

CONTENTS

Preface	IX
List of participants	XI
Contents of the volume <i>Differential Geometry and Its Applications</i>	XIII
Homogeneous Einstein metrics D.V. Aleksejevski	1
Graded manifolds and supergauge theories A.L. Almorox	23
Utiyama's Lagrangian and external gauge fields D.E. Betounes	33
On the geometry of degenerate Lagrangians F. Cantrijn	43
Geometric theory of time rescaling J.F. Cariñena	55
Group theoretical treatment of optical aberrations J.F. Cariñena, C. López	65
Recent results on formal calculus of variations and formal theory of differential equations J. Chrastina	71
Some remarks on connection coefficients of Finsler and recurrent Finsler spaces I. Čomič	81
On quasijets and connections A. Dekrét	91
Submanifolds of reductive homogeneous spaces and Lie triple algebras A. Fleischer	101
Test particle motion in geometric objects fields - conservation laws H. Fuchs	109
Derivations of the Lie algebras associated with a symplectic structure J. Grabowski	117

Curvature, metric and holonomy in general relativity G.S. Hall	127
On the plane symmetry in general relativity J. Horský, J. Novotný, J. Kučera	137
Connections naturally induced from the metric tensor and its derivatives of finite order J. Janyška	143
On the importance of quantum mechanics for the axiomatic approach to the theory of gravitation U. Kasper	157
The problem of differentiable Poisson bracket of coordinates in mechanics L. Klapka	167
On the nonexistence of almost complex structures on some oriented flag manifolds J. Korbaš	175
A note on the Helmholtz conditions O. Krupková	181
Characteristic classes of some Pradines-type groupoids and a generalization of the Bott vanishing theorem J. Kubarski	189
Minimal surfaces in homogeneous spaces Le Hong Van	199
On the differential geometry of the coframe bundle M. de León, I. Méndez, M. Salgado	213
Jet shift differentials in classical gauge theories L. Mangiarotti	225
A note on the category of partial differential equations M. Marvan	235
F-planar mappings and transformations J. Mikeš	245
On some problems of the conformal transformations of Riemannian spaces D. Moldobayev, J. Mikeš	255
A note on compatible almost product spaces J. Nikič	257
On homologically minimal surfaces in symmetric spaces Pham Thanh Tri	265
Geometric quantization of the reduced phase space of the cotangent bundle M. Puta	273

On the finite order of some operators J. Slovák	283
Poisson structure with singularities, Berezin structure and the Gell-Mann formula P. Šťovíček	295
Geometry and polarization of light J. Tolar , B. Jurčo	303
On integrability properties of $SU(2)$ Yang-Mills fields. II. Local problem H. Urbantke	311
Cohomology of the Lie algebra of vector fields with constant divergence J. Vanžura	323
Index	341
