

Table of Contents

Volume 1

| | |
|--|-----------|
| 1 Thermodynamic Systems : Definitions ----- | 1 |
| 1.1 Introduction ----- | 1 |
| 1.2 Interactions of Thermodynamic Systems with their Environment ----- | 2 |
| 1.3 System in a State of Equilibrium ----- | 3 |
| 1.4 Thermal reservoir. Heat Source. ----- | 4 |
| 1.5 Diathermal and Adiabatic Enclosures ----- | 4 |
| 1.6 State Function and State Variables. Intensive and Extensive Variables. ----- | 4 |
| 1.6.1 Definitions and Properties ----- | 4 |
| 1.6.2 Isobaric Coefficient of Thermal Expansion. Isothermal Compressibility Coefficient ----- | 6 |
| 1.7 Change of a State Variable as the Result of a Thermodynamic Process ----- | 7 |
| 1.7.1 General Process ----- | 7 |
| 1.7.2 Cyclic Process ----- | 8 |
| 1.7.3 Expansion and Compression of a Gas ----- | 9 |
| 1.7.4 Mathematical Properties of a State Function ----- | 10 |
| 1.8 Reversible and Irreversible Processes ----- | 11 |
| 1.9 Equation of State ----- | 11 |
| 2 Work ----- | 13 |
| 2.1 Introduction ----- | 13 |
| 2.2 Sign Convention ----- | 13 |
| 2.3 Mechanical Work ----- | 14 |
| 2.3.1 Definition ----- | 14 |
| 2.3.2 Work and Volume Change ----- | 15 |
| 2.3.3 Examples ----- | 16 |
| 2.4 Electrical Work ----- | 18 |
| 2.5 Various Forms of Energy ----- | 19 |
| 2.6 Various Expressions for Work ----- | 20 |
| 3 First Law of Thermodynamics ----- | 21 |
| 3.1 Introduction ----- | 21 |
| 3.2 The Joule Experiment ----- | 22 |
| 3.3 Internal Energy. First Law ----- | 22 |
| 3.3.1 General Aspects. Expression of the First Law of Thermodynamics ----- | 22 |
| 3.3.2 Application to a Closed System ----- | 23 |
| 3.4 Internal Energy – A Look at the Molecular Scale ----- | 25 |
| 4 Second Law of Thermodynamics ----- | 27 |
| 4.1 Spontaneous Processes. Illustration at the Molecular Scale ----- | 27 |
| 4.1.1 Spatial rearrangement ----- | 27 |

| | |
|--|-----------|
| 4.1.2 Heat Transfer----- | 28 |
| 4.1.3 A First Glance at Entropy ----- | 29 |
| 4.2 First Formulation of the Second Law----- | 31 |
| 4.3 Carnot Cycle. Heat Engine. Thermodynamic Temperature ----- | 32 |
| 4.3.1 Carnot Cycle. Operation of an Engine ----- | 32 |
| 4.3.2 Reversible Cycles of Two Distinct Systems----- | 33 |
| 4.3.3 Definition of the Thermodynamic Temperature ----- | 34 |
| 4.4 Entropy. Reversible and Irreversible Processes ----- | 35 |
| 4.4.1 Definition ----- | 35 |
| 4.4.2 Entropy is a State Function ----- | 36 |
| 4.4.3 Implications of the Second Law towards Entropy and Spontaneity of Processes ----- | 38 |
| 4.4.4 System in Contact with a Single Thermal Reservoir----- | 41 |
| 4.4.5 System in Contact with Several Thermal Reservoirs ----- | 42 |
| 4.4.6 Other Formulations of the Second Law. Equilibrium Condition ----- | 43 |
| 4.4.7 Thermal Equilibrium----- | 43 |
| 4.4.8 Differential Expression for the Internal Energy of a Closed System ----- | 45 |
| 4.4.9 Maximum Usable Work during a Process ----- | 46 |
| 4.4.10 Entropy Change during a Monothermal Expansion of an Ideal Gas ----- | 47 |
| 4.5 Carnot Cycle of an Ideal Gas ----- | 50 |
| 4.5.1 Isothermal (Reversible) Process of an Ideal Gas ----- | 50 |
| 4.5.2 Reversible Adiabatic Process of an Ideal Gas ----- | 51 |
| 4.5.3 Properties of the Cycle----- | 52 |
| 4.6 Heat Engines, Refrigerators, Heat Pumps----- | 55 |
| 4.6.1 Thermal Machines ----- | 55 |
| 4.6.2 Efficiency of an Engine ----- | 55 |
| 4.6.3 Refrigerator, Air Conditioner, Heat Pump ----- | 56 |
| 4.7 Internal Combustion Engine ----- | 58 |
| 4.7.1 The Otto Cycle or Beau de Rochas Cycle----- | 58 |
| 4.7.2 Efficiency of an Engine ----- | 59 |
| 4.8 Other Examples----- | 60 |
| 4.8.1 Stirling Cycle ----- | 60 |
| 4.8.2 Joule Cycle ----- | 63 |
| 5 Auxiliary Functions : Enthalpy, Helmholtz Energy, Gibbs Energy----- | 65 |
| 5.1 Introduction ----- | 65 |
| 5.2 Closed Systems ----- | 66 |
| 5.2.1 Constant Volume Process (Isochoric Process) ----- | 66 |
| 5.2.2 Constant Pressure Process (Isobaric Process) ----- | 67 |
| 5.3 Characteristic Variables. Fundamental Equations. Open Systems ----- | 68 |

