# Contents

1 Normal Mode Theory and Harmonic Potential Approximations 1
*Konrad Hinsen*

2 All-Atom Normal Mode Calculations of Large Molecular Systems Using Iterative Methods 17
*Liliane Mouawad and David Perahia*

3 The Gaussian Network Model: Theory and Applications 41
*A.J. Rader, Chakra Chennubhotla, Lee-Wei Yang, and Ivet Bahar*

4 Normal Mode Analysis of Macromolecules: From Enzyme Active Sites to Molecular Machines 65
*Guohui Li, Adam Van Wynsberghe, Omar N.A. Demerdash, and Qiang Cui*

5 Functional Information from Slow Mode Shapes 91
*Yves-Henri Sanejouand*

6 Unveiling Molecular Mechanisms of Biological Functions in Large Macromolecular Assemblies Using Elastic Network Normal Mode Analysis 111
*Florence Tama and Charles L. Brooks III*

7 Applications of Normal Mode Analysis in Structural Refinement of Supramolecular Complexes 137
*Jianpeng Ma*

8 Normal Mode Analysis in Studying Protein Motions with X-Ray Crystallography 155
*George N. Phillips, Jr.*

9 Optimizing the Parameters of the Gaussian Network Model for ATP-Binding Proteins 171
*Taner Z. Sen and Robert L. Jernigan*

10 Effects of Sequence, Cyclization, and Superhelical Stress on the Internal Motions of DNA 187
*Atsushi Matsumoto and Wilma K. Olson*

11 Symmetry in Normal Mode Analysis of Icosahedral Viruses 213
*Herman W.T. van Vlijmen*

12 Extension of the Normal Mode Concept: Principal Component Analysis, Jumping-Among-Minima Model, and Their Applications to Experimental Data Analysis 233
*Akio Kitao*

13 Imaginary-Frequency, Unstable Instantaneous Normal Modes, the Potential Energy Landscape, and Diffusion in Liquids 253
*T. Keyes*

14 Driven Molecular Dynamics for Normal Modes of Biomolecules without the Hessian, and Beyond 281
*Martina Kaledin, Alexey L. Kaledin, Alex Brown, and Joel M. Bowman*

15 Probing Vibrational Energy Relaxation in Proteins Using Normal Modes 301
*Hiroshi Fujisaki, Lintao Bu, and John E. Straub*

16 Anharmonic Decay of Vibrational States in Proteins 325
*Xin Yu and David M. Leitner*

17 Collective Coordinate Approaches to Extended Conformational Sampling 349
*Michael Nilges and Roger Abseher*

18 Using Collective Coordinates to Guide Conformational Sampling in Atomic Simulations 367
*Haiyan Liu, Zhiyong Zhang, Jianbin He, and Yunyu Shi*
