoses and Etiology of Symptoms	510
Common Impairments	510
Common Functional Limitations/Disabilities	510
Joint Management: Protection Phase	511
Joint Management: Controlled Motion and Return to Function Phases	511
Joint Surgery and Postoperative Management	514
Synovectomy	514
Total Knee Arthroplasty	517
Patellofemoral Dysfunction: Nonoperative Management	522
Related Diagnoses	522
Etiology of Symptoms	523
Common Impairments	523
Common Functional Limitations/Disabilities	523
Nonoperative Management of Patellofemoral Symptoms: Protection Phase	523
Nonoperative Management of Patellofemoral Symptoms: Controlled Motion and Return to Function	524
Patellofemoral and Extensor Mechanism Surgery and Postoperative Management	526
Lateral Retinacular Release	526
Proximal Realignment of the Extensor Mechanism	529
Distal Realignment of the Extensor Mechanism	531
Ligamentous Injuries	532
Related Diagnoses and Mechanisms of Injury	532
Common Impairments	533
Common Functional Limitations/Disabilities	533
Nonoperative Management: Ligamentous Injuries	533
Reconstruction of Ligamentous Lesions	535
Intra-Articular Anterior Cruciate Ligament Reconstruction	536
Posterior Cruciate Ligament Reconstruction	541

Meniscal Tears	543
Related Diagnoses and Mechanisms of Injury	543
Common Impairments	543
Common Functional Limitations/Disabilities	543
Nonoperative Management	543
Surgical Management of Meniscal Tears	543
Arthroscopic Repair of the Meniscus and Postoperative Management	544
Arthroscopic Partial Meniscectomy and Postoperative Management	545
Exercise Techniques to Increase Flexibility and Range of Motion	546
To Increase Knee Extension	547
To Increase Knee Flexion	547
Exercises to Develop and Improve Muscle Performance and Functional Control	549
Nonweight-Bearing Exercises	550
Weight-Bearing Exercises	553
Techniques to Stimulate Functional Activities, Develop Endurance, Balance, and Progress to Specificity of Training	556
Independent Learning Activities	557
Critical Thinking and Discussion	557
Laboratory Practice	557
Case Studies	557
Chapter 14 The Ankle and Foot	563
Review of the Structure and Function of the Ankle and Foot	563
Bony Parts	563
Motions of the Foot and Ankle	563
Joints and Their Characteristics	564
Functional Relationships of the Ankle and Foot	566
Muscle Function in the Ankle and Foot	566
Major Nerves Subject to Pressure and Trauma	567
Joint Hypomobility: Nonoperative Management	568
Related Diagnoses	568
Common Impairments	568
Common Functional Limitations/Disabilities	569
Management of Joint Hypomobility: Protection Phase	569
Joint Management: Controlled Motion and Return to Function Phases	570
Joint Surgery and Postoperative Management	571
Total Ankle Replacement Arthroplasty	572
Arthrodesis at the Ankle and Foot	573
Overuse Syndromes/Repetitive Trauma Syndromes	574
Related Diagnoses and Etiology of Symptoms	574
Common Impairments	575
Common Functional Limitations/Disabilities	575
Management of Overuse/Repetitive Trauma Syndromes: Protection Phase	575

