

## CONTENTS:

<p>INTRODUCTION ..... 1</p> <p style="text-align: center;">Chapter I.</p> <p>SPERMATOGENESIS OF THE CRAY-FISH (<i>ASTACUS FLUVIATILIS</i>) .... 9</p> <p style="padding-left: 2em;"><i>a) Organization of the spermatocytes</i>.. 10</p> <p>1. Chondrioma ..... 10</p> <p>2. The mitotic apparatus ..... 12</p> <p>3. The nucleus of the spermatocytes ... 14</p> <p>4. On the origin of the first maturation spindle ..... 16</p> <p style="padding-left: 2em;">To the literature on the origin of the spindle ..... 18</p> <p>5. The finished spindle during the metaphase ..... 19</p> <p>6. The number of chromosomes ..... 20</p> <p>7. The Anaphase ..... 21</p> <p style="padding-left: 2em;"><i>b) The organization of the praespermatids</i> ..... 24</p> <p>8. Abnormal mitoses of the spermatocytes and praespermatids ..... 26</p> <p style="padding-left: 2em;"><i>c) The spermatids</i> ..... 28</p> <p>9. The transformation of the chondrioma into a cup or vesicle ..... 29</p> <p>10. The changes of the mitotic apparatus in the spermatids ..... 31</p> <p>11. The basal cone of the cup ..... 31</p> <p>12. Some observations upon the literature on the spermatids of the crayfish 32</p> <p>13. The organization of the tubules at the time of the last stages of spermatids ..... 35</p> <p style="padding-left: 2em;"><i>d) Young stage of spermatozoa</i> ..... 35</p> <p>SUMMARY AND DISCUSSION OF THE SPERMATOGENESIS OF THE CRAYFISH ..... 39</p> <p>INDEX TO THE LITERATURE ON THE SPERMATOGENESIS OF <i>ASTACUS FLUVIATILIS</i> ..... 45</p>	<p style="text-align: center;">Chapter II.</p> <p>THE DEVELOPMENT OF THE CLEAVAGE AND MATURATION-SPINDLE OF <i>ASCARIS MEGALOCEPHALA</i> .. 47</p> <p>1. The dispersion of the centriolar apparatus in the contents of the egg .... 48</p> <p>2. The equatorial ring ..... 50</p> <p>3. The central or axial spindle ..... 50</p> <p>4. On the origin of the fibres of the mantle spindle ..... 53</p> <p>5. The formation of the third, inner or perinetal spindle ..... 57</p> <p>6. The Anaphase of the cleavage-spindles ..... 60</p> <p>7. The central spindle during the anaphase ..... 62</p> <p>8. Remarks on the structures of the egg during the division of the nucleus .. 62</p> <p>9. Stage of the first two blastomeres .. 64</p> <p>10. Boveri's interpretation of the origin of the centrioles („centrosomes“) ... 66</p> <p>11. The second cleavage-spindle ..... 67</p> <p>12. Data, proving the existence of the perinetal spindle ..... 68</p> <p>13. On the origin and organization of the maturation spindle in <i>Ascaris megalocephala</i> ..... 69</p> <p style="padding-left: 2em;">a) The first maturation spindle .... 72</p> <p style="padding-left: 2em;">b) The second maturation spindle .. 75</p> <p>14. Comparison of the cleavage and maturation-spindle ..... 77</p> <p>15. Remarks on the structures of the chromosomes at the time of maturation in <i>Ascaris megalocephala</i> ..... 79</p> <p>16. Development of the Chromosomes in the pronuclei and in the metaphase of the first division in <i>Asc. megalocephala bivalens</i> ..... 82</p>
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

SUMMARY AND DISCUSSION OF THE STRUCTURES OF THE EGG OF ASC. MEGALOCEPHALA IN CLEAVAGE AND MATURATION PERIOD .....	88
INDEX TO THE BIBLIOGRAPHY OF THE DEVELOPMENT OF THE CLEAVAGE AND MATURATION SPINDLE OF THE EGG OF ASCARIS MEGALOCEPHALA .....	94

### Chapter III.

THE STRUCTURES AT THE POLES OF THE NUCLEI IN REST-STAGE AND OF THE CLEAVAGE SPINDLE IN RHYNCHELMIS LIMOSELLA HOFM .....	97
-------------------------------------------------------------------------------------------------------------------------	----

1. The scattering of the centrioles and centrosomes during the cell divisions ..... 98
2. The central spindle ..... 100
3. On the origin of the cleavage spindle 100
4. A new type of cleavage spindle in *Rhynchelmis* ..... 102  
Signification of the astral rays in the development of the cell-contents .. 103  
The new cell substance and its components ..... 11  
The origin of the mitotic apparatus 114

### Appendix to Chapter III.

- I. Discussion on the number of centrioles and on the mitotic apparatus respectively in the organization of the germ and somatic cells ..... 115
- II. Summary and discussion on the cell substance in the eggs and blastomeres of *Rhynchelmis* .... 127
- Index to the Literature of Chapter III. .... 131

