PART 1 Theoretical Constructs

1. SENSORY INTEGRATION: A. JEAN AYRES' THEORY REVISITED 3

Anita C. Bundy, ScD, OTR, FAOTA and Elizabeth A. Murray, ScD, OTR/L, FAOTA

AN EXAMPLE 3

INTRODUCTION TO SENSORY INTEGRATION THEORY 4

SENSORY INTEGRATION THEORY 4

A Schematic Representation of Sensory Integration Theory 5

Practic Dysfunction 6

Postural Deficits 7

Deficits in Tactile Discrimination 7

Deficits in Bilateral Integration and Sequencing 8

Somatodyspraxia 8

Sensory Modulation Disorders 8

Sensory Defensiveness 9

Gravitational Insecurity 9

Aversive Responses to Movement 9

Underresponsiveness to Sensation 10

Assumptions of Sensory Integration Theory 10

Assumption 1: The Central Nervous System Is Plastic 10

Assumption 2: Sensory Integration Develops 11

Assumption 3: The Brain Functions as an Integrated Whole 11

Assumption 4: Adaptive Interactions Are Critical to Sensory Integration 11

Assumption 5: People Have an Inner Drive to Develop Sensory Integration

Through Participation in Sensorimotor Activities 12

BOUNDARIES OF SENSORY INTEGRATION THEORY AND PRACTICE 12

Boundaries and the Population 12

Children with Pervasive Developmental Disorders: A Brief Note 13

Boundaries and Intervention 13

Service Delivery Models: A Special Note 14

THE SPIRALING PROCESS OF SELF-ACTUALIZATION 14

THE MIND–BRAIN–BODY PROCESS 16

DEVELOPMENT OF SENSORY INTEGRATION THEORY: HISTORY AND RESEARCH 17

Factor-Analytic and Related Studies 17

CURRENT VIEW OF SENSORY INTEGRATION THEORY REVISITED 21

EFFICACY OF INTERVENTION BASED ON SENSORY INTEGRATION THEORY 21

Efficacy Reconsidered 22

NEW PERSPECTIVES ON INTERVENTION 24

The Return of Occupational Therapy to Its Occupation-Based Mission 24

Developing Theories of Nervous System Function, Motor Control, and

Motor Learning 25

Current Reimbursement Practices Within Educational and Health-Care Systems 26

PUTTING IT ALL TOGETHER: A PROPOSED MODEL OF INTERVENTION INCORPORATING THE PRINCIPLES OF SENSORY INTEGRATION THEORY 26

 Example 1: A Child with Poor Praxis 27

 Discussion 28

 Example 2: A Child with Poor Sensory Modulation 28

 Discussion 29

SUMMARY AND CONCLUSIONS 29

 References 29

2. Structure and Function of the Sensory Systems 35

Shelly J. Lane, PhD, OTR/L, FAOTA

PURPOSE AND SCOPE 35

REFERENCE MATERIALS 36

A QUICK REVIEW OF THE BASIC STRUCTURE AND FUNCTION 36

 Basic Central Nervous System Geography 38

 Basic Central Nervous System Function 39

 Terminology 40

 Stimulus Reception and Transduction 40

 Stimulus Encoding 40

 Receptor Fields 41

 Receptor Adaptation 41

 Lateral Inhibition 41

 Convergence and Divergence 42

 Distributed Processing and Control 43

 Serial and Parallel Processing 43

THE SOMATOSENSORY SYSTEM 43

 Receptors and Transduction 43

 Dorsal Column Medial Lemniscal Pathway 44

 Proprioception 45

 Sources of Proprioceptive Input 47

 Interpreting Somatosensory Input 48

 Anterolateral System 49

 Trigeminothalamic Pathway 51

 Functional Considerations 51

THE VESTIBULAR SYSTEM 53

 Receptors and Transduction 53

 Utricle and Sacculle

 Semicircular Canals 54

 Central Projections 56

 Vestibular and Proprioception Interactions 58

THE AUDITORY SYSTEM 59

 Receptors and Transduction 59

 Central Connections 59

 Efferent Processes and Feedback Loops 60

THE VISUAL SYSTEM 61

