

CONTENTS

ANALYTICAL CHEMISTRY AND THE ENVIRONMENT

1. Use of a Toxic and Hazardous Aerosol Research Facility to Evaluate Fate and Effects of Army Smoke Screen Materials, *Peter Van Voris, M. W. Ligojke, K. M. McFadden, D. A. Cataldo, T. R. Garland* 3
2. Vapor-Aerosol Physicochemical Laboratory, *J. D. Lore, L. M. Skeen* 9
3. Hazardous Waste Analysis by Direct-Linked Fused Silica Capillary Column Gas Chromatography/Fourier Transform Infrared/Mass Spectrometry, *D. F. Gurka, R. Titus* 17
4. The Use of FTIR for Automated Identification of Organic Compounds Frequently Found on Hazardous Waste Sites, *M. A. Puskar, S. P. Levine, C. L. Geraci, Jr., S. P. Lowry* 25
5. A Tandem Mass Spectrometer for the Detection of Nitroaromatic Compounds and Other Electronegative Species in Ambient Air, *G. L. Glish, S. A. McLuckey, H. S. McKown* 33

ENVIRONMENTAL RADIOCHEMISTRY

6. A State-of-the-Art Digital Radiation Survey Meter, *J. M. Mahathy, J. G. DeArmond* 41
7. A Computer-Controlled System for Rapid Soil Analysis of Ra-226, *R. W. Doane, B. A. Berven, M. S. Blair* 47
8. Laboratory Experience in the Analysis of Orphan Waste, *Leon Leventhal, Dinkar P. Kharkar* 55

AUTOMATED INSTRUMENTATION

9. A New Laboratory Robotic System for Automated Sample Preparation and Integrated Analysis, *A. Cerino, P. Barrett, C. Fisher, B. McGratten* 63

10. Aluminum, Boron and Mercury Measurement via Ion-Exchange Direct Current Plasma (DCAP) Spectrometry, <i>S. L. Maxwell, III</i>	77
11. Automated Electron Microprobe, <i>K. A. Thompson, R. L. Walker</i>	83
12. An Automated Instrument for Qualitative Analysis of Photographically Recorded Spectra, <i>W. Hareland, D. M. Melgaard</i>	91

ADVANCES IN ANALYTICAL MASS SPECTROMETRY

13. Polymer Mass Spectrometry: The Problem and Its "Solution," <i>K. D. Cook, J. H. Callahan, V. F. Man, K. O. Hool</i>	101
14. High-Resolution CW Resonance Ionization Mass Spectrometry, <i>T. J. Whitaker, B. D. Canon, B. A. Bushaw</i>	107
15. Sputter Atomization/Resonance Ionization Mass Spectrometry for High Sensitivity Isotopic Analysis, <i>D. L. Donohue, W. H. Christie, D. E. Goeringer, D. H. Smith, H. S. McKown</i> ..	113
16. Separation of Rare Earth Isotopes Using Resonance Ionization Time-of-Flight Mass Spectrometry, <i>D. P. Armstrong, W. H. McCulla, G. K. Schweitzer</i>	119
17. Evaluation of the MAT-Thermal Ionization Quadrupole Mass Spectrometer for Potential Use for On-Site Safeguards Verifications, <i>R. Fiedler</i>	127
18. ICP-MS and Its Application in A Nuclear Laboratory, <i>S. E. Long, R. M. Brown</i>	133
19. The Application of Inductively Coupled Plasma Mass Spectrometry to the Analysis of Uranium Metal and Uranium Compounds, <i>J. E. Cantle</i>	139

FOURIER TRANSFORM SPECTROSCOPY

20. Analytical Applications of ICP-FTS, <i>L. M. Faires, B. A. Palmer, P. T. Cunningham</i>	145
21. Electronic Fourier Transform Spectroscopy: Performance and Application, <i>W. D. Bostick, D. P. Armstrong, W. H. Fletcher, W. H. McCulla</i>	151

22. Matrix Isolation Versus the Light Pipe as an Interface for Gas Chromatography/Fourier-Transform Spectrometry, *J. F. Schneider, J. C. Demirgian, J. C. Stickler* 159

