## Part I Global issues

---

<b>1 The global commons</b>	<b>3</b>
Ownership and care of the environment	3
Global goods, global bads	6
<b>2 Climate change</b>	<b>12</b>
Some global warming science	12
Policy perspectives on climate change	13
Estimating global warming damage	22
Damage per tonne of greenhouse gas emissions	24
The secondary benefits of warming abatement strategies	24
Conclusions	26
<b>3 The ozone layer</b>	<b>28</b>
Ozone	28
CFCs and the depletion of the ozone layer	28
The damage from ozone layer depletion	30
The costs and benefits of CFC control	32
<b>4 Biological diversity</b>	<b>35</b>
What is biological diversity?	35
The loss of biodiversity	38
Why is biodiversity important? The concept of total economic damage	39
Measuring total economic value	44
Is total economic value really total?	52
Conclusions	59

**Part II Explaining resource degradation**

---

- 5 The failure of economic systems** 63
- Introduction 63
  - The conversion of land 64
  - A general theory of economic failure 66
  - Local market failure 69
  - Government failure 71
  - Global appropriation failure 73
- 6 International trade and the environment** 74
- Introduction 74
  - The issues 74
  - The benefits of free trade 76
  - Free trade and environmental degradation 77
  - Protection and environmental degradation 79
  - The GATT and the environment 79
  - Environmental disputes under GATT 83
  - Justifying trade restrictions: the uni-directional externality case 89
  - Justifying trade restrictions: the mutual externality case 92
  - Trade liberalisation and environmental policy 93
  - Do environmental regulations inhibit competitiveness? 97
  - Conclusions on trade and the environment 100
  - The World Trade Organisation 104
- 7 Population and poverty** 106
- Introduction 106
  - Econometric tests 106
  - Environmental Kuznets curves 109
- 8 'Overconsumption'** 112
- Resource scarcity 112
  - The overconsumption hypothesis 113
  - Tackling overconsumption of resources 118
  - Conclusions 121

---

**Part III Capturing global value**

---

<b>9</b>	<b>Global bargains</b>	<b>125</b>
	Introduction	125
	Sustainability and global value	125
	Mechanisms for value capture	129
	Conclusions on global bargains	137
<b>10</b>	<b>The Global Environment Facility and Rio conventions</b>	<b>139</b>
	Introduction	139
	The beginnings of the GEF	139
	The pilot phase	143
	The independent evaluation	145
	GEF II	147
	The Convention on Biological Diversity	147
	The Framework Convention on Climate Change	149
<b>11</b>	<b>Incremental cost</b>	<b>151</b>
	Introduction	151
	Incremental cost: the international agreements	151
	New resources and global benefits	153
	Global and national priorities	160
	Incremental cost	163
	An algebraic model of resource transfers and incremental cost	170
	The meaning of cost	171
	The baseline	173
	Conclusions	175
<b>12</b>	<b>Joint implementation</b>	<b>177</b>
	Introduction: the meaning of joint implementation	177
	The economics of trading emission reductions	179
	International agreements and joint implementation	183
	Cost efficiency	185
	Objections to trading pollution reductions	190
	Problems with joint implementation	192
	Ji and national obligations	192
	Conclusions	196
	<i>References</i>	<b>197</b>
	<i>Index</i>	<b>207</b>