 Receptors and Transduction 61

 Retina 61

 Central Connections 63

 Light Reflex 64

 Visual Experience Counts 67

SUMMARY AND CONCLUSION	67
REFERENCES	67
APPENDIX 2-1: SYSTEM HIGHLIGHTS	69

3. Disorders of Praxis 71

Gretchen Dahl Reeves, PhD, OT/L, FAOTA and Sharon A. Cermak, EdD, OTR, FAOTA

PURPOSE AND SCOPE	72
CASE STUDIES	72
RELATED DIAGNOSES AND TERMINOLOGY	73
DEVELOPMENT AND PERFORMANCE OF CHILDREN WITH PRAXIS DIFFICULTIES	75
School Years	75
Adolescence and Adulthood	76
Behavioral and Emotional Characteristics	76
Intellectual and Cognitive Factors	77
Tests of Intelligence	77
Higher Level Processes and Praxis	77
DYSFUNCTION IN SENSORY INTEGRATION AND DISORDERS OF PRAXIS	78
Keisha and Davis Revisited: Sensory Integration and Praxis Tests and Clinical Observations	78
Keisha	78
David	79
The Sensory Integration and Praxis Tests and Praxis	80
Bilateral Intergration and Sequencing Deficits	81
Somatodyspraxia	81
NEUROANATOMICAL BASES OF PRAXIS AND DYSPRAXIA	82
Ideation	83
Planning	83
Execution	84
THE ROLE OF SENSATION IN MOVEMENT AND PRAXIS	85
Tactile System	85
Proprioception	85
Vestibular System	86
Vision	87
Auditory Processing	87
THE INTERVENTION PROCESS	87
Sensory Integration Theory Revisited	88
Contemporary Theories of Motor Behavior	88
Motor Learning and Motor Control	88
Contextual Perspectives	90
Practice Effects	92
Intervention with Keisha and David	93
CONCLUSION	95
REFERENCES	95

4. Sensory Modulation 101

Shelly J. Lane, PhD, OTR/L, FAOTA

MICHAEL	101
TERMINOLOGY	102

Background of Terminology 102
 Definitions 102
 MODULATION 104
 Modulation as a Physiological Process at the Cellular Level 104
 Modulation at the Level of Systems and Behavior 106
 SENSORY MODULATION DYSFUNCTION 107
 A Brief Historical Overview 107
 Current Conceptualizations 108
 Proposed Central Nervous System Links to Sensory
 Modulation Dysfunction 110
 Sensory Modulation and the Limbic System 110
 Sensory Modulation and Arousal 112
 Sensory Modulation Dysfunction and Neurotransmission 114
 Stress and Modulation 115
 Tactile Defensiveness 115
 Aversive Responses to Vestibular and Proprioceptive Inputs,
 Gravitational Insecurity, and Vestibular and Proprioceptive
 Underresponsiveness 118
 Sensory Modulation Dysfunction in Other Sensory Systems 119
 SUMMARY AND CONCLUSION 119
 REFERENCES 120

5. Visual-Spatial Abilities

Anne Henderson, PhD, OTR/L, FAOTA, Charlane Pehoski, ScD, OTR/L, FAOTA, and Elizabeth Murray, ScD, OTR/L, FAOTA

PURPOSE AND SCOPE 124
 DUAL NEURAL PROCESSING OF VISION 124
 Cellular Divisions: Magnocellular and Parvocellular Systems 124
 Cortical Divisions: The Dorsal and Ventral Streams 124
 Summary of the Neural Processing of Vision 126
 VISUAL CONTROL OF MOVEMENT AND SPACE 126
 Vision and the Body Schema 126
 Movement and the Visual Array 127
 Optic Flow 127
 Spatial Constancy 127
 Motion Parallax and Optical Expansion 128
 Visual-Motor Abilities 128
 Visual Guidance for Research to Grasp 128
 Reaching 128
 Preparation for Grasp 129
 Whole Body Movement 129
 Vision and Balance 129
 Locomotion 129
 Dealing with Moving Objects 130
 Summary of Visual Control of Movement in Space 130
 VISUAL-SPATIAL ABILITIES AND COGNITION 131
 Topographical Orientation 131
 Object-Focused Spatial Abilities 132
 Spatial Analysis 133
 Constructional Ability 134

