Organizers	19
Participants	21
<b>1</b> Plenary talks	29
Relating Structure and Power: a junction between categorical semantics, model theory and descriptive complexity <i>Samson Abramsky</i>	30
Notions of difference closures of difference fields <i>Zoé Chatzidakis</i>	31
The ultrafilter and almostdisjointness numbers <i>Oswaldo Guzman</i>	32
Describing countable structures <i>Matthew Harrison-Trainor</i>	33
Local proof-theoretic foundations, proof-theoretic tameness and proof mining <i>Ulrich Kohlenbach</i>	34
Model theory and proof complexity <i>Jan Krajíček</i>	35

Ramsification and Semantic Indeterminacy <i>Hannes Leitgeb</i>	36
Higher cardinal invariants. <i>Dilip Raghavan</i>	37
Well-ordering principles in proof theory and reverse mathematics <i>Michael Rathjen</i>	38
Drawing Lines through Rivers and Cities. The Meaning of Postulates from Euclid to Hilbert <i>Vincenzo de Risi</i>	39
Logic and natural language: commitments and constraints <i>Gil Sagi</i>	40
Over six decades of the model theory of valued fields <i>Thomas Scanlon</i>	41
Zero-one laws for provability logic and some of its siblings <i>Rineke Verbrugge</i>	42
Logic of Computing with Continuous Data: Foundations of Numerical Software Engineering <i>Martin Ziegler</i>	43

## 2 Set Theory 45

### Invited talks

Stationary Reflection at the successor of a singular cardinal <i>Yair Hayut</i>	46
Generalised Miller forcing may collapse cardinals <i>Heike Mildenberger*, Saharon Shelah</i>	48
Through the lense of uniformization <i>Daniel T. Soukup</i>	49
Bernoulli disjointness <i>Andy Zucker</i>	50

**Contributed talks**

- Capture, Replacement, Specification  
*Frode A. Bjørdal* 51
- On extension of Haar measure in  $\sigma$ -compact groups  
*Evgeny Gordon* 52
- Ramsey degrees of structures with equivalence relations  
*John Howe* 53
- New results on partitioner-representable algebras  
*Joanna Jureczko* 54
- Antichains of copies of ultrahomogeneous structures  
*Borisa Kuzeljević* 55
- Singular Cardinals of Uncountable Cofinality  
*Maxwell Levine* 56
- Destruction of ideal saturation  
*Noah Schoem* 57
- Cardinal invariants and ideal convergence  
*Jaroslav Šupina* 58
- Perfect sets and games on generalized Baire spaces  
*Dorottya Sziráki* 59
- Foundations of mathematics in a model of  
paraconsistent set theory  
*Sourav Tarafder* 60
- Frege's attitude towards sets  
*Marta Vlasáková* 61

**3 Model Theory** 63**Invited talks**

- Sharp actions of groups in the finite Morley rank context  
*Ayse Berkman* 64

Models of the common theory of algebraic extensions of the rational numbers <i>Philip Dittmann</i>	66
Model theory of adèles. Arithmetic equivalence <i>Angus Macintyre</i>	67
Model-theoretic properties of ultrafilters and universality of forcing extensions <i>Francesco Parente</i>	68
<b>Contributed talks</b>	
The Feferman-Vaught Theorem and products of finite fields <i>Alice Medvedev, Alexander Van Abel*</i>	69
MB-homogeneous graphs <i>Andrés Aranda*, David Hartman</i>	70
On strongly minimal Steiner systems: Zilber's conjecture, universal algebra, and combinatorics <i>John Baldwin</i>	71
An existence result for a class of partial differential equations <i>Emanuele Bottazzi*</i>	72
Canonical invariants for t-stratifications <i>David Bradley-Williams</i>	73
Dominions in filtral quasivarieties <i>Miguel Campercholi</i>	74
Preservation theorems for strong first-order logics <i>Christian Espindola</i>	75
Monadic second order logic as a model companion <i>Sam van Gool</i>	76
On Hrushovski properties of Hrushovski constructions <i>Jan Hubička*, Matěj Konečný, Jaroslav Nešetřil</i>	77
The principle of a "rheostat of atomicity" in the study of AAP models <i>A. R. Yeshkeyev, A. K. Issayeva*</i>	78
Pseudocompact unitary representations of finitely generated groups <i>Aleksander Iwanow</i>	80

