

PREFACE	6
1 INTRODUCTION TO ANTHROPOLOGY	8
1.1 Definition of Anthropology	8
1.2 Classification of Anthropological Sciences	9
1.2.1 General branches of anthropology	11
1.2.2 Biological Anthropology	12
1.2.3 Cultural Anthropology	13
1.2.4 Social Anthropology	13
1.2.5 Branches of Applied Anthropology	14
1.3 Physical Anthropology	15
1.3.1 The Origin and Development of Physical Anthropology	15
1.3.2 Definition of Physical Anthropology	22
2 ANTHROPOMETRY	25
2.1 Introduction to Anthropometry	25
2.2 Standardization of Anthropometric Methods	26
2.3 Anthropometry and the Organic Laws of Physical Growth and Development	27
2.4 Standardized Anthropometry	29
2.5 Indices	31
2.6 Anthropometric Landmarks and Methods of Measurement	32
2.6.1 Anthropometric Landmarks of the Head	32
2.6.1.1 Head measurement method	34
2.6.1.2 Indices of the cephalic dimensions	35
2.6.2 Anthropometric Landmarks of the Trunk and Extremities	38
2.6.2.1 Measurement method for the trunk and extremities	40
2.6.2.2 Definitions of height dimensions	41
2.6.2.3 Definitions of breadth dimensions	42
2.6.2.4 Definitions of girth dimensions	44
2.6.2.5 Indices of the trunk and extremities	46
3 ORGANIZATION OF ANTHROPOLOGICAL RESEARCH	53
3.1 Steps in the Research Process	53
3.2 Anthropological Research	55
3.3 Anthropometric Laboratory	59
3.4 Measurement Principles	61
3.5 Anthropological Surveys in the Czech Republic and Slovakia	62

3.6	The Secular Trend	64
3.6.1	The secular trend in body height and weight in children aged six to 14 years.	68
3.6.2	The secular trend in body height and weight in the adult population in the Czech Republic.	89
3.7	Importance of Anthropological Research	106
4	BODY COMPOSITION	109
4.1	Models of Body Composition	109
4.1.1	Atomic Model.	110
4.1.2	Molecular Model	110
4.1.3	Cellular Model	111
4.1.4	Tissue-Organ Model	112
4.1.5	Whole-Body Model	112
4.2	Methods of Assessing Body Composition Components.	112
4.2.1	Technically Demanding Methods.	113
4.2.2	Technically Undemanding Methods.	115
4.2.2.1	Body Mass Index (BMI)	116
4.2.2.2	Circumferential Measurements	121
4.2.2.3	Skinfold Measurement	124
4.2.2.4	Matiegka's Method.	131
5	BIOTYOLOGY	136
5.1	Concept of Biotypology	136
5.2	Origin and Development of Biotypology	138
5.2.1	French School of Body Typology.	138
5.2.2	Italian School of Body Typology	141
5.2.3	German School of Body Typology.	143
5.2.4	Differential Somatology	145
5.2.5	New Somatotyping Methods.	145
5.3	The Heath-Carter Anthropometric Somatotype	150
6	METHODS OF MONITORING AND EVALUATING PHYSICAL GROWTH AND DEVELOPMENT	159
6.1	Growth (height) Age	161
6.2	Dental Age	169
6.3	Bone age, skeletal age, and skeletal maturation.	172
6.4	Developmental age, sexual age, or sexual maturation	173
6.5	Proportional Age – Biological Proportional Age.	178
6.6	Chronological Age	186
7	THE EVALUATION OF DEVELOPMENT AND PROPORTIONALITY USING Z-SCORE STANDARDIZATION AND PERKAL'S NATURAL INDICES. . .	191
7.1	Z-score.	191
7.2	Perkal's natural indices	194

8 ANTHROPOMETRIC MEASURING TOOLS	196
8.1 A-226 Anthropometer	196
8.2 K-211 Spreading caliper	198
8.3 P-216 Pelvimeter	199
8.4 T-520 Modified thoracometer	200
8.5 V-372 Small height rod	201
8.6 M-222 Sliding caliper	202
8.7 Best II K-501 Caliper	203
8.8 Soft metric tape	204
8.9 Anthropometry kit	205