Summary of Spatial Cognition	136
SUMMARY AND CONCLUSION	136
REFERENCES	137

6. Central Auditory Processing Disorders 141

Joan M. Burleigh, PhD, Kathleen W. McIntosh, PhD, and Michael W. Thompson, PhD

PURPOSE AND SCOPE	141
DEFINITIONS	142
BEHAVIORAL MANIFESTATIONS	142
Classroom Behaviors	143
Social-Emotional Behaviors	143
Disinhibition Behaviors	144
INCIDENCE AND MATURATION	144
AUDITORY SYSTEM	145
Central Auditory Nervous System	145
Cochlear Nuclei	145
Decussation of Neural Fibers	148
Superior Olivary Complex	148
Lateral Lemniscus	148
Inferior Colliculus	148
Medial Geniculate Body	148
Auditory Cortex	149
CENTRAL AUDITORY PROCESSING TESTS	149
Behavioral Assessment Measures	150
Screening Tools	150
Test Battery Approach	150
Electrophysiological Assessment	151
MANAGEMENT	151
Therapeutic Approaches	151
Compensatory Management and Strategies	152
Teaching Strategies	152
Perferential Seating and Ear Strength Considerations	153
Sound-Attenuating Devices	153
Classroom Acoustics	155
Technology	156
Frequency-Modulated Assistive Listening Systems	156
Digital Signal Processing	156
SUMMARY AND CONCLUSION	156
REFERENCES	157

PART II Assessment and Intervention

7. Assessing Sensory Integrative Dysfunction 169

Anita C. Bundy, ScD, OTR, FAOTA

SENSORY INTEGRATION AND FUNCTIONAL ASSESSMENT	169
---	-----

SENSORY INTEGRATION AND PRAXIS TESTS	170
Validity and Reliability of SIPT	172
Evidence of Construct Validity	172
Comparing SIPT Scores of Children with and without Disabilities	175
Evidence of Reliability	175
A COMPLETE ASSESSMENT: COMPLEMENTING THE SIPT	175
Supplementary Information: Knowledge of Development, Cognition, and Primary Diagnoses	175
Clinical Observations of Postural Movements	175
Prone Extension	176
Neck Flexion During Spine Flexion	177
Low Extensor Muscle Tone	188
Proximal Joint Stability	177
Postural Adjustments or Background Movements	177
Equilibrium Reactions	177
Postrotary Nystagmus: Some Comments	179
Clinical Observations Associated Directly with Praxis	179
Bilateral Integration	180
Projected Action Sequences	180
Somatodyspraxia	180
Assessing Sensory Modulation	181
Observation	182
History Taking	182
ASSESSING SENSORY INTEGRATIVE DYSFUNCTION WITHOUT THE SIPT	183
Sensory Integration Theory Revisited	184
Assessing Praxis	184
Assessment of Sensory Discrimination	185
Assessment of Sensory Modulation Disorders	187
Limitations of Using Alternative Tests	187
SUMMARY AND CONCLUSION	188
REFERENCES	188
APPENDIX 17-1: CLINICAL OBSERVATIONS OF NEUROMOTOR PERFORMANCE, EVALUATION OF SENSORY PROCESSING, AND TOUCH INVENTORY OF ELEMENTARY SCHOOL CHILDREN	191

8. Interpreting Test Scores and Observations: A Case Example

Anita C. Bundy, ScD, OTR, FAOTA and Anne G. Fisher, ScD, OTR, FAOTA

PURPOSE AND SCOPE	199
THE REFERRAL AND DEVELOPMENTAL HISTORY	200
THE EVALUATION	201
CLASSROOM OBSERVATION	201
Sensory Integration and Praxis Tests	202
Additional Testing and Observation	202
Other Information	203
INTERPRETING THE RESULTS	203
Meaningful Clusters	204
Using the Interpretation Worksheet	204
The Final Stage of Interpretation	206
REPORTING THE RESULTS	206
SUMMARY AND CONCLUSION	208

