CHAPTER 1 Planet Earth: Rocks, Life, and Energy2

The Formation of the Universe 4

Galaxies and Stars 4

The Planets in Our Solar System 5

The Sun 5

Differentiation of the Earth into Layers 5

Why the Earth Heated 6

The Core 8

The Mantle 9

The Crust 9

Relative Abundance of the Elements in the Earth 9

Formation of the Oceans and the Atmosphere 10

Rocks and Minerals 12

Rocks as Natural Resources 13

Ores and Minerals 13

Iron 13

Aluminum 14

Copper 14

Strategic Metals 14

Mineral Reserves 15

The Origin of Life on Earth 15

The Uniqueness of the Earth 16

The Environment 16

Ecosystems 16

Producers and Consumers 16

The Flow of Energy Through Ecosystems 17

What is Energy? 18

Energy Transformations 19

Food Chains and Trophic Levels 20

Energy and Biomass 21

Concentration Units 21

Molarity and Molar Solutions 22

Parts per Million 22

Parts per Billion	23
Nutrient Cycles	25
The Carbon Cycle	25
The Nitrogen Cycle	29
The Oxygen Cycle	32
The Phosphorus Cycle	33
Nature's Cycles in Balance	34
Additional Sources of Information	35
Keywords	35
Questions and Problems	35

CHAPTER 2 Earth's Soil and Agriculture: Feeding the Earth's People 40

Population Growth	42
Population Arithmetic	43
The Development of Modern Agriculture	46
Soil	47
Soil Texture	47
The Inorganic Component	48
Humus: The Organic Component	52
Soil pH	54
Soil Erosion	56
Plant Nutrients	56
Nitrogen	56
Phosphorus	61
Potassium	64
Secondary Nutrients: Calcium, Magnesium, and Sulfur	64
Micronutrients	64
Mixed Fertilizers	65
The Use of Synthetic Inorganic Fertilizers	66
Organic Fertilizers	66
Composting	66
New Varieties of Crop Plants	68
Can We Feed Tomorrow's World?	69
Additional Sources of Information	70
Keywords	70
Questions and Problems	70

CHAPTER 3 The Earth's Atmosphere74

The Major Layers in the Atmosphere	76
Temperature Changes in the Atmosphere	77
Pressure and Density Changes in the Atmosphere	77
Composition of the Atmosphere	78
Energy Balance	80
Electromagnetic Radiation	80
Suspended Particulate Matter	81
Aerosol Particles	83

Anthropogenic Sources of Particulate Matter	86
Residence Times of Particles	88
Control of Particulate Emissions	89
Units Used to Describe Atmospheric Chemistry	90
Parts per Million and Parts per Billion	90
Molecules per Cubic Centimeter	90
Micrograms per Cubic Meter	91
Global Warming and Climate Change	92
The Earth's Heat Balance	92
The Increase in Atmospheric Carbon Dioxide	95
Infrared Adsorption and Molecular Vibrations	97
Residence Time of Atmospheric Gases	97
Water Vapor	99
Carbon Dioxide	99
Methane	101
Nitrous Oxide	102
Chlorofluorocarbons	102
Radiative Forcing	103
Evidence for Global Warming	104
Effects of Global Warming	105
Controlling Global Warming	105
Additional Sources of Information	106
Keywords	106
Questions and Problems	107
CHAPTER 4 Chemistry of the Troposphere	110
Chemical Reactions in the Atmosphere	113
Carbon Dioxide (CO)	113
Sources of CO	113
Effects of CO on Human Health	114
Nitrogen Oxides (NO_x)	115
Sources of NO _x	115
The Fate of Atmospheric NO _x	115
Effects of NO _x on Human Health and the Environment	116
Volatile Organic Compounds (VOCs)	116
The Automobile Four-Cycle Internal Combustion Engine	116
Gasoline Powered Two-Cycle Engines	118
Automobile Pollutants and the Catalytic Converter	120
Sulfur Dioxide (SO₂)	122
Sources of SO ₂	122
The Fate of Atmospheric SO ₂ : Acid Rain	123
Effects of SO ₂ on Human Health and the Environment	125
Methods for Controlling Emission of SO ₂	122
Legislation to Control Emissions of SO ₂	122
Industrial Smog	126
Photochemical Smog	126
Production of Hydroxyl Radicals	127

