

Contents

1	Introduction	6
2	Basic principles and observables	7
2.1	Gravitational field of the Earth	7
2.2	Parametrization of the gravitational field	8
2.3	Geodetic inversion of gravity field parameters	11
2.4	Describing geometry of the gravity field	12
3	Gravity field mapping from space	13
3.1	Satellite-to-satellite tracking in the high-low mode	14
3.2	Satellite-to-satellite tracking in the low-low mode	16
3.3	Satellite gradiometry	17
4	Mathematical models	18
4.1	Inverting data of type GRACE	19
5	New gravity models and their applications	22
5.1	Geodesy	24
5.2	Solid Earth and oceanography	25
6	Conclusions	27
	References	28
	Curriculum vitae	29