REFERENCES 209

9. The Process of Planning and Implementing Intervention*Anita C. Bundy, ScD, OTR, FAOTA*

PURPOSE AND SCOPE 212

KYLE REVISITED 212

SETTING GOALS AND DEVELOPING OBJECTIVES 213

Modifying Kyle's Expectations about Himself 213

An Aside about Defining Objectives 214

Improving Kyle's Motor Skills 214

Specifying Criteria for Objectives 214

Improving Kyle's Behavior 215

Creating Criteria 215

Summary of the Intervention Plan 215

DETERMINING TYPES OF SERVICE DELIVERY 216

DEVELOPING PRELIMINARY IDEAS FOR USE IN INTERVENTION 216

Selecting Activities 216

Physical Layout of the Clinic 218

Thinking about Interactions 218

PROVIDING INTERVENTION 219

The First Direct Intervention Session 219

One Week Later 221

Six Weeks Later 222

An Aside about Intervention 222

Monitoring: Developing a Home Program 223

10. Play Theory and Sensory Integration*Anita C. Bundy, ScD, OTR, FAOTA*

IN CELEBRATION OF PLAY 228

PURPOSE AND SCOPE 228

DEFINING PLAY FOR PLAYFUL INTERVENTION 228

Relative Intrinsic Motivation 230

Relative Internal Control 231

Relative Freedom from Some Constraints of Reality 232

SETTING UP THE ENVIRONMENT TO SUPPORT PLAY 233

THE POTENTIAL OF PLAY IN THERAPY 233

THE CONTRIBUTION OF SENSORY INTEGRATION TO PLAY 235

The Implications of Sensory Integration Theory 235

Research on Play and Sensory Integration 235

What Sensory Integration Theory and Play Research Do Not
(or Cannot) Tell Us 236PRINCIPLES FOR ASSESSING PLAY AND TREATING PLAY DEFICITS IN CLIENTS WITH
SENSORY INTEGRATIVE DYSFUNCTION 237

SUMMARY AND CONCLUSION 238

REFERENCES 239

11. Orchestrating Intervention: The Art of Practice

Anita C. Bundy, ScD, OTR, FAOTA and Jane A. Koomar, PhD, OTR, FAOTA

PURPOSE AND SCOPE	242
DECIDING WHAT TO TARGET FIRST	242
THERAPIST-CLIENT RELATIONSHIPS	245
The Therapeutic Alliance	245
ESTABLISHING A SAFE ENVIRONMENT	246
INCORPORATING COMPETITION	247
ASSUMING PRETEND ROLES	248
VOICING PRAISE, FEEDBACK, AND INSTRUCTIONS	248
CREATING THE JUST-RIGHT CHALLENGE	249
BALANCING FREEDOM WITH STRUCTURE	249
STRIVING TO FIND INNER DRIVE	250
TO MODIFY OR DISCONTINUE: WHEN THE PRACTITIONER WANTS A CHANGE	251
HELPING CLIENTS UNDERSTAND SENSORY INTEGRATIVE DYSFUNCTION	254
MAKING EVERYDAY LIFE EASIER	255
DISCONTINUING INTERVENTION	257
BECOMING AN ARTIST	258
SUMMARY AND CONCLUSION	259
REFERENCES	259

12. Creating Direct Intervention from Theory

Jane A. Koomar, PhD, OTR, FAOTA and Anita C. Bundy, ScD, OTR, FAOTA

PURPOSE AND SCOPE	261
ACTIVITIES THAT OFFER ENHANCED SENSATION	262
Enhanced Vestibular and Proprioceptive Sensation	262
Enhanced Tactile Sensation	262
SENSORY MODULATION DYSFUNCTION	263
Sensory Defensiveness	263
Underresponsiveness to Sensation	263
Sensory-Based Interventions	264
Case Study	264
Activities Providing Enhanced Tactile Sensation (Deep Pressure) and Proprioception	265
General Guidelines for Providing Tactile and Proprioceptive Experiences	268
Special Notes on Vibration	269
Special Notes on Activity Directed at the Mouth and Face	269
Non-Sensory-Based Programs	269
Sucking, Swallowing, and Breathing	269
The Matrix Model	270
Case Study	271
INTERVENTION FOR GRAVITATIONAL INSECURITY	272
General Guidelines	272
Suggested Activities	272
INTERVENTION FOR AVERSION RESPONSES TO MOVEMENT	275
INTERVENTION FOR POOR SENSORY DISCRIMINATION	276
Decreased Discrimination of Vestibular and Proprioceptive Sensation	276
Targeting Processing Related to the Otolith Organs	277

