<i>Preface</i>		xiv
1. The SFC Market: "Yesterday, Today, and Tomorrow"		1
<i>Gregory K. Webster</i>		
1.1	Introduction	1
1.2	Development of SFC	4
	1.2.1 Capillary SFC	4
	1.2.2 Packed-Column SFC	5
	1.2.3 Preparative SFC	5
1.3	The SFC Market	6
1.4	SFC in the Pharmaceutical Industry	6
	1.4.1 The Use of SFC in Discovery	7
	1.4.2 IQ/OQ/PQ for SFC Instrumentation	7
	1.4.3 Method Development for Achiral SFC	7
	1.4.4 Achiral Preparative SFC	7
	1.4.5 SFC for Chiral Method Development	
	Screening and Analysis	8
	1.4.6 Chiral Preparative SFC	8
	1.4.7 SFC in Process Analytical Chemistry	9
	1.4.8 Analytical SFC for Impurities	9
	1.4.9 SFC-MS	10
	1.4.10 SFC of Natural Products	11
	1.4.11 Polarimetry Detection in SFC	12
	1.4.12 New Frontiers in SFC-USFC	12
	1.4.13 Pilot-Scale SFC	13
2. The Use of SFC in Discovery Sciences		15
<i>Kanaka Hettiarachchi, Andersen Yun, May Kong, John R. Jacobsen, and Qifeng Xue</i>		
2.1	Introduction	15
2.2	High-Throughput Screening and Purification	16
	2.2.1 Chromatographic Technologies	16
	2.2.2 Laboratory Workflow	17
2.3	Implementation of SFC	19
	2.3.1 SFC Fundamentals	19

2.3.2	Benefits of SFC	20
2.4	Instrumentation	23
2.4.1	Analytical Instrumentation	23
2.4.2	Preparative Instrumentation	24
2.5	Enantiomeric Separation in SFC	25
2.5.1	Chirality and Chromatographic Separation	25
2.5.1.1	RPLC and SFC Separation of Two Diastereomers	25
2.5.1.2	SFC Separation of a Lipophilic Prodrug	28
2.6	Achiral Separation in SFC	28
2.6.1	Screening Samples	29
2.6.1.1	Separation of Routine Compounds	30
2.6.1.2	Challenging Separations	31
2.6.2	Mass-Directed Purification with SFC	32
2.6.3	Achiral Purification Comparison of RPLC-MS and SFC-MS	33
2.7	Remarks of SFC in Drug Discovery	37
3.	Qualification of SFC Hardware and Validation of Systems	43
	<i>Ludwig Huber</i>	
3.1	Introduction	43
3.2	Analytical Instrument Qualification According to USP <1058>	44
3.3	Qualification Planning	46
3.4	Design Qualification	48
3.4.1	The Importance of Requirement Specifications	49
3.4.2	Vendor Assessment	51
3.5	Installation Qualification	53
3.6	Operational Qualification	54
3.7	Tests for Operational Qualification	56
3.8	Performance Qualification	56
3.9	Specific Considerations for Software and Computer Systems	60
3.10	(Preventive) Maintenance and Repair	61
3.11	Change Control	63
3.12	Validation Reports	64

4. Method Development for Achiral SFC	65
<i>Jeffrey W. Caldwell, Walton B. Caldwell, Gregory K. Webster, and Zhenyu Wang</i>	
4.1 Introduction	65
4.2 Overview of Achiral SFC Separations	66
4.2.1 Achiral SFC vs. Achiral HPLC	66
4.2.2 Commercially Available Achiral Stationary Phases for SFC	67
4.2.3 Novel Stationary Phases for SFC	70
4.2.3.1 "Amino" stationary phases	70
4.2.3.2 Hydroxylated stationary phases	74
4.2.3.3 Stationary phase pore size	76
4.2.4 Column Formats for SFC	80
4.3 Achiral Method Development	80
4.3.1 Role of Modifier and Additive	80
4.3.2 Primary Screening on Mobile Phase and Stationary Phase	82
4.3.3 Fine-Tuning on SFC Separation	84
4.4 Develop SFC Method for Mometasone Furoate Impurity Analysis	86
4.5 Summary	93
5. Achiral Preparative Supercritical Fluid Chromatography	97
<i>Vivi Lazarescu, Mark J. Mulvihill, and Lifu Ma</i>	
5.1 Introduction	97
5.2 Evolution of Achiral SFC Instrumentation	100
5.3 Stationary Phases for Achiral SFC	108
5.4 Method Development: Experimental	112
5.4.1 The Value of Pre-Purification	112
5.4.2 Column Selection	113
5.4.3 Mobile Phase Modifier and Additives	114
5.4.4 Flow Rate	115
5.4.5 Gradient Ramp Rate	115
5.4.6 Sample Solvents	116
5.4.7 Triage between SFC and HPLC	116
5.5 Singleton Achiral Purification of Difficult Samples for Discovery Research Support	116
5.6 Approaches for SFC Purification of Compound Libraries	119

