INFORMAČNÍ STŘEDISKO Přírodovědecké fakulty UNIVERZITY PALACKÉHO V OLOMOUCI
Přír. č. 3134020 324
Sign. C1/083
Knihovna katedry PatF

338/2006

10267

<b>Contributors</b>	<b>ix</b>
<b>1 The Nucleus – An Overview</b>	<b>1</b>
<i>Dean A. Jackson</i>	
1.1 Introduction	1
1.2 The gene expression pathway in mammalian cells	2
1.3 Chromosome structure and DNA loops	9
1.4 Duplicating the genetic code	9
1.5 Nuclear compartmentalization	10
1.6 Nuclear architecture – implications for viral infection	18
1.7 Conclusion	19
References	20
<b>2 The Eukaryotic Cell Cycle</b>	<b>25</b>
<i>Jane V. Harper and Gavin Brooks</i>	
2.1 Introduction	25
2.2 The G <sub>0</sub> /G <sub>1</sub> transition	31
2.3 The G <sub>1</sub> -S transition	32
2.4 S phase	39
2.5 The G <sub>2</sub> -M transition	45
2.6 Mitosis (M-phase)	48
2.7 Cytokinesis	52
2.8 Endoreduplication	53
2.9 Summary and conclusions	53
References	54
<b>3 DNA Viruses and the Nucleus</b>	<b>69</b>
<i>G. Eric Blair and Nicola James</i>	
3.1 Introduction	69
3.2 The structure of the nucleus	70
3.3 DNA viruses and the nucleus	75
3.4 Concluding comments and future directions	81
References	81

<b>4</b>	<b>Retroviruses and the Nucleus</b>	<b>89</b>
	<i>Carlos de Noronha and Warner C. Greene</i>	
4.1	Retroviral structure	91
4.2	The retroviral life cycle	91
4.3	Entering the nucleus	93
4.4	Inside the nucleus	101
4.5	Leaving the nucleus and the cell	113
4.6	Future perspectives	114
	References	114
<b>5</b>	<b>Negative-sense RNA Viruses and the Nucleus</b>	<b>129</b>
	<i>Debra Elton and Paul Digard</i>	
5.1	Introduction	129
5.2	The necessity of a nucleus	132
5.3	Nuclear import machinery	133
5.4	The cellular transcription machinery	135
5.5	Nuclear architecture	140
5.6	Nuclear export	143
5.7	Evasion of innate antiviral responses	147
	References	148
<b>6</b>	<b>Positive-strand RNA Viruses and the Nucleus</b>	<b>161</b>
	<i>Kurt E. Gustin and Peter Sarnow</i>	
6.1	Introduction	161
6.2	Replication of positive-strand RNA viruses in enucleated cells	162
6.3	Localization of viral proteins to the nucleus	163
6.4	Interaction of nuclear factors with viral proteins and nucleic acids	165
6.5	Cytoplasmic accumulation of nuclear proteins during infection	168
6.6	Disruption of nucleo-cytoplasmic trafficking by positive-strand RNA viruses	169
6.7	Advantages provided to the virus by inhibiting nuclear import	172
6.8	Conclusions	175
	References	178
<b>7</b>	<b>Viruses and the Nucleolus</b>	<b>185</b>
	<i>David A. Matthews and Julian A. Hiscox</i>	
7.1	Introduction	185
7.2	Techniques used to examine the nucleolus	191
7.3	Nucleolar localization signals (NoLS)	191
7.4	Viral interactions with the nucleolus	192
7.5	The nucleolus, viruses and autoimmunity	201
7.6	Summary	202
	References	202

<b>8</b>	<b>Virus Interactions with PML Nuclear Bodies</b>	<b>213</b>
	<i>Keith N. Leppard and John Dimmock</i>	
8.1	Introduction	213
8.2	ND10 in uninfected cells	213
8.3	Functions of ND10	217
8.4	ND10 and virus infection	219
8.5	Why do viruses interact with and modify ND10?	232
	References	235
<b>9</b>	<b>Viruses and the Cell Cycle</b>	<b>247</b>
	<i>Crisanto Gutierrez, Brian Dove and Julian A. Hiscox</i>	
9.1	Introduction: an overview of the eukaryotic cell cycle	247
9.2	DNA viruses and the cell cycle	249
9.3	Retroviruses and the cell cycle	254
9.4	RNA viruses and the cell cycle	255
9.5	Viruses, the nucleolus and cell cycle control	259
9.6	Viral interaction with activator protein-1 (AP-1)	259
9.7	Summary	260
	References	262