Reactions of Hydroxyl Radicals with HCs	129
Abstraction of Hydrogen	129
Addition to Double Bonds	130
Secondary Smog-Forming Reactions	131
Ozone: A Pollutant in the Troposphere	132
Temperature Inversions and Smog	132
Regulating Air Pollution	133
Indoor Air Pollution	136
Additional Sources of Information	138
Keywords	138
Questions and Problems	138
CHAPTER 5 Chemistry of the Stratosphere	142
Dobson Unit	143
The Production of Ozone in the Stratosphere	144
Determining the Steady-State Concentration of Ozone	147
Catalytic Destruction of Ozone	149
Hydroxyl Radical Cycle	150
NO Cycle	150
The Chlorine Cycle	151
Null Cycles	153
Depletion of the Protective Ozone Layer in the Stratosphere	154
Effects of Ozone Depletion on Human Health and the Environment	157
Ozone Loss Over the Arctic and the Middle to High Latitudes	158
The Montreal Protocol	158
Alternatives to CFCs	158
Additional Sources of Information	160
Keywords	160
Questions and Problems	160
CHAPTER 6 Analysis of Air and Air Pollutants	164
In Situ Absorption Measurements	166
In Situ Ozone Measurements	168
In Situ Carbon Dioxide Measurements	168
IR Spectrometry	171
Infrared Vibrational Frequencies	173
Remote Measurements of Atmospheric Composition	174
Atmospheric Trace Molecular Spectroscopy	175
Limb Infrared Monitor of the Stratosphere	177
Total Ozone Mapping Spectrometer	178
Light Detection and Ranging	178
Monitoring Automotive Emissions	180
Automobile HCs	181
Automobile NO _x Emissions	183
Automobile CO Emissions	184
Automobile Emissions Sample Handling	186

Monitoring Emissions from Stationary Sources	187
Monitoring SO₂ Emissions	187
Pararosaniline Spectrophotometric Method for the Determination of SO ₂	188
Particulate Emissions	189
Fossil Fuel Combustion	189
Industrial Sources	190
Miscellaneous Sources	190
Monitoring Particulate Emissions	190
High-Volume Sampling	190
Separation of Particles by Size	191
XRF Spectrometry	192
Fly Ash	194
Additional Sources of Information	194
Keywords	195
Questions and Problems	195

CHAPTER 7 Water Resources200

Distribution of Water on the Earth	202
The Composition of Natural Waters	203
The Hydrologic Cycle: Recycling and Purification	204
The Unique Properties of Water	206
The Water Molecule and Hydrogen Bonding	206
Boiling Point and Melting Point	207
Heat Capacity	208
Heat of Fusion and Heat of Vaporization	209
Temperature-Density Relationship	211
Acid-Base Properties	212
Carbon Dioxide in Water	213
Alkalinity	215
Acid Rain	216
The Effects of Acid Rain	216
The Causes of Acid Rain	218
Acid Mine Drainage	220
Water Use and Water Shortages	220
Water Management and Conservation	222
Water Transfer	222
Conservation	223
Potable Water from Wastewater	223
Desalination	224
Additional Sources of Information	226
Keywords	226
Questions and Problems	226