- Management: Controlled Motion and Return to Function Phases 575
- Traumatic Soft Tissue Injuries 576
 - Sprains and Minor Tears of Ligaments 576
 - Complete Ligament Tears: Surgical Repair and Postoperative Management 577
 - Rupture of the Achilles Tendon: Surgical Repair and Postoperative Management 579
- Exercise Techniques to Increase Flexibility and Range of Motion 581
 - Increase Dorsiflexion of the Ankle 581
 - Increase Inversion 582
 - Increase Ankle Plantarflexion and Eversion 583
 - Increase MTP Flexion and IP Extension 583
 - Stretch the Plantar Fascia of the Foot 583
- Exercises to Develop and Improve Muscle Performance and Functional Control 583
 - Activities for Active Mobility and to Develop Neuromuscular Control 583
 - Open-Chain Strengthening Exercises 584
 - Weight-Bearing Exercises for Strength, Balance, and Function 586
- Independent Learning Activities 587
 - Critical Thinking and Discussion 587
 - Laboratory Practice 587
 - Case Studies 588
- Chapter 15 The Spine and Posture: Structure, Function, and Management Guidelines 591**
 - Review of the Structure and Function of the Spine 592
 - Physiologic Curves 592
 - Functional Components 592
 - Motions of the Spinal Column 592
 - Structure and Function of the Intervertebral Disks 593
 - Inert Structures: Influence on Movement and Stability 593
 - Neuromuscular Function: Dynamic Stabilization 595
 - Posture 598
 - Posture Defined 598
 - The Equilibrium of Posture 598
 - Etiology of Pain in Postural Impairments 599
 - Pain Syndromes Related to Impaired Posture 599
 - Common Faulty Postures: Characteristics and Impairments 600
 - Pelvic and Lumbar Region 600
 - Thoracic Region 602
 - Cervical Region 603
 - Frontal Plane Deviations from Lower Extremity Asymmetries 604
 - Pathology of the Intervertebral Disk 605
 - Injury and Degeneration of the Disk 605
 - Disk Pathologies and Related Conditions 606
 - Signs and Symptoms of Disk Lesions and Fluid Stasis 606
 - Pathomechanical Relationships of the Intervertebral Disk and Facet Joints 608
 - The Three-Joint Complex 608
 - Related Pathologies 609
 - Pathology of the Zygapophyseal (Facet) Joints 609
 - Facet Joint Characteristics 609
 - Common Diagnoses and Impairments from Facet Joint Pathologies 609
 - Pathology of Muscle and Soft Tissue Injuries: Strains, Tears, and Contusions 610
 - General Symptoms from Trauma 610
 - Common Sites of Lumbar Strain 611
 - Common Sites of Cervical Strain 611
 - Postural Strain 611
 - Emotional Stress 611
 - Functional Limitations/Disabilities 611
 - Principles of Management for the Spine and Posture 611
 - Examination and Evaluation 612
 - General Guidelines for Managing Acute Spinal Problems: The Protection Phase 613
 - General Guidelines for Managing Subacute Spinal Problems: The Controlled Motion Phase 615
 - General Guidelines for Managing Chronic Spinal Problems: The Return to Function Phase 616
 - Guidelines for Management of Impairments with an Extension Bias: Intervertebral Disk Lesions, Flexion Injuries, Flexed Postural Dysfunctions, Fluid Stasis 617
 - Principles of Management 617
 - Indications, Precautions, and Contraindications for Interventions Utilizing Extension 618
 - Techniques of Intervention Using an Extension Approach in the Lumbar Spine 618
 - Techniques to Manage a Disk Lesion in the Cervical Spine 621
 - Guidelines for Management of Impairments with a Flexion Bias: Spondylosis, Stenosis, Extension Load Injuries, Swollen Facet Joints 622
 - Principles of Management 622
 - Indications and Contraindications for Intervention Using a Flexion Approach 622
 - Techniques of Intervention Utilizing a Flexion Approach 622
 - Guidelines for Management of Muscle and Soft Tissue Lesions: Strains, Tears, Overuse, and Contusions 624
 - Management During the Acute Stage: Protection Phase 624
 - Management in the Subacute and Chronic Stages of Healing: Controlled Motion and Return to Function Phases 625
 - Guidelines for Management of Impairments with a Nonweight-Bearing Bias 625
 - Management of Acute Symptoms 625
 - Progression 626
 - Management of Selected Conditions 626
 - Torticollis (Wryneck, Cervical Scoliosis) 626
 - Tension Headache/Cervical Headache 626

- Temporomandibular Joint Dysfunction (Syndrome) 627
- Neural Tension Impairments 629
- Independent Learning Activities 633
 - Critical Thinking and Discussion 633
 - Laboratory Practice 633
 - Case Studies 633