ANALYTICAL CHEMISTRY OF PLUTONIUM

23. Comparison of Different Methods of Determining Plutonium Content and Isotopic Composition, *M. R. W. Dowell*..... 167
24. High Precision Plutonium and Uranium Assay with an Automatic Titrator, *R. J. Sironen, T. B. Angelo* 173
25. A Computer-Assisted Controlled-Potential Coulometer for the Determination of Plutonium, *W. G. Mitchell, K. Lewis* 179
26. Spectrophotometric Determination of Plutonium with High Precision and Heavy Sample Throughput, *Boyd E. Smith* 185
27. Non-Destructive Assay of Plutonium Residue in Horizontal Storage Tanks, *S. Fredric Marsh* 191

NUCLEAR ANALYTICAL CHEMISTRY

28. Multi-Stage Mass Spectrometry with a Quadrupole Mass Filter Interfaced to a High Resolution Sector Mass Spectrometer, *E. H. McBay, G. L. Glish, S. A. McLuckey, L. K. Bertram* 199
29. On-Line Analysis of Plutonium by Energy Dispersive X-ray Fluorescence, *R. F. Parry, V. W. Walker, R. A. Johns, D. C. Camp, W. D. Ruhter, D. Eckels* 205
30. An On-Line Analyzer for Monitoring Uranium and Technetium in the Vent Stacks to a Gaseous Diffusion Plant, *M. R. Powell, D. A. Branam, R. W. Morrow*..... 211
31. Imaging Detector for X and Gamma Rays, *W. J. McGonnagle* .. 219
32. Surface Areas by Positron Annihilation Spectroscopy, *J. M. Dale, T. M. Rosseel, L. D. Hulett, K. Venkateswaran, Y. C. Jean, E. L. Fuller* 225
33. The Production and Certification of an Equal Atom Plutonium Isotopic Standard—The New Brunswick Laboratory Certified Reference Material (CRM) No. 128, *C. G. Cacic, D. W. Crawford*..... 231

34. A Multi-Column Step-Gradient Chromatography System for Automated Ion Exchange Separations, <i>T. L. Rucker</i>	239
35. Robotic Sample Preparation for Radiochemical Plutonium and Americium Analyses, <i>N. Stalnaker, T. Beugelsdijk, A. Thurston, J. Quintana</i>	247
36. A Laser Fluorimeter for Uranium Detection in Waste, <i>S. Schoof, E. Mainka, E. Hellmund</i>	251
37. The Design and Application of a New Data System: DS90, <i>G. A. Warburton, P. A. Ryan, K. Chadwick, R. J. Greathead</i> ...	261

CHEMOMETRICS

38. Detecting Isotopic Ratio Outliers, <i>Charles K. Bayne, David H. Smith</i>	265
39. Use of a Graph Theoretic Similarity Index in Prediction Studies of Linear Discriminants and Models, <i>Edward P. Jaeger, Peter C. Jurs</i>	275
40. Investigations of Fluctuations in Instrumental Response by Principle Component Analysis, <i>L. E. Wangen, G. E. Bentley, V. T. Hamilton, E. J. Peterson</i>	285
41. Optimization and Experimental Design in Analytical Chemical Methods Development, <i>Stanley N. Deming</i>	293
42. Real Time Analysis Using the Kalman Filter, <i>S. D. Brown</i>	299
43. Pattern Recognition in Piezoelectric Sensor Research at the Center for Process Analytical Chemistry, <i>D. L. Illman, W. P. Carey, K. Beebe, B. R. Kowalski</i>	309

NUCLEAR FUEL TECHNOLOGY

44. Application of ICP/MS in the Analysis of Uranic Materials, <i>P. Allenby, A. S. Clarkson, P. Makison</i>	317
45. Reversed Phase Chromatographic Separations with Tri-n-octyl Phosphine Oxide for the Isotopic and Isotope Dilution Analysis of Mixed U, Pu Nuclear Fuel Materials, <i>A. Delle Site, N. Doubek, R. Fiedler, W. Raab, H. Swietly, G. Bagliano, S. Deron</i>	325

46. Analytical Methods and Laboratory Facility for the Defense Waste Processing Facility, <i>C. J. Coleman, R. A. Dewberry, A. J. Lethco, C. D. Denard</i>	337
47. Description of Apparatus and Procedures for Determining Radiological Source Terms of Nuclear Fuels, <i>D. L. Baldwin, R. E. Woodley, F. E. Holt, D. V. Archer, R. T. Steele, P. G. Whitkop</i>	345
48. Automated Analyzer for the Determination of Free Acid, <i>John Young, S. L. Maxwell</i>	353
Index	359
