<b>1 Introduction</b>	<b>1</b>		
<b>2 The role of the lens in photography</b>	<b>2</b>		
2.1 Imaging	2		
2.2 Recording	2		
2.3 Measurement	2		
2.4 Extension of visual perception	2		
2.5 Self-expression	2		
<b>3 Optical requirements</b>	<b>4</b>		
<b>Optical theory</b>			
<b>4 Light and energy</b>	<b>9</b>		
4.1 Dual nature of light	9		
4.2 Wave nature	9		
4.3 The electromagnetic spectrum	11		
4.3.1 The full spectral range	11		
4.3.2 The visible spectrum	11		
4.3.3 Spectral power distribution	11		
4.3.4 Effect on detectors	12		
4.4 Particle nature	13		
4.5 Photometry	13		
<b>5 Properties of light</b>	<b>15</b>		
5.1 Transmission	15		
5.1.1 Transmittance	15		
5.1.2 Colour transmission	15		
5.1.3 Optical transmission density	16		
5.1.4 Optical path length	16		
5.2 Absorption	16		
5.2.1 Absorption law	16		
5.2.2 Spectrally selective absorption	16		
5.2.3 Heat filters	17		
5.2.4 Black filters	17		
5.3 Reflection	18		
5.3.1 Laws of reflection	18		
5.3.2 Types of reflection	18		
5.3.3 Laser speckle	18		
5.3.4 Reflection from dielectric surfaces	18		
5.3.5 Reflection from metal surfaces	19		
5.4 Refraction	21		
5.4.1 Laws of refraction	21		
5.4.2 Total internal reflection	22		
5.4.3 Snell's window	22		
5.4.4 Displacement	22		
5.4.5 Deviation	23		
5.4.6 Scratch treatment	23		
5.4.7 Double refraction	24		
5.4.8 Graded refractive index	24		
5.5 Dispersion	24		
5.5.1 Wavelength dependence	24		
5.5.2 Dispersion by diffraction	25		
5.6 Scattering	25		
5.6.1 Particle size	25		
5.7 Interference	26		
5.7.1 Conditions for interference	26		
5.7.2 Producing interference	26		
5.7.3 Newton's rings	27		
5.7.4 Fringe visibility	27		
5.8 Diffraction	27		
5.8.1 Fraunhofer diffraction	27		
5.8.2 The diffraction grating	28		
5.8.3 The zone plate	28		
5.8.4 Spatial filtering	28		
5.9 Polarization	29		
5.9.1 Natural light	29		
5.9.2 Polarized light and polarizers	29		
5.9.3 Elliptically polarized light	30		
5.9.4 Circularly polarized light	30		
5.10 Attenuation	31		
5.10.1 Inverse square law of illumination	31		
5.10.2 Lambert's cosine law	32		
<b>6 Image formation by simple optical systems</b>	<b>34</b>		
6.1 Types of images	34		
6.2 The pinhole	34
