CONTENTS

INTRODUCTION 19

1 CURVES AND SURFACES IN EUCLIDEAN SPACES 23

1.1 Vector functions . . . 23
1.1.1 Coordinates . . . 23
1.1.2 Vector functions, continuity and differentiability . . . 24
1.2 Curves in Euclidean space . . . 26
1.2.1 Curves and parametrization of curves . . . 26
1.2.2 Frenet frame and Frenet–Serret formulas . . . 28
1.2.3 Osculating circle, evolute and involute . . . 30
1.3 Surfaces in Euclidean space . . . 31
1.3.1 Surfaces and simple surfaces (patchs) . . . 31
1.3.2 First and second fundamental forms of the surfaces . . . 32
1.3.3 Length of curves, angle between curves and area of surfaces . . . 32
1.3.4 Gauss, Weingarten and Peterson-Codazzi formulas . . . 34
1.3.5 Isometry and Inner geometry . . . 35
1.3.6 Normal, geodesic, principal, mean and Gauss curvatures . . . 36
1.4 Geodesics in surfaces . . . 41
1.4.1 Characterization of geodesics . . . 41
1.4.2 Existence and uniqueness of geodesics . . . 42
1.4.3 Semigeodesic coordinates . . . 44
1.4.4 Geodesic bifurcations . . . 44
1.4.5 Gauss-Bonnet Theorem . . . 46
1.4.6 Gnomonic and stereographic projections . . . 48
1.4.7 Motivations and applications . . . 49

2 TOPOLOGICAL SPACES 51

2.1 From metric spaces to abstract topological spaces . . . 51
2.1.1 A couple of examples . . . 52
2.1.2 Euclidean space . . . 53
2.1.3 Natural topology on metric space . . . 54
2.1.4 Isometry of metric spaces . . . 55
2.1.5 Abstract topological spaces, topology . . . 55
2.1.6 Examples of topological spaces . . . 55
2.2 Generating of topologies . . . 57
2.2.1 Closed sets . . . 57
2.2.2 Closure operator. Accumulation points . . . 58
2.2.3 Interior, exterior, boundary . . . 59
2.2.4 The lattice of topologies. Ordering . . . 60
2.2.5 Metrization problem . . . 60
2.2.6 Cover, subcover . . . 60

2.2.7 Bases. Countability Axioms 61
2.2.8 Sequences in topological spaces, nets 63
2.3 Continuous maps 64
2.3.1 Continuous maps of topological spaces 64
2.3.2 Homeomorphisms 65
2.3.3 Topological invariants 66
2.4 Constructions of new topological spaces from given spaces 67
2.4.1 Projectively and inductively generated topologies 67
2.4.2 Subspace and product 67
2.4.3 Sum and quotient 69
2.4.4 The quotient topology 69
2.5 Connectedness 70
2.5.1 Path-connected spaces 70
2.5.2 Connected topological spaces 71
2.6 Separation properties 73
2.6.1 The Hausdorff separation axiom 73
2.6.2 Separation by continuous functions 74
2.6.3 Tychonoff spaces 76
2.7 Compactness 77
2.7.1 Compact topological spaces 77
2.7.2 Compactification 78
2.7.3 Local compactness 80
2.7.4 Partition of unity 80
2.7.5 Paracompactness 80
2.8 Metrization of a topological space 81
2.8.1 Metrization Theorems 82
2.8.2 Some properties of metric and metrizable spaces 83
2.8.3 Complete metric spaces 83
2.9 Topological algebraic structures 84
2.9.1 Topological groups 84
2.9.2 Topological vector spaces 85
2.10 Fundamental group 86
2.10.1 Homotopic maps 86
2.10.2 Loops 89
2.10.3 Homotopy of paths and loops 89
2.10.4 Construction of the fundamental group 90
2.11 Topological manifolds 93
2.11.1 Surfaces 93
2.11.2 Hypersurface 96
2.11.3 Topological manifold 96
2.11.4 Charts, atlas 97
2.11.5 The classification of compact connected 2-manifolds 97

3 MANIFOLDS WITH AFFINE CONNECTION **99**
3.1 Differentiable manifolds 99
3.1.1 Differentiable structure (complete atlas) 99
3.1.2 Smooth map, diffeomorphism 100
3.1.3 Tangent vector, tangent space, tangent bundle 101
3.1.4 Differential map 102
3.1.5 Curve, tangent vector of a curve 103
3.1.6 Vector field, flow 104
3.1.7 Distributions 106
3.1.8 One-forms 106
3.2 Tensor fields and geometric objects 107
3.2.1 Tensors on a vector space 107
3.2.2 Tensors on manifolds 109
3.2.3 Geometric objects on manifolds 110
3.3 Manifolds with affine connection 112
3.3.1 Affine connections, manifolds with affine connection 112
3.3.2 Covariant differentiation 113
3.3.3 Curvature and Ricci tensor 114
3.3.4 Flat, Ricci flat and equiaffine manifolds 115
3.3.5 Parallel transport of vectors and tensors 116
3.3.6 Geodesics 118
3.3.7 Some remarks on definitions for geodesics 119
3.4 Special coordinate systems and reconstructions 122
3.4.1 Affine coordinates and flat manifolds 122
3.4.2 Geodesic coordinates in a point, Fermi and Riemann coordinates 122
3.4.3 Pre-semigeodesic coordinates 124
3.4.4 Reconstuction of connection 127
3.5 On systems of partial differential equations of Cauchy type 130
3.5.1 Systems of PDEs of Cauchy type in $\mathbb{R}^n$ 130
3.5.2 On mixed systems of PDEs of Cauchy type in $\mathbb{R}^n$ 131
3.5.3 On a mixed linear system of PDEs of Cauchy type in $\mathbb{R}^n$ . . . 132
3.5.4 Mixed PDEs in tensor form 132
3.5.5 On systems of PDEs of Cauchy type in manifolds 132
3.5.6 Application 134

