People on the move

Recent appointments in the industry

MINT & BRIC

12

Growing industry

An update on projects under construction or recently developed in the MINT and BRIC territories

15

Sediment studies in Mexico

Analysing sedimentation by comparing two dammed and two undammed rivers on Mexico's Pacific coast

Safety

16

Geotechnical reinforcements

Engineers Australia and Geofabrics recently co-hosted a seminar focusing on the safe construction of tailings dams

20

Spillway gated systems - Is safe, safe enough?

A look at probabilistic risk analysis of gated systems

24

Safety compliance

In its recent report the EA says that compliance with safety legislation is improving but there is still work to do

26

Sharing experiences

New dam failure case studies and 'lessons learned'

Training & education

28

Mentoring scheme

The British Dam Society (BDS) will launch its mentoring scheme in September 2019

30

Together we are stronger

Female employees in the North American industry shared their thoughts about taking part in mentorship programmes

32

The Summer Interns

EMEC in Scotland gives students hands-on experience of marine renewables

Inspection

34

Spotlight on Seamor

Seamor Marine's development

38

Robotics and dam safety

Focus on Saab Seaeye's Falcon

Machinery

40

New and improved

New product releases

42

Bearing up at Raanaasfoss

Water-lubricated bearings prove their worth in Norway

Project profile

44

Sharing the original renewable resource

Spotlight on Settle Hydro