Targeting Processing Related to Muscle Receptors	277
Targeting Processing Related to Semicircular Canals	277
When Clients Seem Not to Respond to but Crave Input	278
Precautions	278
Decreased Discrimination of Tactile Sensation	279
Multiple Processing Problems	280
Balancing Intervention for Modulation and Discrimination Difficulties	280
INTERVENTION FOR IMPROVING POSTURE	280
Developing Tonic Postural Extension	281
Developing Tonic Flexion	282
Combining Flexion and Extension: Developing Lateral Flexion and Rotation	284
Balancing Flexion and Extension: Developing Alternating Movements	284
Developing Righting and Equilibrium Reactions	285
Developing Oculomotor Control	286
INTERVENTION FOR PRACTIC DISORDERS	286
Developing Ideation	286
Developing Coordinated Use of Two Sides of the Body	287
Discrete versus Sequenced Bilateral Movements	287
Symmetrical versus Alternating Bilateral Movements	287
Coordinated Bilateral Use of Arms and Legs	287
Inhibition of Movement	288
Crossing the Midline	289
Projected Action Sequences	289
Activities to Promote Sequencing	293
Addressing Somatodyspraxia	293
INTERVENTION WITH CLIENTS WHO HAVE AUTISM	294
Levels of an Adaptive Response	294
Case Study	295
PRACTICAL CONSIDERATIONS FOR PROVIDING SAFE AND EFFECTIVE INTERVENTION	296
Client's Age	296
Direct Intervention: How Long and How Often	296
Therapist-to-Client Ratio	297
Designing Adequate Space and Suspension Systems	297
ESTABLISHING INTERVENTION PROGRAMS BASED ON SENSORY INTEGRATION THEORY	298
THIRD-PARTY REIMBURSEMENT FOR SERVICES	299
CONTINUING EDUCATION	300
SUMMARY AND CONCLUSION	300
REFERENCES	301
APPENDIX 12-A	303
APPENDIX 12-B	306

13. Using Sensory Integration Theory in Schools: Sensory Integration and Consultation

Anita C. Bundy, ScD, OTR, FAOTA

PURPOSE AND SCOPE	310
DETERMINING EDUCATIONAL RELEVANCE	310
DETERMINING APPROPRIATE SERVICE DELIVERY	310
CONSULTATION IN SCHOOLS	311
Reframing	311
Developing New Strategies	312

Consultation with a Teacher: A Case Example 313

STAGES IN CONSULTATION 315

Stage I: Formulating Expectations 316

Stage II: Establishing a Partnership 317

Testing and Adjusting Expectations 318

Refining the Problem 319

Reframing the Problem 319

Identifying Obstacles 319

Stage III: Planning Strategies 320

Stage IV: Implementing and Assessing the Plan 321

RESOURCES REQUIRED FOR CONSULTATION 321

SUMMARY AND CONCLUSION 321

APPENDIX 13-A: PART I 323

Part II 331

14. Alternative and Complementary Programs for Intervention 333

THE WILBARGER APPROACH TO TREATING SENSORY DEFENSIVENESS 335

Julia Wilbarger, MA, MS, OTR and Patricia Wilbarger, MEd, OTR, FAOTA

Background 335

Rationale 335

Description 336

Education and the Promotion of Awareness 336

Sensory Diet 336

Professionally Guided Intervention 336

Relationship to Sensory Integration and Occupation 337

Populations for Which the Wilbarger Approach Is Appropriate 337

Training Recommended or Required 338

Summary 338

CLINICAL APPLICATION OF THE SENSORY DIET 339

Julia Wilbarger, MA, MS, OTR and Patricia Wilbarger, Med, OTR, FAOTA

Background 339

Rationale 339

Description 340

Relationship to Sensory Integration and Occupation 341

Population for Whom the Sensory Diet Is Intended 341

Benefits of the Sensory Diet 341

Training Recommended or Required 341

Summary 341

"HOW DOES YOUR ENGINE RUN?": THE ALERT PROGRAM FOR SELF-REGULATION 342

Sherry Shellenberger, OTR/L and Mary Sue Williams, OTR/L

Background 342

Rationale 342

Description 343

Relationship to Sensory Integration and Occupation 344

Population for Whom the Alert Program Is Appropriate 344

Training Recommended Or Required	345
WATER-BASED INTERVENTION	345

Gudrun Gjering

Background	345
Rationale	346
Description	346
Relationship to Sensory Integration and Occupation	347
Populations for Whom Water-Based Intervention Is Appropriate	347
Sensory Input	347
Benefits of Water-Based Intervention	348
Training Recommended or Required	348
An Example: "The Alarm Clock"	348
HIPPOTHERAPY	350

