1 SOCIAL BEHAVIOR AND EVOLUTIONARY THOUGHT 1

1.1 Explanations for Apparent Design	1
1.2 Natural Selection and Social Behavior	3
1.3 Arguments for Group Benefit	7
1.4 Enter Hamilton	11
1.5 Multilevel Selection Theory	13
1.6 The Generality of Inclusive Fitness Theory	14

2 MODELS OF SOCIAL BEHAVIOR 16

2.1 Introduction	16
2.2 The Donation Game	18
2.3 The Nonadditive Donation Game	22
2.4 Other Social Interactions	25
2.5 Public Goods Games	28
2.6 Threshold Public Goods Games	29
2.7 Interactions in Structured Populations	32
2.8 Summary	32

3	THE PRICE EQUATION	34
3.1	A General Description of Selection	34
3.2	Genetic Selection	36
3.3	Illustrative Applications of the Price Equation	39
3.4	Important Caveats	43
3.5	Summary	45
4	INCLUSIVE FITNESS AND HAMILTON'S RULE	46
4.1	Inclusive Fitness Extends Classical Darwinian Fitness	46
4.2	Fitness Effects as Regression on Genes	47
4.3	Deriving Hamilton's Rule in the Simplest Case	51
4.4	Perceived Limitations of Inclusive Fitness Theory	54
4.5	Summary	58
5	NONADDITIVE INTERACTIONS AND HAMILTON'S RULE	59
5.1	Replicator Dynamics for Interactions between Relatives	59
5.2	Extending Hamilton's Rule to Deal with Nonadditivity	65
5.3	The Price Equation and Levels of Causal Analysis	69
5.4	Summary	70
6	CONDITIONAL BEHAVIORS AND INCLUSIVE FITNESS	71
6.1	Implicit and Explicit Conditionality	71
6.2	Modeling Conditional Behavior	73
6.3	Claims That Assortment Is More Fundamental Than Relatedness	76
6.4	Summary	77
7	VARIANTS OF HAMILTON'S RULE AND EVOLUTIONARY EXPLANATIONS	78
7.1	Variants of Hamilton's Rule	78
7.2	Geometric Relatedness Underlies Phenotypic Assortment	83
7.3	Explanations for Greenbeards	86
7.4	Different Viewpoints on Conditional Traits	88
7.5	Summary	89

LIST OF ILLUSTRATIONS

FIGURES

- 1.1 Male stag (*Cervus elaphus*) 4
- 1.2 Leafcutter ants (*Atta colombica*) 5
- 1.3 A long-tailed tit chick (*Aegithalos caudatus*) is fed an invertebrate by an adult helper 6
- 1.4 *Dictyostelium discoideum* forming a stalk and fruiting body 7
- 1.5 Fitness consequences of siderophore production in *Pseudomonas aeruginosa* 8
- 1.6 Pyocins inhibiting growth of *Pseudomonas aeruginosa* 9
- 1.7 Aposematism in caterpillars 10
- 2.1 Visualization of selection pressures in the additive donation game 21
- 2.2 Visualization of selection pressures in the nonadditive donation game 24
- 2.3 Visualization of selection pressures in the nonadditive cooperation game 26
- 2.4 Visualization of selection pressures in the negatively nonadditive group cooperation game 29
- 2.5 Visualization of selection pressures in the positively nonadditive public goods game 30
- 2.6 Group payoffs in the threshold public goods game 31
- 3.1 Lifetime breeding success and antler mass in red deer 38
- 3.2 Offspring–parent regression of wing length in *Drosophila* 41

- 4.1 Fitness effects as simple regression coefficients 50
- 5.1 Visualization of selection pressures in the positively nonadditive donation game between relatives 61
- 5.2 Visualization of selection pressures in the negatively nonadditive donation game between relatives 62
- 5.3 Visualization of selection pressures in the negatively nonadditive donation game with roles between relatives 63
- 5.4 Visualization of selection pressures in the positively nonadditive donation game with roles between relatives 64
- 5.5 Regression of fitness change on individual genetic value demonstrating correlated residuals 66
- 7.1 Four variants of Hamilton's rule 79
- 7.2 The geometric view of relatedness 82
- 9.1 Reproductive value of Australian women 108
- 9.2 Threshold relatedness with varying scales of competition 112
- 10.1 A meerkat sentinel (*Suricata suricatta*) in raised guard 118
- 10.2 Rates of provisioning by long-tailed tit helpers 119
- 10.3 A comparative analysis of worker policing theory 122
- 10.4 Ancestral monogamy predicts the incidence of hymenopteran eusociality 124
- 10.5 A social-evolution approach to organismality 130

TABLES

- 2.1 The additive two-player donation game 18
- 2.2 The nonadditive two-player donation game 23
- 2.3 Classification of social behaviors 25
- 2.4 Different evolutionary games and outcomes 27
- 7.1 Variants of Hamilton's rule 83
- 7.2 Possible evolutionary explanations of greenbeards 87
