|                                   |     |
|-----------------------------------|-----|
| Connections: Maria Goeppert Mayer | xiv |
| Preface                           | xv  |

## 0 The Analytical Process 1

|   |   |
|---|---|
| How Does a Home Pregnancy Test Work?                | 1 |
| 0-1 The Analytical Chemist's Job                    | 2 |
| 0-2 General Steps in a Chemical Analysis            | 8 |
| <b>BOX 0-1</b> Constructing a Representative Sample | 8 |

## 1 Chemical Measurements 10

|   |    |
|---|----|
| Biochemical Measurements with a Nanoelectrode           | 10 |
| 1-1 SI Units  | 10 |
| 1-2 Chemical Concentrations                             | 13 |
| 1-3 Preparing Solutions                                 | 16 |
| 1-4 Stoichiometry Calculations for Gravimetric Analysis | 18 |

## 2 Tools of the Trade 24

|  |    |
|--|----|
| Quartz Crystal Microbalance Measures One Base Added to DNA | 24 |
| 2-1 Safe, Ethical Handling of Chemicals and Waste          | 25 |
| 2-2 The Lab Notebook                                       | 25 |
| 2-3 Analytical Balance                                     | 26 |
| 2-4 Burets   | 29 |
| 2-5 Volumetric Flasks                                      | 31 |
| 2-6 Pipets and Syringes                                    | 32 |
| 2-7 Filtration   | 36 |
| 2-8 Drying   | 37 |
| 2-9 Calibration of Volumetric Glassware                    | 38 |
| 2-10 Introduction to Microsoft Excel®                      | 39 |
| 2-11 Graphing with Microsoft Excel                         | 42 |
| <b>REFERENCE PROCEDURE</b> Calibrating a 50-mL Buret       | 45 |

## 3 Experimental Error 46

|  |    |
|--|----|
| Experimental Error   | 46 |
| 3-1 Significant Figures  | 46 |
| 3-2 Significant Figures in Arithmetic                                      | 47 |
| 3-3 Types of Error   | 49 |
| <b>BOX 3-1</b> Case Study in Ethics: Systematic Error in Ozone Measurement | 50 |
| <b>BOX 3-2</b> Certified Reference Materials                               | 51 |
| 3-4 Propagation of Uncertainty from Random Error                           | 52 |
| 3-5 Propagation of Uncertainty from Systematic Error                       | 58 |
| <b>BOX 3-3</b> Atomic Masses of the Elements                               | 59 |

## 4 Statistics 64

|  |    |
|--|----|
| Is My Red Blood Cell Count High Today?                       | 64 |
| 4-1 Gaussian Distribution                                    | 65 |
| 4-2 Comparison of Standard Deviations with the <i>F</i> Test | 69 |
| <b>BOX 4-1</b> Choosing the Null Hypothesis in Epidemiology  | 71 |
| 4-3 Confidence Intervals                                     | 71 |
| 4-4 Comparison of Means with Student's <i>t</i>              | 74 |
| 4-5 <i>t</i> Tests with a Spreadsheet                        | 79 |
| 4-6 Grubbs Test for an Outlier                               | 80 |
| 4-7 The Method of Least Squares                              | 81 |
| 4-8 Calibration Curves                                       | 84 |
| <b>BOX 4-2</b> Using a Nonlinear Calibration Curve           | 86 |
| 4-9 A Spreadsheet for Least Squares                          | 87 |

## 5 Quality Assurance and Calibration Methods 95

|  |     |
|--|-----|
| The Need for Quality Assurance   | 95  |
| 5-1 Basics of Quality Assurance  | 96  |
| <b>BOX 5-1</b> Medical Implication of False Positive Results               | 97  |
| <b>BOX 5-2</b> Control Charts  | 99  |
| 5-2 Method Validation  | 100 |
| <b>BOX 5-3</b> The Horwitz Trumpet: Variation in Interlaboratory Precision | 104 |
| 5-3 Standard Addition  | 106 |
| 5-4 Internal Standards   | 109 |

## 6 Chemical Equilibrium 119

|   |     |
|---|-----|
| Chemical Equilibrium in the Environment                                   | 119 |
| 6-1 The Equilibrium Constant  | 120 |
| 6-2 Equilibrium and Thermodynamics  | 121 |
| 6-3 Solubility Product  | 124 |
| <b>BOX 6-1</b> Solubility Is Governed by More Than the Solubility Product | 125 |
| <b>DEMONSTRATION 6-1</b> Common Ion Effect                                | 125 |
| 6-4 Complex Formation   | 126 |
| <b>BOX 6-2</b> Notation for Formation Constants                           | 127 |
| 6-5 Protic Acids and Bases  | 129 |
| 6-6 pH  | 132 |
| 6-7 Strengths of Acids and Bases  | 133 |
| <b>DEMONSTRATION 6-2</b> The HCl Fountain                                 | 134 |
| <b>BOX 6-3</b> The Strange Behavior of Hydrofluoric Acid                  | 135 |
| <b>BOX 6-4</b> Carbonic Acid  | 137 |

|   |            |  |            |
|---|------------|--|------------|
| <b>7 Let the Titrations Begin</b>   | <b>145</b> | 10-5 Fractional Composition Equations  | 223        |
| Titration on Mars   | 145        | <b>BOX 10-3</b> Microequilibrium Constants   | 224        |