| | | |
|----------|---|------------|
| 5.3.1 | Generalities | 68 |
| 5.3.2 | Internal Energy | 69 |
| 5.3.3 | Enthalpy | 70 |
| 5.3.4 | Helmholtz Function (Helmholtz Energy, Free Energy) | 70 |
| 5.3.5 | Gibbs Function (Gibbs Energy, Free Enthalpy) | 71 |
| 5.3.6 | Chemical Potential. Summary | 72 |
| 5.4 | Maxwell's Relations | 73 |
| 5.5 | Thermodynamic Equation of State | 75 |
| 5.5.1 | General Case | 75 |
| 5.5.2 | Equation of State for an Ideal Gas | 77 |
| 5.6 | Properties of C_p and C_V | 78 |
| 5.6.1 | Relation between C_p and C_V | 78 |
| 5.6.2 | Variation of C_V with Volume and of C_p with Pressure | 80 |
| 5.7 | Physical Meaning of the Auxiliary Functions | 81 |
| 5.7.1 | Helmholtz Function (Free Energy, Helmholtz Energy) | 81 |
| 5.7.2 | Gibbs Function (Gibbs Energy, Free Enthalpy) | 84 |
| 5.7.3 | Spontaneous Evolution of a System. Equilibrium Condition | 86 |
| 6 | Pure Substances and Mixtures : Molar Quantities and Partial Molar Quantities | 89 |
| 6.1 | Homogeneous Functions and their Properties | 89 |
| 6.2 | Extensive Variables : Essential Property | 90 |
| 6.3 | Intensive Variables | 91 |
| 6.4 | Explicit Expressions for Various Extensive Variables | 93 |
| 6.5 | Gibbs-Duhem Equation | 95 |
| 6.6 | Partial Molar Quantities | 96 |
| 6.6.1 | Definition | 96 |
| 6.6.2 | Relation between Partial Molar Quantities | 97 |
| 6.6.3 | Pure Substance | 98 |
| 6.6.4 | Other Relations | 98 |
| 6.7 | Measurement of Partial Molar Volumes | 100 |
| 7 | Thermodynamics of Gases | 105 |
| 7.1 | Pure Ideal Gas | 105 |
| 7.1.1 | Chemical Potential of a Pure Ideal Gas | 105 |
| 7.1.2 | Selection of the Standard State Pressure | 106 |
| 7.1.3 | Mathematical Expressions of other Thermodynamic Functions of Ideal Gases | 106 |
| 7.1.4 | Entropy Change of an Ideal Gas due to a Change of State | 107 |
| 7.2 | Mixtures of Ideal Gases | 108 |
| 7.2.1 | Basic Properties, Ideal Gas Mixture | 108 |
| 7.2.2 | Entropy of Mixing, Gibbs and Helmholtz Energy of Mixing of Two Ideal Gases Forming an Ideal Gas Mixture | 110 |