Chapter 16 The Spine: Exercise Interventions for the Neck and Trunk 638

- Basic Principles 638
- Kinesthetic Training Procedures 641
 - Early Training/Protection Phase 641
 - Basic Training: Active Control of Posture 642
 - Intermediate to Advanced Training: Habitual Posture Control 644
- Mobility/Flexibility Procedures 644
 - Cervical and Upper Thoracic Region—Stretching Techniques 645
 - Mid- and Lower Thoracic and Lumbar Regions—Stretching Techniques 648
- Muscle Performance: Stabilization Training, Strengthening, Endurance 652
 - Specific Guidelines 652
 - Cervical and Upper Thoracic Regions 654
 - Thoracic and Lumbar Regions 657
- Aerobic Conditioning 667
 - Summary of Aerobic Conditioning Principles 667
 - Common Aerobic Exercises and Effects on the Spine 668
- Stress Relief and Relaxation 669
 - Muscle Relaxation Techniques 669
 - External Postural Support 670
 - Education 670
 - Modalities and Massage 670
- Functional Training 670
 - Early Training—Fundamental Techniques 671
 - Basic Techniques—Preparation for Functional Activities 671
 - Body Mechanics 673
 - Education for Prevention 674
 - Adapt Environment 674
 - Intermediate to Advanced Progression 674
- Independent Learning Activities 675
 - Critical Thinking and Discussion 675
 - Laboratory Practice 675
 - Case Studies 676

PART III Special Areas of Therapeutic Exercise 679

Chapter 17 Principles of Exercise for the Obstetric Patient 681

- Barb Settles Hugel, PT, Carolyn Kisner, MS, PT
- Overview of Pregnancy, Labor, and Delivery 682

- Pregnancy 682
 - Labor 682
- Anatomic and Physiologic Changes of Pregnancy 683
 - Pregnancy Weight Gain 683
 - Organ Systems 684
 - Posture and Balance Changes 685
- Pregnancy-Induced Pathology 685
 - Diastasis Recti 685
 - Low Back and Pelvic Pain 687
 - Varicose Veins 687
 - Pelvic Floor Dysfunction 688
 - Joint Laxity 689
 - Compression Syndromes 689
- Effects of Aerobic Exercise During Pregnancy 690
 - Maternal Response to Aerobic Exercise 690
 - Fetal Response to Maternal Aerobic Exercise 691
- Exercise During Pregnancy and Postpartum 691
 - Guidelines and Precautions for Exercise Instruction 691
 - Recommendations for Fitness Exercise 693
 - Precautions and Contraindications to Exercise 694
 - Critical Areas of Emphasis and Selected Exercise Techniques 694
 - Unsafe Exercises During Pregnancy 699
 - Exercise Critical to the Postpartum Period 700
- Cesarean Childbirth 700
 - Definition 700
 - Significance to Physical Therapists 700
 - Suggested Activities for the Patient with a Cesarean Section 702
- High-Risk Pregnancy 702
 - Definition 702
 - High-Risk Conditions 702
 - Management Guidelines and Precautions for High-Risk Pregnancies 703
- Independent Learning Activities 705
 - Critical Thinking and Discussion 705
 - Laboratory Practice 705
 - Case Studies 705

Chapter 18 Management of Vascular Disorders of the Extremities 708

- Arterial Disorders 709
 - Types of Arterial Disorders 709
 - Clinical Manifestations of Arterial Disorders 709
 - Examination and Evaluation of Arterial Sufficiency 710
 - Management of Acute Arterial Occlusion 712
 - Management of Chronic Arterial Insufficiency 712
 - Special Considerations for a Graded Exercise Program for Patients with Chronic Arterial Insufficiency 713
- Venous Disorders 715
 - Types of Venous Disorders 715
 - Clinical Manifestations of Venous Disorders 715

Examination and Evaluation of Venous Sufficiency 716
 Prevention of Deep Vein Thrombosis 717
 Management of Acute Thrombophlebitis 717
 Management of Chronic Venous Insufficiency and Varicose Veins 717

Lymphatic Disorders 718
 Disorders of the Lymphatic System Leading to Lymphatic Insufficiency 718
 Clinical Manifestations of Lymphatic Disorders 719
 Examination and Evaluation of Lymphatic Function 720
 General Considerations for the Prevention and Management of Lymphedema 720
 Management Guidelines for Lymphatic Disorders 722

Lymphatic Disorders Associated with Treatment of Breast Cancer 722
 Surgical Procedures 723
 Postoperative Impairments Associated with Breast Cancer Treatment 723
 Management after Surgery for Breast Cancer 726

Exercises for the Management of Lymphedema 728
 Background and Rationale 728
 Components of Exercise Regimens for Management of Lymphedema 729
 Guidelines for Lymphatic Drainage Exercises 729
 Selected Exercises for Lymphatic Drainage: Upper and Lower Extremity Sequences 730

Independent Learning Activities 734
 Critical Thinking and Discussion 734
 Laboratory Practice 735
 Case Studies 735

