

Contents

Section 1 Revision: Powers of 10	1
1.1 10^x notation	2
1.2 Entering powers of 10 on a calculator	3
1.3 Shifting the decimal point	5
1.4 The SI system	6
1.5 Multiplying and dividing powers of 10	7
Section 2 Calculating Masses of Atoms and Molecules	11
2.1 Atomic masses and molar masses	12
2.2 Binding energies	15
2.3 Molecular masses	16
2.4 Amount of substance	18
2.5 Reduced masses	20
2.6 Momentum, kinetic energy, and de Broglie wavelength	23
2.7 Moment of inertia and rotational constants	25
Section 3 Units: Dimensional Analysis	27
3.1 Physical quantities, dimensions and units	28
3.2 SI base units	28
3.3 SI derived units	28
3.4 Why bother?	32
3.5 Guggenheim notation	35
Section 4 Calculating Frequencies, Wavelengths and Energies	41
4.1 Converting between frequency, wavelength and wavenumber	42
4.2 Energy, frequency and wavelength	46
4.3 Energy, frequency and wavelength of regions of the electromagnetic spectrum	47
4.4 Power	50
4.5 The photoelectric effect	51
4.6 Other units of energy	52
Section 5 Pressure, Volume, Temperature: Concentration and Density	57
5.1 The equation of state for a perfect gas	58
5.2 Standard pressure	59
5.3 Molar volume	59
5.4 Boyle's law	60
5.5 Charles's law	63
5.6 Concentration and density	65
5.7 Other units for concentration, volume and pressure	68
Section 6 Graph Craft	79
6.1 Reading graphs	80
6.2 Plotting graphs	83
6.3 Least squares and linear regression	91
6.4 Forcing plots through the origin	96
6.5 Is it a good straight line?	98

Section 7 Kinetic Theory of Gases	107
7.1 Number density	109
7.2 Molecular speeds	110
7.3 Relative speed	113
7.4 Collisions between molecules: pure gases	114
7.5 Collision density: pure gases	115
7.6 Collisions for gas mixtures	117
7.7 Collisions with walls and surfaces	119
7.8 Mean free path	120
Section 8 Chemical Thermodynamics	123
8.1 Pre-chemistry: work and heat	124
8.2 Chemical reactions: changes in enthalpy, entropy and Gibbs energy	126
8.3 Variation of $\Delta_r H^\circ$, $\Delta_r S^\circ$, and $\Delta_r G^\circ$ with temperature	131
8.4 Variation of ΔG with partial pressures and concentrations	138
8.5 Equilibrium and equilibrium constants	144
8.6 Yields, pH and solubility	149
8.7 Relationship of K^θ to other equilibrium constants	157
Appendix: Some Useful Mathematical Formulae	164
