<b>1. An introduction to ice environments and their biology</b>	<b>ix</b>
1.1 Introduction	1
1.2 Introduction to functional dynamics and the organisms	1
1.2.1 Community structure and function	2
1.2.2 Organisms	2
1.3 The cryosphere: past and present	2
1.3.1 The last glacial maximum	2
1.3.2 Contemporary fluctuations of glaciers and ice sheets	3
1.3.3 Snowball Earth	3
1.4 Sea ice	4
1.4.1 Nature of sea ice	4
1.4.2 Sea ice communities	5
1.5 Lake ice	5
1.6 Glaciers	6
1.6.1 Ice mass balance zones in glacial ecosystems	6
1.6.2 Hydrological zonation in surface ecosystems	7
1.6.3 Supraglacial lakes	7
1.6.4 Water distribution in subsurface ecosystems	8
1.6.5 Water in subglacial habitats	9
1.6.6 Overview: broad structure and characteristics of glacial ecosystems	9
1.6.7 Life on glaciers	10
1.7 Snow	10
1.7.1 Physical and chemical characteristics	10
1.7.2 Biological activity in snow	11
<b>2. Snow</b>	<b>37</b>
2.1 Snow as an environment	37
2.2 Life on and in snow	37
2.2.1 Snow algae	37
2.2.2 Bacteria in snow	38
2.3 Impact of snow on environments it covers seasonally	39
2.3.1 Activity under the snow	39
2.3.2 Impact of the release of accumulated nutrients in the snow pack at spring melt	40
2.3.3 Variations in snow depth	41

<b>3. Ice surface environments</b>	we consider future black and white illustrations. M. Tranter acknowledges a Leverhulme Fellowship (F/4/BPC/2010/061) during which this book was produced.	<b>47</b>
3.1 Ice shelves		<b>47</b>
3.1.1 Introduction		<b>47</b>
3.1.2 Biology of ice shelf lakes	Earth and Johanna Laybourn-Parry, Bristol Glaciology Centre, University of Bristol	<b>48</b>
3.2 Glaciers and ice sheets		<b>52</b>
3.2.1 Supraglacial habitats	Ben Sherman Alyn Tranter, Bristol Glaciology Centre, University of Bristol	<b>52</b>
3.2.2 Spatial variations in the biota in supraglacial habitats	Andrew Hodson, Department of Geography, University of Southampton	<b>56</b>
3.2.3 Cryoconite		<b>57</b>
3.2.4 Carbon cycling and biological production		<b>64</b>
3.2.5 Other debris habitats, including the ice margin		<b>71</b>
<b>4. Sea and lake ice</b>		<b>73</b>
4.1 Sea ice		<b>73</b>
4.1.1 Introduction		<b>73</b>
4.1.2 Adaptations		<b>77</b>
4.1.3 Community structure and production		<b>78</b>
4.2 Lake ice		<b>92</b>
4.2.1 Introduction		<b>92</b>
4.2.2 Community structure and production		<b>95</b>
<b>5. Subglacial environments</b>		<b>101</b>
5.1 Introduction		<b>101</b>
5.2 Biology of subglacial environments		<b>104</b>
5.2.1 Wet-based glaciers		<b>105</b>
5.2.2 Blood Falls		<b>107</b>
5.3 Life in glacial ice		<b>110</b>
5.4 Subglacial lakes		<b>111</b>
5.5 Lake Vida		<b>117</b>
<b>6. Astrobiology</b>		<b>121</b>
6.1 Introduction		<b>121</b>
6.2 Extraterrestrial cryospheric environments		<b>122</b>
6.2.1 Mars		<b>122</b>
6.2.2 Europa: a Jovian moon		<b>125</b>
6.2.3 Enceladus: a small Saturnian moon		<b>126</b>
6.2.4 Titan: a large Saturnian moon		<b>127</b>
6.3 Weaknesses of terrestrial analogues for extraterrestrial cryospheric environments		<b>128</b>
<b>7. Future directions</b>		<b>129</b>
7.1 Introduction		<b>129</b>
7.2 Priority field sites for future research		<b>130</b>
7.3 Remote sensing development		<b>133</b>
7.4 Sensor technology		<b>135</b>
7.5 Modelling		<b>139</b>
7.6 Molecular biology		<b>140</b>
7.7 Elucidating the evolution of extremophile communities		<b>141</b>
<b>Glossary</b>		<b>143</b>
<b>References</b>		<b>149</b>
<b>Index</b>		<b>173</b>