Chapter 19 Management of Pulmonary Conditions 738

Review of Respiratory Structure and Function 738
 The Thorax and Chest Wall: Structure and Function 739
 Muscles of Ventilation 739
 Mechanics of Ventilation 740
 Anatomy and Function of the Respiratory Tracts 741
 The Lungs and Pleurae 743
 Lung Volumes and Capacities 743

Examination 744
 Purpose 744
 Components of the Examination 744

Breathing Exercises and Ventilatory Training 749
 Guidelines for Teaching Breathing Exercises 750
 Diaphragmatic Breathing 750
 Respiratory Resistance Training 752
 Glossopharyngeal Breathing 754
 Pursed-Lip Breathing 754
 Preventing and Relieving Episodes of Dyspnea 755

Exercises to Mobilize the Chest 756

Specific Techniques 757
 Additional Activities 757

Coughing 758
 The Cough Mechanism 758
 The Normal Cough Pump 758
 Factors that Decrease the Effectiveness of the Cough Mechanism and Cough Pump 758
 Teaching an Effective Cough 758
 Additional Means of Facilitating a Cough 759
 Suctioning: Alternative to Cough 760

Postural Drainage 760
 Manual Techniques Used During Postural Drainage Therapy 761
 Postural Drainage Positions 762
 Guidelines for Implementation of Postural Drainage 762
 Modified Postural Drainage 765
 Home Program of Postural Drainage 766

Management of Patients with Chronic Obstructive Pulmonary Disease 766
 Types of Obstructive Pulmonary Disorders 766
 Impairments and Impact on Function 766
 Management of COPD 768

Management of Patients with Restrictive Pulmonary Disorders 768
 Acute and Chronic Causes of Restrictive Pulmonary Disorders 768
 Pathologic Changes in the Pulmonary System 768
 Management: Post-Thoracic Surgery 768

Independent Learning Activities 771
 Critical Thinking and Discussion 771
 Laboratory Practice 771
 Case Studies 772

Appendix A Systematic Musculoskeletal Examination Guidelines 775

History 775
 Systems Review 775
 Tests and Measures 775
 Inspection 775
 Tests of Provocation (Selective Tension) 776
 Palpation 777
 Neurologic Tests 777
 Functional Performance Tests 778
 Additional Tests 778

Appendix B Management Guidelines 781

Chapter 4—General Guidelines for Aerobic Exercise
 Box 4-11 Aerobic Training Program 781
 Box 4-13 Initiating an Aerobic Exercise Program for the Deconditioned Individual and Patient with Chronic Illness 781

Box 4-14 Progression of an Aerobic Training Program 781
Chapter 8—Management Guidelines for Soft Tissue, Bony, and Postsurgical Conditions

Box 8-1 Acute Stage/Protection Phase 782

Box 8-2 Subacute Stage/Controlled Motion Phase 783

Box 8-4 Chronic Stage/Return to Function Phase 784

Box 8-5 Chronic Inflammation/Cumulative Trauma Syndrome 785

Box 8-7 Rheumatoid Arthritis/Active Disease Stage 786

Box 8-8 Osteoarthritis 787

Box 8-9 Postfracture/Period of Immobilization 787

Box 8-10 Postfracture/Postimmobilization 788

Box 8-14 Postoperative Rehabilitation 789

Chapter 15—Management Guidelines for the Spine and Posture

Box 15-5 Acute Spinal Problems/Protection Phase 791

Box 15-6 Subacute Spinal Problems/Controlled Motion Phase 791

Box 15-7 Chronic Spinal Problems/Return to Function Phase 792

Chapter 17—Management Guidelines for the Obstetric Patient

Box 17-2 Pregnancy and Postpartum 793

Box 17-4 Postcesarean Section 794

Box 17-8 High-Risk Pregnancy 794

Chapter 18—Management Guidelines for Vascular Disorders of the Extremities

Box 18-2 Acute Arterial Occlusion 795

Box 18-3 Chronic Arterial Insufficiency 796

Box 18-6 Acute Thrombophlebitis 796

Box 18-7 Chronic Venous Insufficiency and Varicose Veins 797

Box 18-12 Surgery for Breast Cancer 798

Chapter 19—Management Guidelines for Pulmonary Conditions

Box 19-7 Chronic Obstructive Pulmonary Disease (COPD) 800

Box 19-8 Post-Thoracic Surgery 801

Glossary 803

Index 813