5.6.1	UV-Triggered or Fixed Window Fraction Collection	121
5.6.2	Mass-Triggered Fraction Collection	125
5.7	Multicolumn (Dual-Column) Approach for Achiral SFC Purifications	130
5.8	Summary	135
6.	Supercritical Fluid Chromatography for Chiral Method Development Screening and Analysis	145
	<i>Gregory K. Webster and Ted J. Szczerba</i>	
6.1	Introduction	145
6.2	Overview of Chiral SFC Separations	147
6.2.1	Stereoselectivity	147
6.2.2	Chiral SFC vs. Chiral HPLC	148
6.2.3	Commercially Available Chiral Stationary Phases for SFC	149
6.2.4	Mobile Phases for Chiral SFC	157
6.2.5	Co-Solvents in Chiral SFC	157
6.2.5	Co-Solvent Modifiers in Chiral SFC	159
6.3	Chiral Method Development	161
6.3.1	Synthetic Approach	161
6.3.2	Method Development Screens	163
6.3.3	Application	165
	6.3.3.1 Screening success rate	166
6.4	Summary	168
7.	Chiral Preparative Supercritical Fluid Chromatography	171
	<i>Manuel C. Ventura</i>	
7.1	Introduction	171
7.2	Toward Useful Chiral Stationary Phases	172
7.3	SFC Application to Preparative Separation	173
7.3.1	Basic Background	173
7.3.2	Mobile Phases for Prep SFC	174
7.3.3	Instrumentation for Prep SFC	175
7.4	Strategy for Chiral Preparative SFC Separation of New Drug-Like Molecules	177
7.4.1	Analytical Method Development	177
7.4.2	Preparative Purification	179
7.5	Applications for Chiral Prep SFC: Successes and Challenges	181

7.5.1	Toward Pharmaceutical Application of Chiral Preparative SFC	181
7.5.2	Preparative Application of Chiral Stationary Phases	181
7.5.3	Solubility and Mobile Phase Issues in Prep SFC	184
7.5.4	Recycling Chiral SFC Separation Processes	187
7.6	Conclusion	188
8.	SFC in Process Analytical Chemistry	195
	<i>Yanqun Zhao</i>	
8.1	Introduction	195
8.2	Chiral Purity Analysis and Method Development	197
8.2.1	Introduction	197
8.2.2	Chiral Purity Analysis by SFC in Process Analytical Chemistry	197
8.2.3	Method Development Using SFC Screening	199
8.2.4	Column Selection	202
8.2.5	Modifier and Modifier Composition	203
8.2.6	Effect of Additive	204
8.2.7	Method Transfer between SFC and HPLC	205
8.3	SFC Instrument Qualification and Method Validation	207
8.4	Impurity Isolation and Material Purification	209
8.4.1	Impurity Isolation	209
8.4.2	Material Purification	212
8.5	SFC with Mass Detection	212
8.5.1	Using a Mass Detector	213
8.5.2	Applications	214
8.6	Achiral Separations	216
8.7	Summary and Conclusion	218
9.	Analytical SFC for Impurities	225
	<i>Yun Huang</i>	
9.1	Introduction	226
9.2	Qualification of Analytical SFC System	231

