Series Editor's Foreword	xi
Preface	xiii
Notation and definitions	xxi
1 Introduction	1
1.1 The four main centres	1
1.2 Locus arguments	2
1.3 Homothetic figures	3
1.4 Centres of mass	5
1.5 Shifting the focus	6
1.6 Cyclic quadrilaterals	7
2 The principal triangle centres	9
2.1 The circumcentre and circumcircle	9
2.2 The centroid	14
2.3 The incentre and excentres	15
2.4 The orthocentre	20
2.5 Fagnano's problem	23
3 The Euler line	27
3.1 An important collinearity	27
3.2 The nine-point circle	28
3.3 Distances between triangle centres	31
3.4 Orthocentric quadrilaterals	34
3.5 Three more points on the Euler line	36
3.6 The power of a point	37

4	Simson lines	41
4.1	The Simson line	41
4.2	Another look at the nine-point circle	46
4.3	Miquel circles	48
5	Cross-ratio	51
5.1	The cross-ratio of a range	51
5.2	The cross-ratio of a pencil	56
5.3	Harmonic ranges	59
5.4	Centres of similitude	63
5.5	Apollonius circles	64
5.6	The complete quadrangle	66
6	Cevians and pedal triangles	69
6.1	Ceva and Menelaus	69
6.2	Centres of similitude	75
6.3	Pedal triangles	77
7	Conjugates	81
7.1	Three types of conjugacy	81
7.2	Characterising isogonal conjugates	84
7.3	Isogonal conjugates and pedal triangles	88
7.4	Isotomic and cyclocevian conjugates	90
7.5	Pedal-cevian points	92
7.6	Droz-Farny circles	93
8	The symmedian point	99
8.1	Symmedians	99
8.2	Parallels and antiparallels	103
8.3	Quadrangles	108
8.4	Pedal properties	110
9	Centres related to the incentre	113
9.1	The Gergonne point	113
9.2	The Nagel point	114
9.3	The Spieker centre and circle	116
9.4	A notation for triangle centres	119
9.5	The Fuhrmann circle	120
9.6	The Bevan point	122
9.7	The Adams circle	123

9.8	Barycentric coordinates	124
10	Triangles in perspective	127
10.1	Desargues' theorem	127
10.2	Duality	132
10.3	Pascal's theorem	136
10.4	Three triangles in perspective	139
11	The isogonic centres	143
11.1	Isogonic centres	144
11.2	Kiepert's theorem	147
11.3	The Napoleon points	149
11.4	The Lester circle	151
12	The Vecten and Kosnita points	157
12.1	The Vecten points	157
12.2	Flanks	160
12.3	The Kosnita triangle	162
12.4	Three homothetic triangles	166
13	Circumcevian triangles	171
13.1	Forming circumcevian triangles	171
13.2	The circumorthic triangle	173
13.3	The circummedial triangle	177
13.4	The circummidarc triangle	180
14	The Morley configuration	185
14.1	Morley's theorem	185
14.2	External trisectors	190
14.3	The lighthouse theorem	194
14.4	More equilateral triangles	195
15	Spiral similarities	199
15.1	Spiral similarity	199
15.2	Finding the centre	201
15.3	Triangles of correspondence	204
15.4	The circle of similitude	208
15.5	The invariable points	212

16 Brocard geometry	217
16.1 The Brocard points	217
16.2 The Brocard triangles and circle	221
16.3 Brocard triangles and perspective	227
16.4 The Brocard configuration and spiral similarities	230
16.5 The Steiner and Tarry points	234
17 Lemoine, Tucker and Taylor circles	237
17.1 Lemoine circles	237
17.2 Miquel points	241
17.3 Tucker circles	244
17.4 Tucker centres	247
17.5 The Taylor circle	248
18 Poles, polars and radical axes	251
18.1 Pole and polar	251
18.2 The radical axis	255
18.3 Coaxal circles	260
19 The isodynamic points	265
19.1 The Apollonius circles	265
19.2 A coaxal system	268
19.3 The pedal triangles	273
19.4 The isogonic centres and the isodynamic points	274
20 Inversion	277
20.1 Transformation properties	277
20.2 Angles and tangency	281
20.3 Proof by inversion	284
20.4 The Kosnita and reflection triangles revisited	286
20.5 Inarc circles	288
20.6 Poncelet's porism	291
21 The Feuerbach points	295
21.1 Feuerbach's theorem	295
21.2 A proof using inversion	297
21.3 Consequences	298
21.4 A proof using spiral similarities	300
21.5 A proof using the Simson line	303
21.6 The Feuerbach triangle	305

22 Soddy circles	309
22.1 Touching circles	309
22.2 The Soddy circles	311
22.3 The Soddy radii	314
22.4 The isoperimetric and equal detour points	317
22.5 The Soddy line	318
22.6 Gergonne's construction	320
22.7 Ratios on the Soddy line	324
22.8 The limiting case	329
23 The Mittenpunkt and the Clawson point	331
23.1 The excentral triangle	331
23.2 The Mittenpunkt	333
23.3 The extangents triangle	336
23.4 More on the intouch triangle	338
23.5 The Clawson point	342
24 Partition triangles	347
24.1 Some easy facts about partitions	348
24.2 Some triangles in perspective	350
24.3 Some concurrent Euler lines	352
24.4 Some connections between triangle centres	355
24.5 Van Lamoen's circle	358
25 What lies beyond	363
25.1 The equiparallelian point	363
25.2 The Malfatti circles	365
25.3 The Parry circle	367
25.4 The Apollonius point	369
25.5 The Kenmotu point	370
Appendix A Barycentric and areal coordinates	373
Appendix B Solutions to the exercises	389
Appendix C An index of geometers	523
Bibliography	531
Index	535