CHAPTER 8 Water Pollution and Water Treatment230

Types of Water Pollutants	232
Point and Nonpoint Sources of Water Pollutants	232

Disease-Causing Agents	232
Oxygen-Consuming Wastes	233
Plant Nutrients	236
Control of Eutrophication	237
Anaerobic Decomposition of Organic Material	237
Oxidation Reduction in Aqueous Systems	237
Electron Activity and pE	238
Measurement of pE	241
Suspended Solids and Sediments	241
Dissolved Solids	242
Thermal Pollution	243
Pollution of Groundwater	243
Sewage Treatment	244
Primary Treatment	244
Secondary Treatment	246
Disinfection with Chlorine	246
Tertiary Treatment	248
Regulation of Water Quality	249
Rivers and Lakes	249
Drinking Water	250
Additional Sources of Information	251
Keywords	252
Questions and Problems	252

CHAPTER 9 Analysis of Water and Wastewater256

Sampling Methods	258
Types of Water Pollutants	259
Disease-Causing Agents	259
Microbiological Tests For Coliform	260
Multiple-Tube Fermentation Technique	260
Membrane Filtration Technique	260
Ortho-Nitrophenyl- β -D-Galactopyranoside Test	261
Oxygen-Consuming Wastes	261
Dissolved Oxygen	261
Total Organic Carbon	262
Biological Oxygen Demand	263
Colorimetric Methods	263
UV-Visible Spectrometer	263
Plant Nutrients	264
Spectrophotometric Determination of Phosphorus	264
Spectrophotometric Determination of Nitrogen	265
Dissolved Solids	266
Conductivity Measurements	266
Electrochemical Sensors	266
Glass pH Electrode	266
Ca ²⁺ -Sensing Ion-Selective Electrodes	267

Alkalinity

- Measuring Acidity of Natural Waters 269
- Measuring Alkalinity of Natural Waters 269
- Comparing Acidity, Alkalinity, and Hardness 269

Ion Chromatography 270

- Ion Exchange 270
- Ion Chromatography Instrument 271
- Separation and Detection of Anions by Ion Chromatography 271

Radioactive Substances 274

Additional Sources of Information 275

Keywords 276

Questions and Problems 276

CHAPTER 10 Fossil Fuels: Our Major Source of Energy280

Energy Use: A Historical Overview 282

- Current Use of Energy 284

Energy and Power 284

Energy from Fuels 284

Petroleum 289

- The Formation of Oil Fields 289
- The Composition of Petroleum 291
- Petroleum Refining 291
- Octane Rating 294
- Oil Shale and Tar Sands 297
- The Petrochemical Industry 298
- Oil Pollution 299

Natural Gas 301

Coal 301

- The Formation of Coal Deposits 301
- The Composition of Coal 302
- Problems with Coal 302
- Coal Gasification 304
- Coal Liquefaction 304

Electricity 306

- Sequestering CO₂ 308

Additional Sources of Information 310

Keywords 310

Questions and Problems 310

CHAPTER 11 Nuclear Power314

The Nature of Natural Radioactivity 316

- Penetrating Power and Speed of the Types of Radiation 316
- Nuclear Stability 317
- Nuclear Reactions 319
- Radioactive Decay Series 319

The Half-Life of Radioisotopes 320

The Harmful Effects of Radiation on Humans	324
Why is Radiation Harmful?	324
Factors Influencing Radiation Damage	324
Detection of Radiation	325
Units of Radiation	326
How Much Radiation is Harmful?	326
Everyday Exposure to Radiation	327
Natural Sources of Radiation	327
Radiation from Human Activities	328
Uses of Radioisotopes	329
Determining the Dates of Archeological and Geological Events	330
Nuclear Fission	332
The Energy Source in Nuclear Fission	333
Fission Reactions	334
The Atomic Bomb	334
Peaceful Uses of Nuclear Fission	335
Nuclear Energy	336
Nuclear Fission Reactors	336
The Nuclear Fuel Cycle	338
Problems with Nuclear Energy	339
Nuclear Breeder Reactors	340
Nuclear Fusion	341
Additional Sources of Information	343
Keywords	343
Questions and Problems	344
CHAPTER 12 Energy Sources for the Future	348
Energy-Efficient Lighting	350
Solar Energy	351
Solar Heating for Homes and Other Buildings	351
Electricity from Solar Thermal Power Collectors	351
Electricity from Photovoltaic Cells	353
Energy from Biomass	355
Burning Biomass	355
Production of Biogas	356
Alcohols from Biomass	356
Wind Power	357
Geothermal Energy	358
Water Power	359
Tidal Power	359
Energy from Hydrogen Gas	360
Fuel Cells	360
Polymer Electrolyte Membrane Fuel Cell	362
Phosphorus Acid Fuel Cell	364
Direct Methanol Fuel Cell	364
Alkaline Fuel Cell	365
Molten Carbonate Fuel Cell	366

