## Basic principles 1

- |                            |                                    |  |
|----------------------------|------------------------------------|--|
| Microanatomy of the skin 2 | Molecular genetics and the skin 12 | Basics of medical therapy 22           |
| Derivatives of the skin 4  | Terminology of skin lesions 14     | Epidemiology of skin disease 24        |
| Physiology of the skin 6   | Taking a history 16                | Body image, the psyche and the skin 26 |
| Biochemistry of the skin 8 | Examining the skin 18              |  |
| Immunology of the skin 10  | Practical clinic procedures 20     |  |

## Diseases 27

### Eruptions 28

- |   |   |                             |
|---|---|-----------------------------|
| Psoriasis – epidemiology, pathophysiology and presentation 28 | Eczema – basic principles/contact dermatitis 34 | Papulosquamous eruptions 42 |
| Psoriasis – management and complications 30                   | Eczema – atopic eczema 36                       | Erythroderma 44             |
| Psoriasis – biologics 32                                      | Eczema – other forms 38                         | Photodermatology 46         |
|   | Lichenoid eruptions 40                          |                             |

### Infections 48

- |   |  |   |
|---|--|---|
| Bacterial infection – staphylococcal and streptococcal 48 | Viral infections – herpes simplex and herpes zoster 54                 | Fungal infections 58                    |
| Other bacterial infections 50                             | Human immunodeficiency virus disease and immunodeficiency syndromes 56 | Tropical infections and infestations 60 |
| Viral infections – warts and other viral infections 52    |  | Infestations 62                         |

### Disorders of specific skin structures 64

- |   |                                    |                 |
|---|------------------------------------|-----------------|
| Sebaceous and sweat glands – acne, rosacea and other disorders 64 | Disorders of nails 68              | Leg ulcers 72   |
| Disorders of hair 66  | Vascular and lymphatic diseases 70 | Pigmentation 74 |

### Allergy and autoimmunity 76

- |                             |                               |  |
|-----------------------------|-------------------------------|--|
| Urticaria and angioedema 76 | Connective tissue diseases 80 | Vasculitis and the reactive erythemas 82 |
| Blistering disorders 78     |                               |  |

### Internal medicine 84

- |  |                   |                                 |
|--|-------------------|---------------------------------|
| Skin changes in internal conditions 84 | Drug eruptions 86 | Associations with malignancy 88 |
|--|-------------------|---------------------------------|

### Inherited disorders 90

- |  |   |
|--|---|
| Keratinization and blistering syndromes 90 | Neurocutaneous disorders and other syndromes 92 |
|--|---|

### Skin tumours 94

- |                                       |   |   |
|---------------------------------------|---|---|
| Benign tumours 94                     | Skin cancer – squamous cell carcinoma 100 | Cutaneous T cell lymphomas and malignant dermal tumours 104 |
| Naevi 96                              | Skin cancer – malignant melanoma 102      |   |
| Skin cancer – basal cell carcinoma 98 |   |   |

## Special topics in dermatology 105

- |  |                             |                                  |
|--|-----------------------------|----------------------------------|
| Ultraviolet radiation and the skin 106     | Paediatric dermatology 116  | Dermatology and the internet 128 |
| Cosmetics 108                              | The skin in old age 118     | Bibliography 130                 |
| Basic dermatological surgery 110           | Genitourinary medicine 120  | Self-help groups 132             |
| Advanced dermatological surgery 112        | Racially pigmented skin 122 |                                  |
| New trends in dermatological treatment 114 | Occupation and the skin 124 |                                  |
|  | Immunological tests 126     |                                  |