9.2.1	Analytical Instrument Qualification Overview	231
9.2.2	Qualification of Analytical SFC System	233
9.3	Analytical SFC as Primary Chiral Purity Tool for Clinical Release and Stability Testing	239
9.3.1	Method Validation Parameters	240
9.3.2	Feasibility Study on Chiral SFC Used for Clinical Release and Stability Testing	241
9.3.2.1	Method validation results and discussions for PF-00981823	243
9.3.2.2	SFC method development and validation for PD-0348292	246
9.3.3	Method Transferability	255
9.3.3.1	Study design	255
9.3.3.2	Results and discussions	256
9.4	Conclusions	260
10.	Supercritical Fluid Chromatography–Mass Spectrometry	265
	<i>Laila Kott</i>	
10.1	Introduction	265
10.2	Sources	266
10.2.1	Vacuum Sources	266
10.2.1.1	Direct introduction	267
10.2.1.2	Thermospray interface	267
10.2.1.3	Particle beam interface	268
10.2.2	Atmospheric Sources	268
10.2.2.1	Atmospheric pressure chemical ionization	269
10.2.2.2	Electrospray ionization	272
10.2.2.3	Atmospheric pressure photoionization	273
10.3	Source and Mass Analyzer Interfaces	276
10.3.1	Flow Splitting Prior to the Back Pressure Regulator	276
10.3.2	Total Flow Using a Pressure Regulating Fluid Interface	277
10.3.3	Total Flow Using a BPR	279
10.3.4	Total Flow Using a Passive BPR	280
10.4	Mass Analyzers	280
10.5	Types of Analyses	282

10.5.1	Chiral SFC-MS	285
10.5.2	Achiral SFC-MS	286
10.5.3	Prep SFC-MS	287
10.5.4	Structure Elucidation	288
10.6	Traditional Problems	288
11.	Supercritical Fluid Chromatography of Natural Products	297
	<i>Ying Wang</i>	
11.1	Introduction	297
11.2	Analytical Supercritical Fluid Chromatography of Plant Metabolites	299
11.2.1	Sesquiterpenes	299
11.2.2	Diterpenes	304
11.2.3	Triterpenes	309
11.2.4	Alkaloids	311
11.2.5	Flavonoids	313
11.2.6	Kava Lactones	314
11.3	Analytical Supercritical Fluid Chromatography of Microbial Metabolites	316
11.3.1	Macrolides	316
11.3.2	Cyclic Peptides	318
11.3.3	Polyethers	320
11.3.4	Trichothecenes	320
11.3.5	Chloramphenicol	323
11.4	Preparative Supercritical Fluid Chromatography of Natural Products	324
11.4.1	Preparative Supercritical Fluid Chromatography of Plant Metabolites	324
11.4.2	Preparative Supercritical Fluid Chromatography of Microbial Metabolites	326
11.5	Conclusions and Prospects	326
12.	Polarimetric Detection in Supercritical Fluid Chromatography	333
	<i>Gary W. Yanik</i>	
12.1	Introduction	333
12.2	Theory of Operation	334
12.3	Comparison of ALP, UV, and CD	337

12.4	Analytes	338
	12.4.1 Small Molecule Pharmaceutical Candidates	338
	12.4.2 Antibiotics and Sugars: Compounds without Chromophores	338
	12.4.3 Amino Acids	340
	12.4.4 Natural Products	340
	12.4.5 Foods, Flavors, and Fragrances	341
	12.4.6 Fertilizers and Pesticides	341
12.5	Applications	341
	12.5.1 SFC Method Development	341
	12.5.2 SFC Preparatory Purification: Peak Collection	343
12.6	Summary	346
13.	Supercritical Fluid Chromatography with Ultra-Performance Particles	347
	<i>Ziqiang Wang</i>	
13.1	Introduction	347
	13.1.1 Supercritical Fluid Chromatography	347
13.2	Current Status of SFC Performance	349
13.3	Characteristics of Ultra-Performance Particles for SFC Considerations	352
13.4	Published studies on SFC with Ultra-Performance Particles	355
13.5	Summary	366
13.6	Future Directions of SFC Development	366
14.	Pilot and Production-Scale Supercritical Fluid Chromatography	371
	<i>Geoffrey B. Cox</i>	
14.1	Introduction	371
14.2	Large-Scale SFC: The Potential	372
14.3	Scale-Up Issues	375
	14.3.1 Column Size	376
	14.3.2 Particle Size	377
	14.3.3 Speed	381
	14.3.4 Sample Introduction	381
14.4	Large-Scale Equipment	382
	14.4.1 Batch Systems	382

14.4.2	Alternate Pumping Recycle in SFC	383
14.4.3	SMB-SFC	385
14.5	Applications at Pilot and Industrial Scale	388
14.5.1	Fish Oils	389
14.5.2	Cyclosporin	390
14.5.3	Palm Oil Components	390
14.6	Future	390