| | |
|---|------------|
| 7.2.3 Irreversible Mixing of Two Ideal Gases ----- | 113 |
| 7.2.4 Chemical Potential of an Ideal Gas in an Ideal Gas Mixture of Two Gases ----- | 113 |
| 7.2.5 Several Gases, Partial Molar Quantities, Functions of Mixing----- | 114 |
| 7.3 Pure Real Gases----- | 116 |
| 7.3.1 Molecular Interactions in Real Gases ----- | 116 |
| 7.3.2 Chemical Potential of a Pure Real Gas----- | 118 |
| 7.3.3 Fugacity Coefficient of a Pure Real Gas ----- | 119 |
| 7.3.4 The Virial Equation----- | 119 |
| 7.3.5 The van der Waals Equation of State----- | 120 |
| 7.3.6 Joule-Thomson Effect----- | 124 |
| 7.4 Mixtures of Real Gases----- | 127 |
| 7.4.1 Chemical Potential of a Real Gas in a Mixture----- | 127 |
| 7.4.2 Variables of Mixing for Real Gases ----- | 128 |
| 7.5 Ideal Mixtures of Gases----- | 130 |
| 7.5.1 General Remarks ----- | 130 |
| 7.5.2 The Lewis-Randall Rule ----- | 132 |
| 8 Systems Made up of Several Phases with No Chemical Reaction ----- | 133 |
| 8.1 Introduction ----- | 133 |
| 8.2 Differential Expressions of State Functions ----- | 134 |
| 8.2.1 Fundamental Relations ----- | 134 |
| 8.2.2 Chemical Potentials at Equilibrium ----- | 135 |
| 8.2.3 General Expressions for Open Systems----- | 136 |
| 8.3 Spontaneous Transfer of a Species from One Phase to Another ----- | 137 |
| 8.4 The Phase Rule----- | 138 |
| 8.5 Equilibrium of Two Phases of a Pure Substance ----- | 139 |
| 8.5.1 The Clapeyron Equation ----- | 139 |
| 8.5.2 Equilibrium between a Gaseous Phase and a Condensed Phase (Liquid or Solid) of a Pure Substance ----- | 141 |
| 8.5.3 Schematic Representation of some of the Thermodynamic Functions in the Vicinity of a Phase Change ----- | 142 |
| 8.5.4 Effect of an Inert Gas on the Vapor Pressure of a Pure Substance----- | 144 |
| 8.5.5 Effect of Temperature on the Latent Heat of Phase Change and on the Equilibrium Pressure----- | 145 |
| 8.6 Phase Diagram of a Pure Substance ----- | 146 |
| 8.6.1 The Solid Exists in only One Crystalline Form ----- | 146 |
| 8.6.2 The Solid May Exist in Several Crystalline Forms ----- | 150 |
| Problems and Solutions Chapters 1 through 8----- | 153 |
| Index | |

Volume 2

| | |
|---|------------|
| 9 Energetics of Chemical Reactions ----- | 271 |
| 9.1 Introduction ----- | 271 |
| 9.2 The Extent of Reaction ----- | 272 |
| 9.3 Variables of Reaction ----- | 273 |
| 9.3.1 Gibbs Energy of Reaction (Free Enthalpy of Reaction) ----- | 273 |
| 9.3.2 Spontaneous Reaction. Equilibrium ----- | 274 |
| 9.3.3 Systems where Several Reactions can Take Place Simultaneously ----- | 274 |
| 9.3.4 Other Variables of Reaction ----- | 276 |
| 9.3.5 Standard Variables of Reaction ----- | 276 |
| 9.3.6 Standard Variables of Formation ----- | 278 |
| 9.4 Hess's Law ----- | 280 |
| 9.4.1 Content ----- | 280 |
| 9.4.2 Application ----- | 280 |
| 9.4.3 Generalization ----- | 282 |
| 9.4.4 Example ----- | 282 |
| 9.5 Kirchoff's Equation ----- | 284 |
| 9.6 Effect of Temperature on the Entropy of Reaction and the Gibbs Energy of Reaction ----- | 286 |
| 9.7 Conversion of Chemical Energy into Work ----- | 288 |
| 9.7.1 Any Form of Work ----- | 288 |
| 9.7.2 Work other than Work due to Volume Change ----- | 289 |
| 9.7.3 Batteries ----- | 290 |
| 9.7.4 Lead Storage Battery ----- | 291 |
| 9.8 Effect of the Choice of the Standard State Pressure on the Tabulated Thermodynamic Values ----- | 293 |
| 9.8.1 Justification of the Choice ----- | 293 |
| 9.8.2 Useful Relations ----- | 294 |
| 9.8.3 Ideal Gases ----- | 294 |
| 9.8.4 Real Gases ----- | 296 |
| 9.8.5 Condensed Phase ----- | 296 |
| 9.8.6 System with one Gas Phase and Several Condensed Phases ----- | 296 |
| 9.9 Variables of Combustion ----- | 297 |
| 10 Chemical Equilibria ----- | 299 |
| 10.1 Introduction ----- | 299 |
| 10.2 Spontaneous Reaction and Equilibrium Condition ----- | 299 |
| 10.3 Change in $G(\xi)$ with the Extent of Reaction ----- | 300 |
| 10.3.1 General Expression for a Mixture of Reacting Ideal Gases ----- | 300 |
| 10.3.2 Schematic Representation ----- | 302 |
| 10.4 Affinity ----- | 303 |
| 10.5 Law of Mass Action for a Mixture of Gases ----- | 304 |
| 10.5.1 General Case ----- | 304 |

