Preface to the Second Edition

vii

Preface to the First Edition

ix

1 The Atmosphere

1

- 1.1 History and Evolution of the Earth's Atmosphere 1
- 1.2 Climate 4
- 1.3 The Layers of the Atmosphere 6
- 1.4 Pressure in the Atmosphere 8
 - 1.4.1 Units of Pressure 8
 - 1.4.2 Variation of Pressure with Height in the Atmosphere 9
- 1.5 Temperature in the Atmosphere 11
- 1.6 Expressing the Amount of a Substance in the Atmosphere 12
- 1.7 Spatial and Temporal Scales of Atmospheric Processes 16
- Problems 19
- References 20

2 Atmospheric Trace Constituents

21

- 2.1 Atmospheric Lifetime 22
- 2.2 Sulfur-Containing Compounds 27
 - 2.2.1 Dimethyl Sulfide (CH_3SCH_3) 31
 - 2.2.2 Carbonyl Sulfide (OCS) 32
 - 2.2.3 Sulfur Dioxide (SO_2) 33
- 2.3 Nitrogen-Containing Compounds 33
 - 2.3.1 Nitrous Oxide (N_2O) 35
 - 2.3.2 Nitrogen Oxides ($\text{NO}_x = \text{NO} + \text{NO}_2$) 36
 - 2.3.3 Reactive Odd Nitrogen (NO_y) 37
 - 2.3.4 Ammonia (NH_3) 38
- 2.4 Carbon-Containing Compounds 38
 - 2.4.1 Classification of Hydrocarbons 38
 - 2.4.2 Methane 41
 - 2.4.3 Volatile Organic Compounds 43
 - 2.4.4 Biogenic Hydrocarbons 43
 - 2.4.5 Carbon Monoxide 46
 - 2.4.6 Carbon Dioxide 47
- 2.5 Halogen-Containing Compounds 47
 - 2.5.1 Methyl Chloride (CH_3Cl) 50
 - 2.5.2 Methyl Bromide (CH_3Br) 51

2.6	Atmospheric Ozone	52
2.7	Particulate Matter (Aerosols)	55
2.7.1	Stratospheric Aerosol	57
2.7.2	Chemical Components of Tropospheric Aerosol	57
2.7.3	Cloud Condensation Nuclei (CCN)	58
2.7.4	Sizes of Atmospheric Particles	58
2.7.5	Sources of Atmospheric Particulate Matter	60
2.7.6	Carbonaceous Particles	60
2.7.7	Mineral Dust	61
2.8	Emission Inventories	62
2.9	Biomass Burning	63
Appendix 2.1	Air Pollution Legislation	63
Appendix 2.2	Hazardous Air Pollutants (Air Toxics)	65
	Problems	69
	References	70
3	Chemical Kinetics	75
3.1	Order of Reaction	75
3.2	Theories of Chemical Kinetics	77
3.2.1	Collision Theory	77
3.2.2	Transition State Theory	80
3.2.3	Potential Energy Surface for a Bimolecular Reaction	82
3.3	The Pseudo-Steady-State Approximation	83
3.4	Reactions of Excited Species	84
3.5	Termolecular Reactions	85
3.6	Chemical Families	89
3.7	Gas-Surface Reactions	91
Appendix 3	Free Radicals	93
	Problems	93
	References	96
4	Atmospheric Radiation and Photochemistry	98
4.1	Radiation	98
4.1.1	Solar and Terrestrial Radiation	100
4.1.2	Energy Balance for Earth and Atmosphere	101
4.1.3	Solar Variability	105
4.2	Radiative Flux in the Atmosphere	106
4.3	Beer-Lambert Law and Optical Depth	108
4.4	Actinic Flux	111
4.5	Atmospheric Photochemistry	114
4.6	Absorption of Radiation by Atmospheric Gases	117
4.7	Absorption by O_2 and O_3	122
4.8	Photolysis Rate as a Function of Altitude	126
4.9	Photodissociation of O_3 to Produce O and $O(^1D)$	128
4.10	Photodissociation of NO_2	131
	Problems	135
	References	136

5	Chemistry of the Stratosphere	138
5.1	Overview of Stratospheric Chemistry	138
5.2	Chapman Mechanism	142
5.3	Nitrogen Oxide Cycles	151
5.3.1	Stratospheric Source of NO_x from N_2O	151
5.3.2	NO_x Cycles	154
5.4	HO_x Cycles	156
5.5	Halogen Cycles	162
5.5.1	Chlorine Cycles	162
5.5.2	Bromine Cycles	166
5.6	Reservoir Species and Coupling of the Cycles	167
5.7	Ozone Hole	169
5.7.1	Polar Stratospheric Clouds	173
5.7.2	PSCs and the Ozone Hole	174
5.7.3	Arctic Ozone Hole	178
5.8	Heterogeneous (Nonpolar) Stratospheric Chemistry	179
5.8.1	The Stratospheric Aerosol Layer	179
5.8.2	Heterogeneous Hydrolysis of N_2O_5	180
5.8.3	Effect of Volcanoes on Stratospheric Ozone	185
5.9	Summary of Stratospheric Ozone Depletion	188
5.10	Transport and Mixing in the Stratosphere	191
5.11	Ozone Depletion Potential	193
	Problems	195
	References	200
6	Chemistry of the Troposphere	204
6.1	Production of Hydroxyl Radicals in the Troposphere	205
6.2	Basic Photochemical Cycle of NO_2 , NO , and O_3	209
6.3	Atmospheric Chemistry of Carbon Monoxide	211
6.3.1	Low NO_x Limit	214
6.3.2	High NO_x Limit	214
6.3.3	Ozone Production Efficiency	215
6.3.4	Theoretical Maximum Yield of Ozone from CO Oxidation	219
6.4	Atmospheric Chemistry of Methane	219
6.5	The NO_x and NO_y Families	224
6.5.1	Daytime Behavior	224
6.5.2	Nighttime Behavior	225
6.6	Ozone Budget of the Troposphere and Role of NO_x	227
6.6.1	Ozone Budget of the Troposphere	227
6.6.2	Role of NO_x	228
6.7	Tropospheric Reservoir Molecules	231
6.7.1	H_2O_2 , CH_3OOH , and HONO	231
6.7.2	Peroxyacyl Nitrates (PANs)	231