On connections between logic on words and limits of graphs <i>Tomáš Jakl</i>	81
On automorphism groups of Hrushovski's pseudoplanes in rational cases <i>Hiroataka Kikyo</i>	82
Simplicity of automorphism groups of generalised metric spaces <i>David M. Evans, Jan Hubička, Matěj Konečný*, Yibei Li</i>	83
On universal modules with pure embeddings <i>Thomas Kucera*, Marcos Mazari-Armida</i>	84
Elementary theories of PAC structures via Galois groups <i>Jungkuk Lee*, Daniel Max Hoffmann</i>	85
Weak factorization systems and stable independence <i>Michael Lieberman*, Jiří Rosický, Sebastien Vasey</i>	87
Constructive semantics and the Joyal-Tierney representation theorem <i>Johan Lindberg</i>	88
Product of invariant types modulo domination-equivalence <i>Rosario Mennuni</i>	89
Hybrids of classes from Jonsson spectrum <i>A.R. Yeshkeyev, N.M. Mussina*</i>	90
On ranks for families of theories of finite abelian groups <i>Inessa Pavlyuk*, Sergey Sudoplatov</i>	92
On compositions of structures and compositions of theories <i>Dmitry Emelyanov, Beibut Kulpeshov, Sergey Sudoplatov*</i>	94
Invertible binary algebras principally isotopic to a group <i>Sergey Davidov, Senik Alvrtsyan, Davit Shahnazaryan*</i>	96
Forking and categoricity in non-elementary model theory <i>Sebastien Vasey</i>	98

Tameness in classes of generalized metric structures: quantale-spaces, fuzzy sets, and sheaves <i>Pedro H. Zambrano</i>	99
<b>4 Reflection Principles and Modal Logic</b>	<b>101</b>
<b>Invited talks</b>	
Some recent news about truth theories <i>Ali Enayat</i>	102
Arithmetical and propositional reflection principles <i>Emil Jeřábek</i>	104
A weak set theory that proves its own consistency <i>Fedor Pakhomov</i>	105
Löb's logic and the Lewis arrow <i>Albert Visser</i>	107
<b>Contributed talks</b>	
Constraints on selection function: A critique of Lewis-Stalnakers se- mantics for counterfactuals <i>Mahfuz Rahman Ansari*, A V Ravishankar Sarma</i>	108
Towards a classification of algebraizable FDE-based modal logics <i>Sergey Drobyshevich*, Sergei Odintsov</i>	109
A Complete Intuitionistic Temporal Logic for Topological Dynamics <i>Joseph Boudou, Martín Diéguez, David Fernández-Duque*</i>	110
The uniform reflection principle in second order arithmetic <i>Emanuele Frittaion</i>	111
Dependence logic & medical guidelines disagreement: an informa- tional (in)dependence analysis <i>Luciana Garbayo</i>	112
Hyperarithmetical Turing progressions <i>Joost Joosten</i>	113
Derivability conditions and the second incompleteness theorem <i>Taishi Kurahashi</i>	114

Nonequivalent axiomatizations of <b>PA</b> and the Tarski Boundary <i>Mateusz Łełyk</i>	116
Algebras for preservativity <i>Tadeusz Litak</i>	118
Belief revision based on abductive reasoning <i>A. V. Ravishankar Sarma</i>	120
Fixpoints in generalized Lambek calculus <i>Igor Sedlár</i>	122
Satisfiability problems on sums of Kripke frames <i>Ilya Shapirovsky</i>	123
The BHK interpretation: looking through Gödel's classical lens <i>Amirhossein Akbar Tabatabai</i>	124
Topological models of arithmetic <i>Bartosz Wcisło</i>	125
On strong recognizability of the intuitionistic logic <i>Larisa Maksimova, Veta Yun*</i>	127

## 5 Proof Theory and Proof Complexity 129

### Invited talks

An infinitary treatment of fixed point modal logic <i>Bahareh Afshari</i>	130
Proof complexity of quantified Boolean formulas <i>Olaf Beyersdorff</i>	131
Syntax for semantics <i>Sara Negri</i>	133
Proof mining with the bounded functional interpretation <i>Pedro Pinto</i>	134
A new application of proof mining in the fixed point theory of uniformly convex Banach spaces <i>Thomas Powell</i>	136