| | |
|--|------------|
| 10.5.2 Other Forms of the Law of Mass Action ----- | 305 |
| 10.6 Chemical Equilibrium in the Presence of Pure Condensed Phases----- | 307 |
| 10.6.1 Chemical Potential of a Pure Condensed Phase. Activity----- | 307 |
| 10.6.2 Law of Mass Action for Heterogeneous Systems----- | 308 |
| 10.7 Independent Reactions ----- | 310 |
| 10.7.1 General Remarks ----- | 310 |
| 10.7.2 Number and Nature of Independent Reactions----- | 311 |
| 10.7.3 Verifying the Independence of Reactions ----- | 315 |
| 10.7.4 Consequences on Equilibrium and the Law of Mass Action ----- | 317 |
| 10.8 Phase Rule for Systems with Chemical Reactions ----- | 317 |
| 10.8.1 Demonstration ----- | 317 |
| 10.8.2 Examples of the Use of the Phase Rule----- | 318 |
| 10.9 Effect of Temperature on the Equilibrium Constant ----- | 319 |
| 10.10 Displacement Laws of Equilibria----- | 321 |
| 10.10.1 Effect of Temperature ----- | 321 |
| 10.10.2 Effect of Pressure ----- | 322 |
| 10.10.3 Effect of Volume----- | 323 |
| 10.10.4 Effect of the Addition of an Inert Gas----- | 323 |
| 10.10.5 Effect of an Excess in One of the Reacting Species at Constant Pressure----- | 324 |
| 10.11 Reduction of Iron Oxides----- | 327 |
| 10.11.1 Introduction and Method ----- | 327 |
| 10.11.2 Reduction by Carbon Monoxide ----- | 328 |
| 10.11.3 Reduction by Hydrogen----- | 333 |
| 11 Thermodynamics of Perfect and Ideal Solutions ----- | 337 |
| 11.1 Introduction----- | 337 |
| 11.2 Perfect Solution----- | 340 |
| 11.2.1 Isothermal Diagram----- | 340 |
| 11.2.2 Isobaric Representation ----- | 342 |
| 11.3 Mixing Properties of Ideal Solutions ----- | 343 |
| 11.4 Effect of Pressure and Temperature on Liquid Vapor Equilibria ----- | 344 |
| 11.5 Depression of the Freezing Temperature of a Solvent in the Presence of a Solute----- | 345 |
| 11.6 Elevation of the Boiling Temperature of a Solvent in the Presence of a Solute ----- | 347 |
| 11.7 Osmotic Pressure ----- | 348 |
| 12 Thermodynamics of Non Ideal Solutions ----- | 351 |
| 12.1 Introduction ----- | 351 |
| 12.2 Variables and Excess Variables of Mixing----- | 352 |
| 12.3 Effect of Temperature and Pressure on the Activity Coefficient----- | 353 |