Solid Oxide Fuel Cell	367
Regenerative (Reversible) Fuel Cell	368
Clean Cars for the Future	369
Energy Sources for the 21st Century	371
Additional Sources of Information	372
Keywords	372
Questions and Problems	373

CHAPTER 13 Toxicology 376

What is Meant by Toxic?	378
Types and Routes of Exposure	378
Routes of Administration	379
Percutaneous	379
Inhalation	379
Oral	381
Parenteral	383
Dose and Response	383
Testing for Toxicity: The LD ₅₀ Test	384
Excretion of Chemicals from the Body	385
Detoxification of Chemicals by the Liver	385
Oxidation-Reduction Reactions	385
Coupling Reactions	386
Teratogens, Mutagens, and Carcinogens	386
Teratogens	386
Mutagens	388
Carcinogens	388
Chemicals That Cause Cancer	388
The Development of Cancer	390
Nucleic Acids	391
Functions of Nucleic Acids	391
The Primary Structure of Nucleic Acids	392
The Double Helix	393
DNA, Genes, and Chromosomes	394
Cell Replication	395
Protein Synthesis	395
The Genetic Code	400
Mechanisms of DNA Damage	402
Ionizing Radiation	403
Ultraviolet Light	403
Chemicals	403
Alkylation of DNA	404
Ames Test	405
Genetic Tests for Cancer	407
Additional Sources of Information	408
Keywords	409
Questions and Problems	409

