

## CONTENTS

LIST OF CONTRIBUTORS	vii
CONTENTS OF OTHER VOLUMES	ix
PREFACE	xiii

### Chapter 1

#### THE FORMATION OF SCHIFF BASES IN THE COORDINATION SPHERE OF METAL IONS

Daniel L. Leussing

1. Schiff Bases	2
2. Schiff Base Equilibria in the Absence of Metal Ions	2
3. Metal Ion Schiff Base Complexes	24
4. The Influence of Metal Ions on the Rates of Schiff Base Formation	50
5. Transamination Reactions	62
6. Conclusions	72
Abbreviations and Symbols	73
References	74

### Chapter 2

#### THE ROLE OF DIVALENT METAL IONS IN PHOSPHORYL AND NUCLEOTIDYL TRANSFER

Barry S. Cooperman

1. Introduction	80
2. Mechanisms of Phosphoryl Transfer	80
3. Mechanisms of Nucleotidyl Transfer	85
4. Possibilities for Metal Ion Participation	87
5. Model System Studies for Metal Ion Catalysis	94
6. Studies on Phosphoryl Transfer Enzymes	112
7. Summary	116
Acknowledgments	117
Addendum	117
References	120

## Chapter 3

## METAL ION-CATALYZED DECARBOXYLATIONS OF BIOLOGICAL INTEREST

R. W. Hay

1. Introduction	128
2. Decarboxylation Mechanisms	129
3. Metal Ion-Catalyzed Decarboxylations	132
4. Formation Constants	146
5. Mixed Ligand Complexes	148
6. Carbon Isotope Effects	153
7. Inhibition of Decarboxylation by Metal Ions	155
8. Carboxylation	156
9. Enzymic Decarboxylation	158
10. Oxidative Decarboxylations and Miscellaneous Decarboxylations	164
11. Conclusions	166
Acknowledgment	167
Addendum	167
References	168

## Chapter 4

## METAL ION-PROMOTED HYDROLYSIS OF AMINO ACID ESTERS AND PEPTIDES

R. W. Hay and P. J. Morris

1. Introduction	174
2. Base Hydrolysis of Amino Acid Esters	178
3. Metal Ion Promotion: Labile Systems	190
4. Metal Ion-Promoted Hydrolysis: Nonlabile Cobalt(III) Systems	214
5. Conclusions	228
Addendum	231
References	235

## Chapter 5

CATALYTIC ACTIVITY OF POLY-L, $\alpha$ -AMINO ACID-METAL ION COMPLEXES:  
NEW APPROACHES TO ENZYME MODELS

Masahiro Hatano and Tsunenori Nozawa

1. Introduction	246
2. Poly-L-Lysine-Copper(II) Complexes as Copper-Containing Enzyme Models	253
3. Conclusions	272

## Chapter 3

## METAL ION-CATALYZED DECARBOXYLATIONS OF BIOLOGICAL INTEREST

R. W. Hay

1. Introduction	128
2. Decarboxylation Mechanisms	129
3. Metal Ion-Catalyzed Decarboxylations	132
4. Formation Constants	146
5. Mixed Ligand Complexes	148
6. Carbon Isotope Effects	153
7. Inhibition of Decarboxylation by Metal Ions	155
8. Carboxylation	156
9. Enzymic Decarboxylation	158
10. Oxidative Decarboxylations and Miscellaneous Decarboxylations	164
11. Conclusions	166
Acknowledgment	167
Addendum	167
References	168

## Chapter 4

## METAL ION-PROMOTED HYDROLYSIS OF AMINO ACID ESTERS AND PEPTIDES

R. W. Hay and P. J. Morris

1. Introduction	174
2. Base Hydrolysis of Amino Acid Esters	178
3. Metal Ion Promotion: Labile Systems	190
4. Metal Ion-Promoted Hydrolysis: Nonlabile Cobalt(III) Systems	214
5. Conclusions	228
Addendum	231
References	235

## Chapter 5

CATALYTIC ACTIVITY OF POLY-L, $\alpha$ -AMINO ACID-METAL ION COMPLEXES:  
NEW APPROACHES TO ENZYME MODELS

Masahiro Hatano and Tsunenori Nozawa

1. Introduction	246
2. Poly-L-Lysine-Copper(II) Complexes as Copper-Containing Enzyme Models	253
3. Conclusions	272

## CONTENTS

v

Addendum	273
Abbreviations	274
References	274

## Chapter 6

REACTIONS OF MOLYBDENUM COORDINATION COMPOUNDS: MODELS  
FOR BIOLOGICAL SYSTEMS

Jack T. Spence

1. Introduction: Biological Importance of Molybdenum	280
2. Biochemical Reactions of Molybdenum Enzymes	280
3. Model Reactions	284
4. Conclusions	316
Addendum	319
Abbreviations	320
References	321

## Chapter 7

## INTERACTION OF Cu(I) COMPLEXES WITH DIOXYGEN

Andreas D. Zuberbühler

1. Introduction: Cu(I) in Biological Systems	326
2. Redox Properties of Dioxygen	327
3. Cu(I): A Redoxactive Closed-Shell Transition Metal Ion	330
4. Autoxidation of Cu(I) Complexes	333
5. Dioxygen Adducts of Low Molecular Cu(I) Complexes (?)	348
6. Discussion	353
7. Conclusions	359
Addendum	362
Abbreviations and Definitions	362
References	363
