PREFACE	ix
CUMULATIVE LISTING OF VOLUMES IN SERIES	xiii
CHAPTER 1 DEFINITIONS AND HISTORY	1
1.1 Introduction	1
1.2 Definitions	6
1.3 Historical Perspectives	11
1.4 Modern Perspectives	16
1.5 Analysis and Specifications	18
CHAPTER 2 CHEMICAL COMPOSITION	25
2.1 Introduction	25
2.2 Ultimate (Elemental) Composition	26
2.3 Chemical Composition	29
CHAPTER 3 CLASSIFICATION	61
3.1 Introduction	61
3.2 Classification Systems	63
3.3 Miscellaneous Systems	77
CHAPTER 4 PHYSICAL PROPERTIES	85
4.1 Introduction	85
4.2 Elemental (Ultimate) Analysis	91
4.3 Metal Content	97
4.4 Density, Specific Gravity, and API Gravity	101
4.5 Viscosity	109
4.6 Surface and Interfacial Tension	118

CHAPTER 5	THERMAL PROPERTIES	127
5.1	Introduction	127
5.2	Volatility	127
5.3	Liquefaction and Solidification	142
5.4	Carbon Residue	147
5.5	Aniline Point	150
5.6	Specific Heat	151
5.7	Latent Heat	152
5.8	Enthalpy or Heat Content	156
5.9	Thermal Conductivity	156
5.10	Pressure-Volume-Temperature Relationships	157
5.11	Heat of Combustion	158
5.12	Critical Properties	160
CHAPTER 6	ELECTRICAL AND OPTICAL PROPERTIES	165
6.1	Introduction	165
6.2	Electrical Properties	166
6.3	Optical Properties	170
CHAPTER 7	SPECTROSCOPIC METHODS	175
7.1	Introduction	175
7.2	Infrared Spectroscopy	177
7.3	Nuclear Magnetic Resonance	180
7.4	Mass Spectrometry	186
7.5	Ultraviolet Spectroscopy	192
7.6	X-Ray Diffraction	192
CHAPTER 8	CHEMICAL METHODS	197
8.1	Introduction	197
8.2	Functional Group Analysis	200
8.3	Hydrogenation	205
8.4	Oxidation	211
8.5	Halogenation	214
8.6	Thermal Methods	216
8.7	Miscellaneous Methods	219

CHAPTER 9 FRACTIONAL COMPOSITION	223
9.1 Introduction	223
9.2 Distillation	225
9.3 Solvent Treatment	234
9.4 Adsorption	244
9.5 Chemical Methods	254
CHAPTER 10 CHROMATOGRAPHIC ANALYSIS	263
10.1 Introduction	263
10.2 Gas Chromatography	265
10.3 Simulated Distillation	271
10.4 Adsorption Chromatography	273
10.5 Gel Permeation Chromatography	280
10.6 Ion-Exchange Chromatography	284
10.7 High-Performance Liquid Chromatography	287
10.8 Supercritical Fluid Chromatography	288
10.9 Thin-Layer Chromatography	290
CHAPTER 11 STRUCTURAL GROUP ANALYSIS	297
11.1 Introduction	297
11.2 Physical Property Methods	300
11.3 Spectroscopic Methods	315
11.4 Methods for Heteroatom Systems	332
CHAPTER 12 MOLECULAR WEIGHT	343
12.1 Introduction	343
12.2 Methods for Molecular Weight Measurement	344
12.3 Molecular Weights of Volatile Fractions	355
12.4 Molecular Weights of Nonvolatile Fractions	356
CHAPTER 13 INSTABILITY AND INCOMPATIBILITY	371
13.1 Introduction	371
13.2 Instability and Incompatibility Assessment	378
13.3 Direct Test Methods	382
13.4 Indirect Test Methods	389

CHAPTER 14 USE OF THE DATA—THE STRUCTURE OF PETROLEUM	403
14.1 Introduction	403
14.2 The Structure of Petroleum	405
14.3 The Stability/Instability of the Crude Oil System	414
CHAPTER 15 USE OF THE DATA—MAPPING AND PREDICTABILITY	427
15.1 Introduction	427
15.2 Feedstock Mapping	429
15.3 Epilog	451
GLOSSARY	453
INDEX	477
