

Contents

Acknowledgements vii, Introduction viii

1. Making a Start 1

- The aim of this book 1
- Some essential information 2
- Using this book 4
- Notes on the illustrations 5
- Botanical illustration 9
- Plant names and synonymy 9

2. Introduction to Plant Structure 10

- Introduction to floral structure 10
 - A basic 'conventional' flower 10
 - The perianth 10
 - The reproductive parts 10
 - Variation in floral structure 12
 - Further notes on the gynoecium 16
 - Introduction to the floral structure of Grasses, Sedges and Rushes 17
- Inflorescences—the flower-bearing shoots 18
 - General introduction to inflorescences 18
 - Introduction to the inflorescences of grass-like plants 22
 - Current practice in applying inflorescence terminology 24
- Introduction to vegetative structure 25
 - Roots 26
 - Stems 26
 - Leaves 31
 - Finer details of surfaces, and internal features 34
 - Plant habit and life span 35

3. Nomenclature and Classification 37

- Nomenclature 37
- Classification 39
- The interplay between names and classification 40

4. Family POACEAE (Grasses) 42, Figures 6–102, Plates 1–24

- Grasses in everyday life 43
 - Useful Grasses 43
 - Grasses as weeds 44
- The structure of Grasses 44

Name those grasses

- Grass flowers and associated parts 45
 - Florets 45
 - Spikelets 46
 - Variation in florets and spikelets 48
 - Floret variation 48
 - Spikelet variation 50
 - Floral structure summary : Grasses 53
 - Ornamentation and appendages 54
 - Fruit and dispersal 55
 - The caryopsis 55
 - Dispersal 56
 - Inflorescences 59
 - Vegetative Structure 67
 - The Grass plant 67
 - Culms 68
 - Leaves 68
 - Internal structure of leaves 70
 - Habit and growth 72
 - Classification 74
 - Introduction to some of the main groups of Grasses 78

Subfamily Pooideae 78 <ul style="list-style-type: none">Tribe Stipeae 79Tribe Meliceae 80Tribe Brachypodieae 80Tribe Bromeae 81Tribe Triticeae 81Tribe Aveneae 83Tribe Poeae 84Tribe Hainardieae 84	Subfamily Arundinoideae 91 <ul style="list-style-type: none">Tribe Arundineae 91 Subfamily Danthonioideae 92 <ul style="list-style-type: none">Tribe Danthonieae 92 Subfamily Aristidoideae 94 <ul style="list-style-type: none">Tribe Aristideae 94 Subfamily Chloridoideae 94 <ul style="list-style-type: none">Tribe Triodieae 94Tribe Eragrostideae 95Tribe Cynodonteae 96 Subfamily Panicoideae 97 <ul style="list-style-type: none">Tribe Paspaleae 97Tribe Paniceae 97Tribe Andropogoneae 99
--	---
5. Family CYPERACEAE (Sedges) 281, Figures 103–131, Plates 25–28
 - The structure of Sedges 282
 - Sedge flowers and associated parts 282
 - Flowers 282
 - Spikelets 282
 - Variation in flowers and associated parts 283
 - Flowers 283

Spikelets 284

Compound spikelets 285

Pseudospikelets 285

Alternative floral units 286

Floral structure summary : Sedges 286

Fruit and dispersal 286

Inflorescences 288

Vegetative structure 289

The Sedge plant 289

Underground parts 290

Culms 291

Leaves 291

Internal structure of leaves 292

Classification 292

Subfamily Mapanioideae 293

Tribe Hypolytreae 293

Tribe Chrysitricheae 293

Subfamily Cyperoideae 294

Tribe Scirpeae 294

Tribe Fuireneae 294

Tribe Eleocharideae 294

Tribe Abildgaardieae 295

Tribe Cypereae 295

Tribe Dulichieae 296

Tribe Schoeneae 296

Subfamily Sclerioideae 297

Tribe Cryptangieae 297

Tribe Trilepideae 297

Tribe Sclerieae 297

Tribe Bisboeckelereae 298

Subfamily Caricoideae 298

Tribe Cariceae 298

The genus *Carex* 300

Hybrids 303

Classification within

the genus *Carex* 304

6. Family JUNCACEAE (Rushes) 364, Figures 132–144, Plate 29

Introduction to the genera of Juncaceae 365

Genus *Juncus* 366

Floral structure 366

Inflorescences 367

Vegetative structure 368

Classification 371

Introduction to the subgenera and sections of *Juncus* 371

Genus *Luzula* 374

Floral structure 374

Inflorescences 374

Vegetative structure 375

Classification 375

Introduction to the subgenera and sections of *Luzula* 376

■ Recognising Grasses, Sedges, Rushes and Restios ■ 404

7. Families RESTIONACEAE and CENTROLEPIDACEAE 410

Family RESTIONACEAE (Restios, Rope-rushes and Cordrushes) 410,

Floral structure 410 Figures 145–149, Plates 30, 31

Inflorescences 412

Vegetative structure 414

Classification 415

Introduction to the main groups within Restionaceae 416

Subfamily Sporadanthoideae 416

Subfamily Leptocarpoideae 416

Subfamily Restionoideae 417

Family CENTROLEPIDACEAE 417, Plate 32

Floral structure 417

Inflorescences 418

Vegetative structure 418

Classification 418

Introduction to the genera of Centrolepidaceae 418

8. Family TYPHACEAE (Bulrushes, Cat-tails, Cumbungis, Reedmaces) 430

Floral structure 430

Figures 150, 151

The inflorescence 431

Vegetative structure 432

Alternative interpretations and terminology 432

Classification 433

9. The Process of Identification 438

Equipment 439

Identifying Grasses 439

Identifying Sedges, Rushes and Restios 441

Identifying Bulrushes 444

Botanical keys 444

Traditional dichotomous keys 445

Interactive computer keys 446

Working with keys 447

Keys to the families and most of the genera in Figures 14–151
and Plates 1–32 449

References 464

Symbols, Abbreviations and Contractions 474

Glossary 475

Index 521
