Preface	xiii
---------------	------

INTRODUCTION

1. Quantum Catalysis: The Modeling of Catalytic Transition States.....	2
Michael B. Hall, Peter Margl, Gabor Náray-Szabó, Vern L. Schramm, Donald G. Truhlar, Rutger A. van Santen, Arieh Warshel, and Jerry L. Whitten	

GENERAL AND COMPARATIVE STUDIES

2. Performance of Density Functionals for Transition States.....	20
D. R. Salahub, S. Chrétien, A. Milet, and E. I. Proynov	
3. Transition State Modeling of Asymmetric Epoxidation Catalysts.....	33
K. N. Houk, Jian Liu, and Thomas Strassner	
4. Transition States in Catalysis and Biochemistry.....	49
Margareta R. A. Blomberg and Per E. M. Siegbahn	
5. Enzymes, Abzymes, Chemzymes—Theozymes?.....	61
Claudia Müller, Li-Hsing Wang, and Hendrik Zipse	
6. Solvent as Catalyst: Computational Studies of Organic Reactions in Solution	74
Dongchul Lim, Corky Jenson, Matthew P. Repasky, and William L. Jorgensen	

ORGANOMETALLIC CATALYSTS

7. Molecular Reaction Modeling from Ab-Initio Molecular Dynamics	88
Peter E. Blöchl, Hans Martin Senn, and Antonio Togni	
8. Transition States for Proton Transfer Reactions in Late Transition Metal Chemistry and Catalysis: σ-Bond Metathesis Pathways.....	100
A. Dedieu, F. Hutschka, and A. Milet	

- 9. Reaction Mechanisms of Transition Metal Catalyzed Processes114**
 Christian Boehme, Stefan Dapprich, Dirk Deubel, Ulrich Pidun,
 Martin Stahl, Ralf Stegmann, and Gernot Frenking
- 10. Catalysis of the Hydrosilation and Bis-Silylation Reactions.....128**
 Brett M. Bode, Farhang Raaii, and Mark S. Gordon
- 11. Theoretical Studies of Inorganic and Organometallic Reaction
 Mechanisms 13: Methane, Ethylene, and Acetylene Activation
 at a Cationic Iridium Center138**
 Shuqiang Niu, Douglas L. Strout, Snežana Zarić, Craig A. Bayse,
 and Michael B. Hall
- 12. Transition States for Oxidative Addition to Three-Coordinate Ir (I):
 H–H, C–H, C–C, and C–F Bond Activation Processes151**
 Karsten Krogh-Jespersen and Alan S. Goldman
- 13. Molecular Mechanics as a Predictive Tool in Asymmetric Catalysis.....163**
 Per-Ola Norrby
- 14. Combined QM/MM and Ab Initio Molecular Dynamics Modeling
 of Homogeneous Catalysis173**
 T. K. Woo, P. M. Margl, L. Deng, L. Cavallo, and T. Ziegler
- 15. Theoretical Study of the Mechanism and Stereochemistry
 of Molybdenum Alkylidene Catalyzed Ring-Opening Metathesis
 Polymerization.....187**
 Yun-Dong Wu and Zhi-Hui Peng
- 16. Theoretical Studies of the N₂ Cleavage by Three-Coordinate
 Group 6 Complexes ML₃.....198**
 Djamaladdin G. Musaev, Qiang Cui, Mats Svensson, and
 Keiji Morokuma
- 17. Ethylene Polymerization by Zirconocene Catalysis.....208**
 P. K. Das, D. W. Dockter, D. R. Fahey, D. E. Lauffer,
 G. D. Hawkins, J. Li, T. Zhu, C. J. Cramer, Donald G. Truhlar,
 S. Dapprich, R. D. J. Froese, M. C. Holthausen, Z. Liu, K. Mogi,
 S. Vyboishchikov, D. G. Musaev, and K. Morokuma

METALS AND METALLOIDS AS CATALYSTS

- 18. Modeling Transition States for Selective Catalytic Hydrogenation
 Paths on Transition Metal Surfaces226**
 Matthew Neurock and Venkataraman Pallassana

