Introduction	
Part I Shape and Structure	
	Community assembly dynamics in snace
1 The topology of ecological interaction networ	ks: the state of the art
Owen L. Petchey, Peter J. Morin and Han Olff	
1.1 Introduction	
1.1.1 What do we mean by the 'topology' of	ecological networks?
1.1.2 Different types of ecological networks	e 4.5 Community assembly and special scale
1.1.3 Three general questions	1
1.2 Competitive networks	1
1.2.1 Structural regularities	1 the state of environmental second state
1.2.2 Mechanisms	1
1.2.3 Unresolved issues	jor drivers and a second base with the second base 1
1.3 Mutualistic networks	1 Loncininons and prosperied brundbywolad-brun
1.3.1 Structural regularities	rvation 1
1.3.2 Mechanisms	Int III Space and Time
1.3.3 Unresolved issues	plain biological invasions
1.4 Food webs	I Increasing spatio-temporal scales: metacommuni
1.4.1 Structural regularities	f Jonathan M. Chase and Jamte Bengfsson - Arounoga
1.4.2 Mechanisms	1
1.4.3 Unresolved issues	2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2
Part II Dynamics	2 5.2. Patch dynamics
	5.2.3 Species anting
2 Trophic dynamics of communities	5. 5.2 Mars effects
Herman A. Verhoef and Han Olff	
ta 8.2 The changing abape of manne food webs	5.4 As easy as a. B. v. the importance of scale
2.1 What types of dynamics can be distinguished	1?
2.1.1 Stable equilibria	5.6 Effects of dispersal rates on local communities
2.1.2 Alternate equilibria	[5.7 Local-regional richness relationships
2.1.3 Stable limit cycles	15.8 A synthesis of metacommunity models
2.1.4 Chaotic dynamics	15.9 Adding food web interactions interferential
2.2 Dynamics of food web modules	15.10 Cross-wosystem boundaries
2.3 Internal dynamics in food web modules or s	imple webs