Induction, search problems and approximate counting <i>Neil Thapen</i>	137
<b>Contributed talks</b>	
Some results in proof theory <i>Toshiyasu Arai</i>	138
On classical and fuzzy two-layered modal logics for uncertainty: translations and proof-theory <i>Paolo Baldi*, Petr Cintula, Carles Noguera</i>	139
Non-monotonic abstract multiset consequence relations <i>Libor Behounek</i>	140
Suppes-style natural deduction system for classical logic <i>Marija Boričić</i>	141
The limit of incompleteness for Weak Arithmetics <i>Yong Cheng</i>	142
An embedding of <b>IPC</b> into <b>F<sub>at</sub></b> not relying on instantiation overflow <i>José Espírito Santo, Gilda Ferreira*</i>	143
Translation of Sequent Calculus into Natural Deduction for Sentential Calculus with Identity <i>Marta Gawek*, Agata Tomczyk</i>	144
Intuitionistic provability logic <i>Iris van der Giessen</i>	146
Intuitionistic control logic: an overview <i>Anna Glenszczyk</i>	148
Admissibility of Cut for Sequent Calculus related to <i>n</i> -labelled Tableaux <i>Andrzej Indrzejczak</i>	149
On the logical implications of proof forms <i>Amirhossein Akbar Tabatabai, Raheleh Jalali*</i>	150
Gentzen's tentative views on constructivism <i>Annika Kanckos</i>	151

On the proof complexity in two universal proof system for all versions of many-valued logics <i>Anahit Chubaryan, Artur Khamisyan*</i>	152
On Takeuti-Yasumoto forcing <i>Satoru Kuroda</i>	154
Feasible incompleteness <i>Martin Maxa</i>	155
Falsity constants for two independent families of quasi-Boolean logics <i>José M. Méndez*, Gemma Robles, Francisco Salto</i>	156
Multi-valued interpretations <i>Joachim Mueller-Theys</i>	157
Cut elimination and Restall's defining rules <i>Ranjan Mukhopadhyay</i>	159
On Scott's semantics for many-valued logic <i>Satoru Niki*, Peter Schuster</i>	160
Partial conservativity of $\widehat{ID}_1^i$ over Heyting arithmetic via realizability. <i>Mattias Granberg Olsson*, Graham Leigh</i>	161
New ecumenical systems <i>Luiz Carlos Pereira*, Edward Hermann Haeusler</i>	162
The subterm property for some equality sequent calculi <i>Franco Parlamento*, Flavio Previale, Federico Munini</i>	163
Monotonous and strong monotonous properties of some propositional proof systems for Classical and Non Classical Logics <i>Anahit Chubaryan, Garik Petrosyan*, Sergey Sayadyan</i>	165
Umpteen parallel hierarchies and the Gödel hierarchy <i>Sam Sanders</i>	167
Bounds on strong unicity for Chebyshev approximation with bounded coefficients <i>Andrei Sipos</i>	169
How much propositional logic suffices for Rosser's undecidability theorem? <i>Guillermo Badia, Petr Cintula, Andrew Tedder*</i>	171

A unifying approach to Goodstein principles <i>Andreas Weiermann</i>	172
---	-----

## 6 Computability 173

### Invited talks

Some questions of uniformity in algorithmic randomness <i>Laurent Bienvenu*</i> , <i>Barbara Csima</i> , <i>Matthew Harrison-Trainer</i>	174
---	-----

Approximately computable equivalence structures <i>Wesley Calvert</i> , <i>Douglas Cenzer</i> , <i>Valentina Harizanov*</i>	175
--	-----

Computability theory, reverse mathematics, and Hindman's Theorem <i>Denis Hirschfeldt</i>	176
--	-----

More effective cardinal characteristics <i>Noah Schweber</i>	177
---	-----

### Contributed talks

On $\Sigma_n^0$ -classifications <i>Svetlana Aleksandrova*</i> , <i>Nikolay Bazhenov</i>	178
---	-----

Computable reducibility, and isomorphisms of distributive lattices <i>Nikolay Bazhenov*</i> , <i>Manat Mustafa</i> , <i>Mars Yamaleev</i>	179
--	-----

Quantum Random Self-Modifiable Computation <i>Michael Stephen Fiske</i>	180
--	-----

Prefix decidable infinitewords for natural subsets of the set of context-free languages <i>Natalia Korneeva</i>	182
--	-----

Feedback hyperjump <i>Robert Lubarsky</i>	183
--	-----

Descending sequences of hyperdegrees and the second incompleteness theorem <i>Patrick Lutz*</i> , <i>James Walsh</i>	184
---	-----