6.8	Relative Roles of VOC and NO _x in Ozone Formation	235
6.8.1	Importance of the VOC/NO _x Ratio	235
6.8.2	Ozone Isopleth Plot	236
6.9	Simplified Organic/NO _x Chemistry	239
6.10	Chemistry of Nonmethane Organic Compounds in the Troposphere	242
6.10.1	Alkanes	242
6.10.2	Alkenes	247
6.10.3	Aromatics	254
6.10.4	Aldehydes	258
6.10.5	Ketones	259
6.10.6	α, β-Unsaturated Carbonyls	260
6.10.7	Ethers	260
6.10.8	Alcohols	261
6.11	Atmospheric Chemistry of Biogenic Hydrocarbons	261
6.12	Atmospheric Chemistry of Reduced Nitrogen Compounds	265
6.12.1	Amines	265
6.12.2	Nitriles	266
6.12.3	Nitrites	266
6.13	Atmospheric Chemistry (Gas Phase) of Sulfur Compounds	266
6.13.1	Sulfur Oxides	266
6.13.2	Reduced Sulfur Compounds (Dimethyl Sulfide)	267
6.14	Tropospheric Chemistry of Halogen Compounds	270
6.14.1	Chemical Cycles of Halogen Species	270
6.14.2	Tropospheric Chemistry of CFC Replacements: Hydrofluorocarbons (HFCs) and Hydrochlorofluorocarbons (HCFCs)	272
	Problems	275
	References	279
7	Chemistry of the Atmospheric Aqueous Phase	284
7.1	Liquid Water in the Atmosphere	284
7.2	Absorption Equilibria and Henry's Law	286
7.3	Aqueous-Phase Chemical Equilibria	291
7.3.1	Water	291
7.3.2	Carbon Dioxide–Water Equilibrium	292
7.3.3	Sulfur Dioxide–Water Equilibrium	294
7.3.4	Ammonia–Water Equilibrium	299
7.3.5	Nitric Acid–Water Equilibrium	299
7.3.6	Equilibria of Other Important Atmospheric Gases	302
7.4	Aqueous-Phase Reaction Rates	306
7.5	S(IV)–S(VI) Transformation and Sulfur Chemistry	308
7.5.1	Oxidation of S(IV) by Dissolved O ₃	308
7.5.2	Oxidation of S(IV) by Hydrogen Peroxide	311
7.5.3	Oxidation of S(IV) by Organic Peroxides	312
7.5.4	Uncatalyzed Oxidation of S(IV) by O ₂	313

7.5.5	Oxidation of S(IV) by O_2 Catalyzed by Iron and Manganese	314
7.5.6	Comparison of Aqueous-Phase S(IV) Oxidation Paths	316
7.6	Dynamic Behavior of Solutions with Aqueous-Phase Chemical Reactions	318
7.6.1	Closed System	319
7.6.2	Calculation of Concentration Changes in a Droplet with Aqueous-Phase Reactions	321
Appendix 7.1	Thermodynamic and Kinetic Data	325
Appendix 7.2	Additional Aqueous-Phase Sulfur Chemistry	328
7.A.1	S(IV) Oxidation by the OH Radical	328
7.A.2	Oxidation of S(IV) by Oxides of Nitrogen	334
7.A.3	Reaction of Dissolved SO_2 with HCHO	334
Appendix 7.3	Aqueous-Phase Nitrite and Nitrate Chemistry	336
7.A.4	NO_x Oxidation	336
7.A.5	Nitrogen Radicals	337
Appendix 7.4	Aqueous-Phase Organic Chemistry	338
Appendix 7.5	Oxygen and Hydrogen Chemistry	339
Problems		340
References		343

8 Properties of the Atmospheric Aerosol 350

8.1	The Size Distribution Function	350
8.1.1	The Number Distribution $n_N(D_p)$	353
8.1.2	The Surface Area, Volume, and Mass Distributions	355
8.1.3	Distributions Based on $\ln D_p$ and $\log D_p$	358
8.1.4	Relating Size Distributions Based on Different Independent Variables	359
8.1.5	Properties of Size Distributions	360
8.1.6	The Lognormal Distribution	362
8.1.7	Plotting the Lognormal Distribution	365
8.1.8	Properties of the Lognormal Distribution	366
8.2	Ambient Aerosol Size Distributions	368
8.2.1	Urban Aerosols	370
8.2.2	Marine Aerosols	374
8.2.3	Rural Continental Aerosols	375
8.2.4	Remote Continental Aerosols	376
8.2.5	Free Tropospheric Aerosols	376
8.2.6	Polar Aerosols	378
8.2.7	Desert Aerosols	379
8.3	Aerosol Chemical Composition	381
8.4	Spatial and Temporal Variation	384
8.5	Vertical Variation	388
Problems		389
