Contents

Series Editor's Foreword vii

Preface ix

Part I **1**

1 Introduction 3

2 Some mathematical properties of ${}^{2n}C_n$ 15

3 Other combinatorial interpretations of ${}^{2n}C_n$ 25

4 Obtaining the prime factorisation of ${}^{2n}C_n$ 31

5 Using integrals to estimate ${}^{2n}C_n$ 37

6 Series involving ${}^{2n}C_n$ 47

7 The Catalan numbers 53

8 Random processes and ${}^{2n}C_n$ 65

9 Comparing coefficients 73

10 Extending the definition of ${}^{2n}C_n$ 79

11 More on the Catalan numbers 85

12 Proving the same thing in different ways 95

Part II **99**

13 Chebyshev's bound for $\pi(x)$ 101

14 Bertrand's postulate 109

15 An interesting divisibility property of ${}^{2p}C_p - 2$ 117

Appendices **127**

A Proof by induction 129

B The generalised binomial theorem 133

C Expressing integers in non-decimal bases 137

D One-to-one correspondence 139

E Table of central binomial coefficients and Catalan numbers 141

Hints to the Challenges 143

Answers and hints to the Exercises 149

Bibliography 159
