List of case studies	xiii
About the authors	xiv
Preface to the fourth edition	xv
About the online resources	xix
PART I PRINCIPLES AND APPROACHES IN QUALITATIVE HEALTH RESEARCH	
1 Qualitative Methodology in Health Research	3
Chapter summary	3
Introduction	3
What is qualitative research?	7
Qualitative research and 'evidence-based practice'	9
The orientations of qualitative research	12
Where does qualitative research fit?	17
Some assumptions about qualitative research	22
Conclusion	26
Key points	27
Exercise	27
Further resources	27
2 The Role of Theory	29
Chapter summary	29
Introduction	29
Macro theory	34
Middle-range theory	35
Theories of knowledge	40
Conclusion	47
Key points	48
Exercise	48
Further resources	48

3	Developing Qualitative Research Proposals	49
	Chapter summary	49
	Introduction	49
	Research questions	50
	Selecting appropriate study designs	56
	A qualitative approach to design	67
	Writing the research proposal	69
	Sampling strategies	75
	Conclusion	80
	Key points	81
	Exercise	81
	Further resources	81
4	Responsibilities, Ethics and Values	83
	Chapter summary	83
	Introduction	83
	Values in research	84
	Ethical review and codes of practice	88
	Informed consent	89
	Confidentiality	91
	Responsibilities to research participants	93
	Responsibilities to yourself and co-workers	104
	Responsibilities to commissioners and the public	105
	Ethical dilemmas and conflicts	107
	Conclusion	110
	Key points	111
	Exercises	111
	Further resources	112
		113
PART II	GENERATING DATA	
5	In-depth Interviews	115
	Chapter summary	115
	Introduction	115
	The research interview	116
	A word on language	117
	Language and translation	120
	What interviews can and can't do	124
	Asking questions and listening to answers	125
	Context and data	131
	Planning interviews	137
	Using visual methods in interviews	140

Conclusion	144
Key points	145
Exercises	145
Further resources	146
6 Group Interviews and Discussions	147
Chapter summary	147
Introduction	148
An overview of different kinds of groups used in qualitative research	148
Consensus panels	149
Community interviews and participatory methods	150
Focus group discussions	152
Natural groups	152
Advantages of using group interviews	155
Naturalism	158
Limitations	161
Planning group interview studies	163
Conclusion	171
Key points	171
Exercise	172
Further resources	172
7 Observational Methods	173
Chapter summary	173
Introduction	174
Participation and observation	175
Ethnography and medical anthropology	176
Ethnographies of medicine, health and health care	178
Managing fieldwork roles	184
Planning an ethnographic study	187
Rapid ethnographic methods	194
Observation and participation in interviews	199
Non-participant observational methods	201
Conclusion	204
Key points	204
Exercises	205
Further resources	205
8 Using Secondary Sources	206
Chapter summary	206
Introduction	206
Why use existing sources?	207

Public records	210
Personal documents	211
Mass media outputs	213
Research outputs	216
Policy reports	220
Material artefacts	222
Methodological issues in using secondary sources	222
Conclusion	226
Key points	227
Exercises	227
Further resources	227
9 Qualitative Research in a Digital Age	229
Chapter summary	229
Introduction	229
Questions about health, health care and new technology	231
Researching virtual sites	233
Recruitment online: Social media	237
Technology platforms as part of the context of data generation	238
Ethical issues in digital research	241
Dissemination and knowledge exchange	243
Conclusion	244
Key points	244
Exercises	244
Further resources	245
PART III MANAGING AND ANALYSING DATA	247
10 Beginning Data Analysis	249
Chapter summary	249
Introduction	249
Styles of analysis	251
Aims of analysis	253
Data preparation and management	254
Qualitative description	257
Thematic content analysis	258
Framework analysis	268
Reliability and validity	272
Computer aided qualitative analysis	278
Conclusion	282

Key points	283
Exercises	283
Further resources	283
11 Developing Qualitative Analysis	285
Chapter summary	285
Introduction	285
Rigour is not enough	286
Discourse analysis	287
Grounded theory	289
Narrative analysis	296
Beyond talk and text	302
Some strategies for thinking more analytically	303
Generalizability and transferability	307
Conclusion	310
Key points	310
Exercises	311
Further resources	311
PART IV QUALITATIVE RESEARCH IN PRACTICE	313
12 Integrating Methods, Designs and Disciplines	315
Chapter summary	315
Introduction	315
Rationales for mixing methods within qualitative studies	318
Combining qualitative and quantitative designs	321
Qualitative research within evaluative designs	322
Mixed method designs in practice	326
Developing trans-disciplinary research	332
Conclusion	336
Key points	336
Exercise	336
Further resources	337
13 Reading, Appraising and Integrating Qualitative Research	338
Chapter summary	338
Introduction	339
Reading critically	340
Formal critical appraisal for empirical studies	341
Criteria in ethnography	346

Systematic reviews	348
Integrating qualitative findings	352
Meta-ethnography	355
Conclusion	358
Key points	359
Exercise	359
Further resources	359
14 Dissemination: Reaching and Engaging with Audiences	361
Chapter summary	361
Introduction	361
The writing process	362
Writing for different audiences	363
Writing for health journals	364
Writing for social science colleagues	367
Practical issues to consider when writing research reports	370
Disseminating from collaborative projects	373
Communicating with non-specialist audiences	377
Conclusion	382
Key points	383
Exercises	383
Further resources	383
Glossary	385
References	389
Index	410
