G. Damian Brusko, Michael Y. Wang
- Explaining Variability in Cognitive Outcomes From Subthalamic Stimulation: Motor Territory Stimulation Produces Nonmotor Benefit** E182
R. Mark Richardson

On the Cover

This month's cover features 'White Matter 1' by Laura Bundesen, a hand-embroidered mixed-media piece inspired by conversations with Dr Taryn Bragg, a pediatric neurosurgeon who has been encouraging Laura's exploration of neuro art since 2016. By stitching together art and neuroscience, Laura seeks to educate and to inspire those who suffer from brain injury or illness and their caregivers. When she is not in her art studio in Western Massachusetts, Laura works as a sponsored research officer at Mount Holyoke College supporting faculty in their quest for research funding. Visit her website at LauraBundesen.com for more information. See more whimsical brain art from Laura and others throughout this issue. This image: © Laura Bundesen, all rights reserved, used with permission. Photography credit: John Polak.