19. **Dissociation of N₂, NO, and CO on Transition Metal Surfaces**245
M. Mavrikakis, L. B. Hansen, J. J. Mortensen, B. Hammer, and
J. K. Nørskov
20. **A Theoretical Study of the Mechanism of the Adsorptive
Decomposition of Nitrous Oxide on Copper**259
Peter Wolohan, William J. Welsh, Robert Mark Friedman, and
Jerry R. Ebner
21. **Theoretical Studies of Ethyl to Ethylene Conversion
on Nickel and Platinum**274
J. L. Whitten and H. Yang
22. **Electrostatic Stabilization of the Transition-State by a Solid
Catalyst: Dissociative Chemisorption of NH₃ on the Stepped
Si(111) Surface**.....286
Krisztina Kádas and Gábor Náray-Szabó

CATALYSIS BY METAL OXIDES AND ZEOLITES

23. **Kinetic Theory and Transition State Simulation of Dynamics
in Zeolites**.....296
Chandra Saravanan, Fabien Jousse, and Scott M. Auerbach
24. **Alkylation and Transalkylation Reactions of Aromatics**307
S. R. Blaszkowski and R. A. van Santen
25. **Density Functional Study on the Transition State of Methane
Activation over Ion-Exchanged ZSM-5**321
Yusuke Ueda, Hirotaka Tsuruya, Tomonori Kanougi, Yasunori Oumi,
Momoji Kubo, Abhijit Chatterjee, Kazuo Teraishi, Ewa Broclawik,
and Akira Miyamoto
26. **First Principles Study of the Activation of Methane on Defects
of Heteropolyanion Structures: A Simple Way to Model
Oxide Surfaces**.....333
J.-F. Paul and M. Fournier
27. **Determination of Transition State Structures Using Large Scale
Ab-Initio Techniques**.....346
E. Sandré, M. C. Payne, I. Stich, and J. D. Gale
28. **Acidic Catalysis by Zeolites: Ab Initio Modeling
of Transition Structures**358
Joachim Sauer, Marek Sierka, and Frank Haase

Enzymatic Reactions

29. **Molecular Dynamics Simulations of Substrate Dephosphorylation by Low Molecular Weight Protein Tyrosine Phosphatase**.....370
Karin Kolmodin, Tomas Hansson, Jonas Danielsson, and Johan Åqvist
30. **Transition States in the Reaction Catalyzed by Malate Dehydrogenase**384
Mark A. Cunningham and Paul A. Bash
31. **Modelling of Transition States in Condensed Phase Reactivity Studies**.....401
Neil A. Burton, Martin J. Harrison, Ian H. Hillier, Nicholas R. Jones, Duangkamol Tantanak, and Mark A. Vincent
32. **Transition States for *N*-Acetylneuramic Acid Glycosyltransfer: Catalysis via a Transition State Hydrogen Bond**.....411
Benjamin A. Horenstein
33. **Molecular Dynamics and Quantum Chemical Study of Endonuclease V Catalytic Mechanism**424
M. Krauss, N. Luo, R. Nirmala, and R. Osman
34. **Charge Transfer Interactions in Biology: A New View of the Protein–Water Interface**439
Gautham Nadig, Laura C. Van Zant, Steve L. Dixon, and Kenneth M. Merz, Jr.
35. **Modeling the Citrate Synthase Reaction: QM/MM and Small Model Calculations**448
Adrian J. Mulholland and W. Graham Richards
36. **Isotope Effects on the ATCase-Catalyzed Reaction**.....462
J. Pawlak, M. H. O’Leary, and P. Paneth
37. **Enzymatic Transition State Structures Constrained by Experimental Kinetic Isotope Effects: Experimental Measurement of Transition State Variability**473
Paul J. Berti and Vern L. Schramm
38. **Energetics and Dynamics of Transition States of Reactions in Enzymes and Solutions**.....489
Arieh Warshel and Jörg Bentzien

INDEXES

- Author Index**502
- Subject Index**.....504