| | |
|--|------------|
| 12.4 Standard State – Convention I for the Activity Coefficient ----- | 354 |
| 12.5 Applications of the Gibbs–Duhem Equation ----- | 356 |
| 12.5.1 Relation between Activity Coefficients in Binary Systems ----- | 356 |
| 12.5.2 Equilibrium Shift. Azeotropy ----- | 357 |
| 12.6 Isothermal Diagram ----- | 360 |
| 12.7 Isobaric Diagram ----- | 361 |
| 12.8 Standard State – Convention II for the Activity Coefficient ----- | 362 |
| 12.9 Liquid – Liquid Extraction ----- | 366 |
| 12.10 Other Composition Scales and Standard States ----- | 367 |
| 12.10.1 Molality ----- | 367 |
| 12.10.2 Concentration ----- | 369 |
| 12.11 Law of Mass Action for Liquid Phase Systems ----- | 369 |
| 12.12 Electrolytes ----- | 371 |
| 12.12.1 General Considerations ----- | 371 |
| 12.12.2 Chemical Potential of Ions in Solution ----- | 372 |
| 12.12.3 Dissociation Equilibrium ----- | 373 |
| 12.12.4 Hydrogen Ion Convention for Aqueous Solutions ----- | 374 |
| 12.12.5 Electrode Potential ----- | 376 |
| 13 Statistical Mechanics ----- | 377 |
| 13.1 Introduction ----- | 377 |
| 13.2 Statistical Models ----- | 379 |
| 13.2.1 Maxwell–Boltzmann Statistics ----- | 379 |
| 13.2.2 Bose–Einstein Statistics ----- | 380 |
| 13.2.3 Fermi–Dirac Statistics ----- | 381 |
| 13.2.4 Illustration of the Different Statistics in a Simple Case ----- | 381 |
| 13.2.5 Dilute Systems. Corrected Boltzons ----- | 382 |
| 13.3 Stirling’s Approximations ----- | 383 |
| 13.4 Microcanonical Ensemble ----- | 384 |
| 13.5 Thermodynamic Functions for a System of Corrected Boltzons ----- | 386 |
| 13.6 A Simple System ----- | 388 |
| 13.6.1 Energy Levels for a Particle in a Box ----- | 388 |
| 13.6.2 Expression for the Partition Function ----- | 389 |
| 13.6.3 Expressions for the Thermodynamic Functions ----- | 390 |
| 13.7 Internal Degrees of Freedom ----- | 391 |
| 13.8 Microcanonical Partition Functions ----- | 392 |
| 13.8.1 Translational Partition Function ----- | 392 |
| 13.8.2 Vibrational Partition Function ----- | 392 |
| 13.8.3 Rotational Partition Function for Diatomic Molecules ----- | 394 |
| 13.8.4 Rotational Partition Function for Polyatomic Molecules ----- | 395 |
| 13.8.5 Electronic Partition Function ----- | 395 |

| | |
|---|------------|
| 13.9 Canonical Ensemble----- | 396 |
| 13.10 Canonical Partition Function for Independent Particles ----- | 400 |
| 13.10.1 Independent Distinguishable Particles ----- | 400 |
| 13.10.2 Independent Indistinguishable Particles ----- | 401 |
| 13.11 Heat Capacities of a Crystal ----- | 401 |
| 13.11.1 Introduction ----- | 401 |
| 13.11.2 Einstein Model ----- | 401 |
| 13.11.3 Debye Model ----- | 403 |
| 13.12 Evaluation of Entropies----- | 405 |
| 13.13 Third Law of Thermodynamics----- | 406 |
| 13.14 Implications of the Third Law ----- | 407 |
| 13.14.1 Heat Capacities ----- | 407 |
| 13.14.2 Effect of Pressure and Volume on Entropy at 0 K----- | 407 |
| 13.14.3 Helmholtz Energy and Gibbs Energy at 0 K ----- | 407 |
| 13.14.4 Agreement with Statistical Thermodynamics ----- | 408 |
| Problems and Solutions Chapters 9 through 13 ----- | 409 |
| Appendix ----- | 535 |
| A.1 Legendre Transform ----- | 535 |
| A.1.1 Mathematical Considerations ----- | 535 |
| A.1.2 Application to Thermodynamic Functions ----- | 536 |
| A.2 Lagrange Multipliers ----- | 537 |
| A.2.1 Single Constraint ----- | 537 |
| A.2.2 Multiple Constraints ----- | 538 |
| Bibliography----- | 541 |
| Textbooks----- | 541 |
| Handbooks and Tables----- | 542 |
| Articles ----- | 542 |
| Index | |
