

Contents

0. Opening remarks, 1

1. A chemist's view of group theory, 5

- 1-1. Introduction, 5
- 1-2. Symmetry Operations and Molecules, 6
- 1-3. Groups, 10
- 1-4. Point Groups, 14
- 1-5. Classification of Molecules into Point Groups, 29
- 1-6. Matrix Representation of Symmetry Operations, 35
- 1-7. Characters and Character Tables, 47
- 1-8. Decomposition of Reducible Representations and the Direct Product, 55
 - Additional Problems, 58
 - Related Reading, 61

2. A skirmish with quantum mechanics, 62

- 2-1. Introduction, 62
- 2-2. Light, 62
- 2-3. The Postulates of Quantum Mechanics, 68
- 2-4. Some Simple Illustrations from Quantum Mechanics, 80
 - Related Reading, 92

3. Vibrational spectroscopy, 93

- 3-1. Introduction, 93
- 3-2. Infrared and Raman Spectra, 93
- 3-3. Diatomic Molecules, 100
- 3-4. Transitions between Stationary States, 130
- 3-5. The Normal Modes of Vibration of Polyatomic Molecules, 135

- 3-6. Selection Rules and Polarization, 151
- 3-7. Symmetry Coordinates and Normal Modes, 170
- 3-8. Stretching Mode Analysis, 186
- 3-9. Assignment of Real Spectra, 190
- 3-10. The Resonance Raman Effect, 198
- 3-11. Functional Group Analysis, 201
 - Additional Problems, 217
 - Related Reading, 224

4. *Molecular orbital theory, 225*

- 4-1. Introduction, 225
- 4-2. Atoms, 225
- 4-3. Photoelectron Spectroscopy, 242
- 4-4. The LCAO Molecular Orbital Method, 245
- 4-5. Diatomic Molecules, 253
- 4-6. Polyatomic Molecules, 267
- 4-7. The Hückel Method, 288
- 4-8. Transition Metal Complexes, 299
 - Additional Problems, 302
 - Related Reading, 306

5. *Electronic spectroscopy, 307*

- 5-1. Introduction, 307
- 5-2. Another Look at Molecular Vibrations, 307
- 5-3. Basic Notions, 310
- 5-4. Selection Rules, 330
- 5-5. The Electronic Spectra of Some Diatomic Molecules, 343
- 5-6. The Fate of Absorbed Energy, 357
- 5-7. Single Bonds, Double Bonds, and Lone Pairs, 368
- 5-8. Vibronic Analysis, 381
- 5-9. Transition Metal Complexes, 395
- 5-10. Concluding Remarks, 411
 - Additional Problems, 412
 - Related Reading, 418

Appendices

- A. Character tables, 421
- B. Direct products, 479
- C. Overtones of degenerate vibrations, 492
- D. The shapes of atomic orbitals, 495
- E. Physical constants, 497
- F. Energy conversions, 498
- G. Answers to problems, 499

Index, 543
