Pr	efac	e to the First Edition The American Action The American State of the Community of the Commu	xiii
Pr	efac	e to the Second Edition	xv
1	Intr	eduction with the particular and past of the said assignation	1
	1.1	Population growth	1
	1.2	Administration of drugs	4
	1.3	Cell division	9
	1.4	Differential equations with separable variables	11
	1.5	Equations of homogeneous type	14
	1.6	Linear differential equations of the first order	16
	1.7	Numerical solution of first-order equations	19
	1.8	Symbolic computation in MATLAB®	24
	1.9	Notes	27
2	Line	ear Ordinary Differential Equations with Constant	128
GU.		efficients place of the place o	33
	2.1	Introduction	33
	2.2	First-order linear differential equations	35
	2.3	Linear equations of the second order	36
	2.4	Finding the complementary function	37
	2.5	Determining a particular integral	41
77	2.6	Forced oscillations	50
	2.7	Differential equations of order $n \dots \dots \dots \dots$	52
	2.8	Uniqueness	55
3	Svs	tems of Linear Ordinary Differential Equations	61
	3.1	First-order systems of equations with constant coefficients .	61
	3.2	Replacement of one differential equation by a system	64
		The general system	
		The fundamental system	
		Matrix notation	
		Initial and boundary value problems	
	3.7	Solving the inhomogeneous differential equation	
	3.8	Numerical solution of linear boundary value problems	

4	Mod	lelling Biological Phenomena	91
	4.1	Introduction	91
	4.2	Heartbeat	91
	4.3	Nerve impulse transmission	94
	4.4	Chemical reactions	100
	4.5	Predator–prey models	106
	4.6	Notes	109
5	Firs	t-Order Systems of Ordinary Differential Equations	115
	5.1	Existence and uniqueness	115
	5.2		118
	5.3	The phase plane and the Jacobian matrix	119
	5.4	Local stability	121
	5.5	Stability	128
	5.6	Limit cycles	133
	5.7	Forced oscillations	139
	5.8	Numerical solution of systems of equations	143
	5.9	Symbolic computation on first-order systems of equations and	
		higher-order equations	147
	5.10	Numerical solution of nonlinear boundary value problems	149
	5.11	Appendix: existence theory	153