CHAPTER 14 Inorganic Metals in the Environment412

Bioaccumulation of Toxic Metals 413

Toxic Metals 415

Atomic Spectroscopy 415

Flame Atomic Absorption Spectroscopy 416

Lead 418

X-Ray Fluorescence 419

Graphite Furnace Atomic Absorption Spectrometry 420

Mercury 422

Cold-Vapor Atomic Absorption Determination of Mercury 423

Cadmium 424

Inductively Coupled Plasma Optical Emission Spectroscopy 425

Arsenic 428

AA Hydride Method for Arsenic 431

Additional Sources of Information 433

Keywords 433

Questions and Problems 434

CHAPTER 15 Organic Chemicals in the Environment440

Polychlorinated Hydrocarbons 443

DDT 443

Dioxin 445

PCBs 446

Persistent, Bioaccumulative, and Toxic Pollutants 449

Octanol/Water Partition Coefficient 451

Sorption on Soils 452

Carbon-Normalized Sorption Coefficient 453

Experimentally Measuring Absorption 455

Henry's Law 456

Using The EPA's PBT Profiler 457

Persistence 457

Bioconcentration 458

Toxicity 458

Analysis of POPs in Environmental Samples 460

Gas Chromatography 460

Analysis of PCBs and PAHs by GC-Mass Spectrometry 465

Mass Spectrometry 466

GC-MS 468

Analysis of Dioxins and Furans by GC-MS 470

References 471

Additional Sources of Information 472

Keywords 472

Questions and Problems 472

CHAPTER 16 Insecticides, Herbicides, and Insect Control478

- Organophosphates 480
- Carbamates 482
- The Transmission of Nerve Impulses 482
- Analysis of Organophosphate Insecticides in Water 484
- GC Using a FPD 484
- Herbicides 485
 - Analysis of Paraquat by HPLC 487
 - HPLC 487
- Problems with Synthetic Pesticides 488
 - The Pesticide Treadmill 489
 - Health Problems 489
- Alternative Methods of Insect Control 490
 - Chemical Communicating Substances 490
 - Pheromones 490
 - Sex Pheromones 491
 - Aggregation and Trail Pheromones 492
 - Juvenile Hormones 494
 - Allomones 495
- Biological Controls 496
- Sterilization 496
- Future Farming: Less Reliance on Agricultural Chemicals 496
- New Varieties of Plant Crops 497
- Can We Feed Tomorrow's World 498
- Additional Sources of Information 499
- Keywords 499
- Questions and Problems 499

CHAPTER 17 Asbestos502

- Silicates 505
- Three-Dimensional Networks and Sheets 505
- Long-Chain Silicates: Asbestos 507
- Amphiboles 508
- Serpentines: Chrysotile 509
- Physical Properties of Asbestos Minerals 510
- Thermal Properties of Asbestos 510
- Chemical Resistance of Asbestos 511
- Asbestos Diseases 511
- Respiratory System 512
- Fiber Drift 512
- Regulation of Asbestos 515
- Analytical Methods That Identify Asbestos Fibers 516
 - Methods to Determine Bulk Asbestos 516
 - Light Microscopy 517
 - Polarized Light Microscopy 517
 - Polarized Light Microscope 518
 - Methods That Determine the Amount of Airborne Asbestos 518

- Air Sampling 519
- PCM 520
- TEM 522
- EDX 524
- Comparing PCM and TEM Measurements 526

- Asbestos Litigation 526
- Additional Sources of Information 527
- Keywords 527
- Questions and Problems 528

CHAPTER 18 The Disposal of Dangerous Wastes534

- Careless Waste Disposal in the Past 536
- Defining Solid Waste 537
- Disposal of Municipal Solid Waste 537
 - MSW and the Law 538
 - Landfills 538
 - Incineration 540
 - Recycling and Resource Recovery 541
 - Source Reduction 541

- The Problem of Hazardous Waste 541**
- RCRA: Regulation of Hazardous Waste 542**
 - What Are Hazardous Wastes? 542
 - Listed Hazardous Wastes 542
 - Characteristic Hazardous Wastes 542
 - Ignitable Wastes 543
 - Corrosive Wastes 543
 - Reactive Wastes 543
 - Toxic Wastes 543

Sources of Hazardous Waste 544

Policy for Management and Disposal of Hazardous Waste 544

Waste Minimization: Process Manipulation, Recycling, and Reuse 545

Conversion of Hazardous Waste to a Less Hazardous or Nonhazardous Form 546

- Incineration and Other Thermal Treatment 546
- Chemical and Physical Treatment 547
- Bioremediation 547

Perpetual Storage of Hazardous Waste 548

- Secured Landfill 548
- Deep-Well Injection 548
- Surface Impoundment 549

EPA Methods for Testing Solid Waste 550

The Unsolved Problem 550

Superfund: Cleaning Hazardous Waste Dumpsites 551

Superfund Analytical Methods 552

Radioactive Waste 552

- Sources of Radioactive Waste 553
- Classification of Nuclear Waste 553

The Legacy from the Past 558
Regulation of Radioactive Waste Disposal 559
 Low-Level Radioactive Wastes 559
 High-Level Radioactive Wastes 561
Technologies for Radioactive Waste Disposal 562
The Post-Cold War Challenge 562
Additional Sources of Information 563
Keywords 563
Questions and Problems 563

APPENDIX A. Solubility Products, K_{sp} 566

APPENDIX B. Dissociation Constants for Acids and Bases in
 Aqueous Solution at 25°C 570

APPENDIX C. Standard Redox Potentials in Aqueous Solutions 572

APPENDIX D. Carbon Compounds: An Introduction to Organic Chemistry 573

APPENDIX E. Answers to Even-Numbered Questions 617