Nancy Lawton-Shirley, OTR

BACKGROUND	350
RATIONALE	350
DESCRIPTION	350
RELATIONSHIP TO SENSORY INTEGRATION AND OCCUPATION	351
POPULATIONS FOR WHOM HIPPOThERAPY IS APPROPRIATE	351
SENSORY INPUT	351
BENEFITS OF HIPPOThERAPY	352
TRAINING RECOMMENDED OR REQUIRED	353
SUMMARY	353
OCULOMOTOR CONTROL: AN INTEGRAL PART OF SENSORY INTEGRATION	353

Mary Kavar, MS, OTR

Background	353
Rationale	354
Description	354
Oculomotor-Vestibular-Proprioceptive Intervention Strategies	355
Relationship to Sensory Integration and Occupation	356
Populations for Whom the Oculomotor Control Program Is Appropriate	357
Training Recommended or Required	357
Summary	357
THERAPEUTIC LISTENING: AN OVERVIEW	358

Sheila Frick, OTR

Background	358
Rationale	358
Description	359
Relationship to Sensory Integration and Occupation	359
Populations for Whom Therapeutic Listening Is Appropriate	359
Benefits of Therapeutic Listening	360
Training Recommended or Required	360
An Example	360
Summary	360

CRANIOSACRAL THERAPY AND MYOFASCIAL RELEASE	361
--	------------

Nancy Lawton-Shirley, OTR

Background and Rationale	361
--------------------------	-----

Description 362
Relationship to Sensory Integration and Occupation 362
Populations for Whom CST and MFR Are Appropriate 362
Benefits 363
Training Recommended or Required 364
Summary 364

ENVIRONMENT AS A MILIEU FOR INTERVENTION: THE FARM 364

Lois Hickman, MS, OTR, FAOTA and Lynne Harkness, MS, OTR

Background 364
Rationale 365
Description 365
Relationship to Sensory Integration and Occupation 365
Populations for Whom Farm-Based Intervention Is Appropriate 366
Benefits 366
An Example 367
Training Recommended or Required 367
Summary 367

SUMMARY AND CONCLUSIONS 367
REFERENCES 368

15. Integrating Sensory Integration with Other Approaches to Intervention 371

Marie E. Anzalone, ScD, OTR, FAOTA and Elizabeth A. Murray, ScD, OTR/L, FAOTA

PURPOSE AND SCOPE 373

OTHER APPROACHES TO INTERVENTION 373

Developmental Approaches to Intervention 373
Sensorimotor Approaches 375
Neurodevelopmental Intervention 376
Sensory Stimulation 377
Behavioral or Learning Theory 378

16. Advances in Sensory Integration Research 397

Shelley Mulligan, PhD, OTR

PURPOSE AND SCOPE 397

RESEARCH EXAMINING THE VALIDITY OF SENSORY INTEGRATION 397

Sensory Integration: A Process Approach
Sensory Integration: A Theory Based on Central Nervous System
Plasticity and Hierarchical Concepts 399

Sensory Integration: A Component of Sensory Processing	400
RESEARCH EXAMINING SENSORY INTEGRATIVE DYSFUNCTION	401
Sensory Integrative Dysfunction and Other Diagnostic Labels	401
Types of Sensory Integrative Disorders	402
RESEARCH EVALUATING INTERVENTION BASED ON SENSORY INTEGRATION THEORY	403
Studies of Classic Sensory Integration Intervention	403
Studies of Nontraditional Sensory Integration Intervention	405
DIRECTIONS FOR FURTHER RESEARCH	406
SUMMARY AND CONCLUSIONS	408
REFERENCES	408

17. Sensory Integration and Occupation 413

<i>L. Diane Parham, PhD, OTR, FAOTA</i>	
PURPOSE AND SCOPE	413
A BRIEF INTRODUCTION TO OCCUPATIONAL SCIENCE	414
DEFINING OCCUPATION	414
MULTIDIMENSIONALITY OF OCCUPATION	414
LINKING SENSORY INTEGRATION TO OCCUPATION	416
Does Poor Sensory Integration Cause Occupational Problems?	418
Evidence that Sensory Integration Influences Occupation	419
Sensory Integration and Academic Achievement	419
Sensory Integration and Occupations in Adulthood	421
CAN ENGAGEMENT IN OCCUPATION INFLUENCE SENSORY INTEGRATION?	424
IMPLICATIONS FOR CLINICAL PRACTICE	427
Future-Oriented Top-Down Assessment	427
Considerations of Intervention Options	429
Intervention Can Be Both Occupation Centered and Sensory Based	430