### Chapter IV.

ON THE STRUCTURES AND DEVELOPMENT OF THE SOMATIC CELLS IN ANGIOSPERMOUS PLANTS ....	135
-------------------------------------------------------------------------------------	-----

1. The structures in living objects .... 136
2. Products of the mitochondria ..... 139

3. The structure and development of the chromosomes in the celled of some of the higher plants ..... 146
  - a) The telophase in *Allium cepa* and *Vicia faba* ..... 148
  - b) The interkinesis ..... 153
  - c) The so-called rest nucleus ..... 155
  - d) Remarks upon the literature on the structures of the telophase and rest nuclei .. ..... 157
4. The rest nuclei above the meristeme of the roots in *Allium cepa* ..... 161
5. The prophase ..... 165
6. The fusion of the prophase hyalomeseres into a common chromatic sheath ..... 166
7. The splitting of the chromosomes ... 169
8. The mitotic apparatus and the caryokinesis in *Allium porrum* ..... 173
  - a) The mitotic apparatus in the late anaphase of *Allium porrum* .... 177
  - b) The mitotic and centriolar apparatus of the daughter cells ..... 179
  - c) The cycle of development of the mitotic apparatus in *Allium porrum* ..... 182

SUMMARY AND DISCUSSION OF THE STRUCTURE AND DEVELOPMENT OF CELLS IN THE HIGHER PLANTS (ANGIOSPERMS) .....	183
-----------------------------------------------------------------------------------------------------------	-----

INDEX TO THE LITERATURE ON THE STRUCTURE AND DEVELOPMENT OF SOMATIC CELLS OF PHANEROGAMS .....	191
------------------------------------------------------------------------------------------------	-----

### Chapter V.

THE SPERMATOGENESIS OF THE ROCK KANGAROO (PETROGALE) AND OF THE GUINEA-PIG (CAVIA) 195
----------------------------------------------------------------------------------------

#### I.

1. The nutritive syncytium in the Guinea-pig..... 197
2. The nutritive syncytium and the lipoids ..... 200
3. The nuclei of the nutritive syncytium of *Cavia* ..... 202
4. The nuclei of *Petrogale* ..... 203

II. The Spermatogonia..	205
1. Introduction .....	205
2. The distribution of the spermatogonia of Petrogale and Cavia.....	207
3. The organization of the large spermatogonia .....	207
4. The chromocentres in the nuclei of Petrogale .....	209
5. The origin of the chromocentres in the secondary spermatogonia.....	211
III. Origin of the Spermatocytes ..	213
1. Amphi-chromocentres in Petrogale..	213
2. On the origin of the amphinemes in Petrogale and Cavia.....	214
3. The growth of the Spermatocytes. Origin of „Synapsis“.....	216
4. The longitudinal union or copulation of amphitene chromosomes.....	219
5. Changes in the structure of the pachyspireme of Petrogale.....	220
6. The pachyspirem of Cavia.....	223
IV. Neophase leading to the formation of strepsinemes.....	
a) Petrogale .....	224
b) The strepsinemes in Cavia.....	231
V. The profase tetrads and the origine of the first maturation spindle of Petrogale.....	232
VI. The early and late anaphase in Petrogale. The mitotic apparatus in Petrogale and in Guinea-pig .....	236
VII. The Praespermatids	
1. Development of the dyads preceding the second maturation division.	239
2. The rudiments of the maturation spindle in praespermatids.....	242
3. The praespermatids in Cavia.....	242
4. Erratic dyads in the cell-substance of the praespermatids .....	243
VIII. The structures of the cell-substance in the spermatogonia, spermatocytes and spermatids of Cavia .....	243

The mitochondria in the spermatocytes of Cavia.....	245
IX. The Spermatids .....	246
a) The spermatids of Petrogale.....	246
b) The spermatids of Cavia.....	248
c) The development of the „acrosome“ and perforatorium of Cavia .....	250
X. The fate of the mitotic apparatus in Petrogale.....	252
XI. The centriolar apparatus in Petrogale .....	257
XII. The centriolar apparatus in the Spermatids of Cavia .....	261
XIII. The sheath or cuff of the axial filament.....	264
XIV. The breaking up of the cuff.	266
XV. The structures of the nucleus in the last stages of the Spermatids .....	268
The mature spermatozoa in epididymis .....	269
INDEX TO THE BIBLIOGRAPHY OF THE SPERMATOGENESIS OF MAMMALS.....	271

Chapter VI.

GENERAL SUMMARY AND DISCUSSION OF THE ORGANIZATION AND THE GENETIC CONTINUITY OF THE CELL CONSTITUENS.	
1. The vegetable cytoplasm.....	277
2. The cytoplasm of the animal cells...	280
3. Relations between the centriolar apparatus and the cytoplasm.....	293
4. The mitotic apparatus.....	298
5. Considerations of the chromatic substance and especially on the reduction of the chromosomes.....	306
INDEX TO THE BIBLIOGRAPHY OF THE ORGANISATION AND GENETIC CONTINUITY OF THE CELL CONSTITUENS .....	320
INDEX OF THE AUTHORS.....	322
INDEX OF SUBJECTS. EXPLANATION OF PLATE.