About Rogers semilattices of finite families in Ershov hierarchy <i>Manat Mustafa, Sergey Ospichev*</i>	185
Quotient presentations of structures <i>Michal Tomasz Godziszewski, Dino Rossegger, Luca San Mauro*</i>	186
Cohesive powers of $\omega$ <i>Rumen Dimitrov, Valentina Harizanov, Andrey Morozov, Paul Shafer*, Alexandra Soslava, Stefan Vatev</i>	187
Reverse Mathematics of some principles related to partial orders <i>Marta Fiori Carones, Alberto Marcone, Paul Shafer, Giovanni Soldà*</i>	188
Effective coding and decoding structures <i>Julia Knight, Alexandra Soslava*, Stefan Vatev</i>	189
Interval semantics for natural languages and effective interpretability over the reals <i>Alexey Ryzhkov, Alexey Stukachev*, Marina Stukacheva</i>	190
On minimal elements in the $\Delta$ -reducibility on families of predicates <i>Andrey Morozov, Jamalbek Tussupov*</i>	191
Computable embeddings for pairs of linear orderings <i>Nikolay Bazhenov, Hristo Ganchev, Stefan Vatev*</i>	192
On enumerations of families of sets of computable elements of metric spaces <i>Ilya Vlasov</i>	194
On bi-embeddable categoricity of linear orders <i>Nikolay Bazhenov, Dino Rossegger, Luca San Mauro, Maxim Zubkov*</i>	195
Limitwise monotonic reducibility of sets and $\Sigma$ -definability of abelian groups <i>Damir Zainetdinov</i>	196
<b>7 Foundations of Geometry</b>	199
<b>Invited talks</b>	
On the notion of equal figures in Euclid <i>Michael Beeson</i>	200

Towards an independent version of Tarski's system of geometry <i>Pierre Boutry</i>	201
Diagrams and parallelism <i>John Mumma</i>	202
First-order model theory of free projective planes <i>Gianluca Paolini</i>	203
<b>Contributed talks</b>	
Axioms for Euclid's Elements book V, their consequences and some independence results <i>Piotr Blaszczyk</i>	204
Limits of diagrammatic reasoning <i>Marlena Fila*, Piotr Blaszczyk</i>	206
The Hajja-Martini inequality in a weak absolute geometry <i>Davit Harutyunyan*, Aram Nazaryan, Victor Pambuccian</i>	208
First-order theory of lines in Euclidean plane <i>Tatyana Ivanova*, Tinko Tinchev</i>	209
Euclidean Geometry <i>Ryszard Mirek</i>	210
Apollonian proof <i>David Pierce</i>	211
Mereological model of arithmetic of natural and real numbers <i>Grzegorz Sitek</i>	212
Computability of contact logics with measure <i>Philippe Balbiani, Tinko Tinchev*</i>	213

## 8 General 215

### Contributed talks

On Gaisi Takeuti's philosophy of mathematics <i>Ryota Akiyoshi*, Andrew Arana</i>	216
--	-----

Resolving Two Paradoxes About Knowledge States in the Foundations of Intuitionistic Analysis <i>James Appleby</i>	217
Logical systems as pedagogical and perhaps existential games <i>Pavel Arazim</i>	218
A hyperintensional and paraconsistent approach to belief dynamics <i>Sena Bozdog</i>	219
One or more Logicisms <i>Ludovica Conti</i>	220
Rearranging absolutely convergent well-ordered series in Banach spaces <i>Vedran Čačić, Marko Doko, Marko Horvat*</i>	221
Belief as a quantum bit <i>Oguz Korkmaz</i>	222
Ramified-types for states of affairs <i>Harold Hodes</i>	223
Towards Invariant bisimulations for parametric multi-valued dynamic logics <i>Alexandre Madeira*, Manisha Jain, Manuel Martins</i>	224
Justifications and the Lewis argument on ECQ: a relevant note <i>Francisco Martinez Herrera</i>	225
An inconsistency tolerant paraconsistent deontic logic of moral conflicts <i>Meha Mishra*, A.V. Ravishankar Sarma</i>	226
Reading Feyerabend: from epistemic anarchism to anarchism in foundations of formal systems <i>Jaroslav Petik</i>	227
Archetypal Rules: Beyond Classical Logic <i>Tomasz Polacik</i>	228
The Limit of the Strict-Tolerant Hierarchy is Essentially Classical and Even If It's Just LP, That's Probably Okay. <i>Thomas Macaulay Ferguson, Elisangela Ramirez-Camara*</i>	229

Negation can be just what it has to <i>Ricardo Nicolá</i>	230
Content-sharing in relevant mathematics <i>Luis Estrada-González, Claudia, Lucía Tanús-Pimentel*</i>	231
Complexity of some fragments of description logics <i>Vedran Čačić*, Egor V. Kostylev, Juan L. Reutter, Domagoj Vrgoč</i>	232
Index	233
