Foreword	viii
Preface	xii
Contributors	xiv
Acknowledgements	xv
1. The Bobath Concept: Developments and Current Theoretical Underpinning	1
<i>Sue Raine</i>	
Introduction	1
The founders and development of the Bobath Concept	1
Current theory underpinning the Bobath Concept	3
Systems approach to motor control	4
Clinical application of the theory underpinning the Bobath Concept	11
Summary	16
References	17
2. An Understanding of Functional Movement as a Basis for Clinical Reasoning	23
<i>Linzi Meadows and Jenny Williams</i>	
Introduction	23
Normal movement versus efficient movement	24
Compensatory strategies	25
Motor control and motor learning	26
Requirements of efficient movement	31
Summary	37
References	39
3. Assessment and Clinical Reasoning in the Bobath Concept	43
<i>Paul Johnson</i>	
Introduction	43
Models of clinical reasoning and the Bobath Concept	45
Key characteristics of assessment using the Bobath Concept	47

## Contents

Basis for clinical reasoning	52
Illustrating clinical reasoning using the Bobath Concept	53
Summary	57
References	61
4. Practice Evaluation	64
<i>Helen Lindfield and Debbie Strang</i>	
Introduction	64
Evaluation in the context of the International Classification of Function, Disability and Health	65
Factors influencing measurement selection	66
Measurement properties	68
Measures	70
Summary	78
References	79
5. Moving Between Sitting and Standing	83
<i>Lynne Fletcher, Catherine Cornall and Sue Armstrong</i>	
Introduction	83
Clinical considerations from the literature	84
Phases of sit to stand	86
Movements from standing to sitting	89
Effects of ageing	92
Sit to walk	93
Clinical aspects	93
Movement in functional contexts	95
Clinical example	98
References	114
6. The Control of Locomotion	117
<i>Ann Holland and Mary Lynch-Ellerington</i>	
Introduction	117
Key aspects of bipedalism	117
The gait cycle	122
Use of body weight support treadmill training in the Bobath Concept	127
Assistive devices	129
Outcome measures	147
Summary	149
References	149
7. Recovery of Upper Limb Function	154
<i>Janice Champion, Christine Barber and Mary Lynch-Ellerington</i>	
Introduction	154
The importance of postural control in upper limb function	155

## Contents

The shoulder complex	157
Functional reach	162
The hand	170
Early treatment and management of the hand	170
Assessment of the hand	171
Contactual hand-orientating response	173
Selective strength training of the intrinsic muscles of the hand	173
Summary	177
References	178
8. Exploring Partnerships in the Rehabilitation Setting: The 24-Hour Approach of the Bobath Concept	182
<i>Clare Fraser</i>	
Partnerships in the rehabilitation environment	182
The early days	184
Overcoming sensory deprivation and stimulating body schema	190
Scheduling the day – opportunities for practice	191
Return to work	194
Summary	202
References	204
Index	208