4 RIEMANNIAN AND KÄHLER MANIFOLDS **137**
4.1 Riemannian manifolds $\mathbb{V}_n$, i.e. Riemannian and pseudo-Riemannian manifolds . . 137
4.1.1 Riemannian metric 138
4.1.2 Length of vector and arc, angle and volume 139
4.1.3 Isometric diffeomorphisms 140
4.1.4 Levi-Civita connection and Riemannian tensor 140
4.1.5 Parallel transport and geodesics 142
4.2 Special Riemannian manifolds 143
4.2.1 Subspaces of Riemannian spaces 143
4.2.2 Sectional curvature and Spaces of constant curvature 144

4.2.3 Einstein spaces 145
4.2.4 Hypersurfaces 146
4.3 Special coordinates in Riemannian spaces 147
4.3.1 Normal coordinates 147
4.3.2 Coordinates generated by a system of orthogonal hypersurfaces 147
4.3.3 Semigeodesic coordinates 148
4.3.4 Reconstruction of the metric in semigeodesic coordinates . . . 150
4.4 Variational properties in Riemannian spaces 152
4.4.1 Variational problem 152
4.4.2 Variational problem of geodesics in Riemannian spaces 153
4.4.3 Generalized variational problem for geodesics 155
4.4.4 Applications of geodesics 156
4.4.5 Isoperimetric extremals of rotation 157
4.5 Kähler manifolds 160
4.5.1 Definition and basic properties of Kähler manifolds 160
4.5.2 Canonical coordinates on Kähler manifolds 161
4.5.3 The operation of conjugation 163
4.5.4 Holomorphic curvature 165
4.5.5 Space of constant holomorphic curvature 165
4.5.6 Analytic vector fields 166
4.6 Equidistant spaces 168
4.6.1 Torse-forming and concircular vector fields 168
4.6.2 On differentiability of functions with special conditions 170
4.6.3 Fundamental equations of concircular vector fields for minimal differentiable conditions 171
4.6.4 A space with affine connection which admits at least two linearly independent concircular vector fields . . . 173
4.6.5 A Riemannian space which admits at least two linearly independent concircular vector fields . . . 175
4.6.6 Concircular and convergent vector fields on compact manifolds with affine connection 177
4.6.7 Applications of the achieved results 177
4.6.8 Equidistant manifolds and special coordinate system 178
4.6.9 Torse-forming and concircular vector fields in $\mathbb{A}_2$ and $\mathbb{V}_2$ 179
4.6.10 Einstein equidistant manifolds and the Theory of relativity . . 180
4.6.11 Equidistant Kähler spaces 182
4.6.12 On Sasaki spaces and equidistant Kähler manifolds 183
4.7 Product Riemannian and Kähler manifolds, and their geodesics 185
4.7.1 Product Riemannian manifolds 185
4.7.2 Product Kähler manifolds 186
4.7.3 Geodesics in product manifolds 186
4.7.4 Geodesic bifurcation of product spaces 186
4.8 A five-dimensional Riemannian manifold with an irreducible $SO(3)$-structure as a model of statistical manifold 188
4.8.1 Information geometry 188

4.8.2 An abstract statistical manifold 188
4.8.3 An irreducible $SO(3)$-structure 189
4.8.4 The model of a statistical manifold 190
4.8.5 On a conjugate symmetric statistical manifold 192
4.8.6 On a nearly integrable $SO(3)$-structure 195
4.9 Traceless decomposition of tensors 198
4.9.1 Introduction 198
4.9.2 On decomposition of tensors on manifolds 198
4.9.3 F-traceless decomposition 203
4.9.4 Quaternionic trace decomposition 208
4.9.5 Generalized decomposition problem for Ricci and Riemannian tensors 210
4.9.6 Traceless decompositon and recurrency 211

5 MAPPINGS AND TRANSFORMATIONS OF MANIFOLDS 213
5.1 Theory of Mappings 213
5.1.1 Introduction to mappings and transformation theory 213
5.1.2 Formalism of a "common coordinate system" 213
5.1.3 Formalism of a "common manifold" 213
5.1.4 Deformation tensor of a mapping 213
5.1.5 On equations of mappings onto Riemannian manifolds 215
5.2 Transformation Lie Groups 216
5.2.1 Introduction 216
5.2.2 Transformation Groups 216
5.2.3 Continuous transformation groups. Lie groups. 217
5.2.4 One-parameter groups of continuous transformations 218
5.2.5 Lie derivative 219
5.3 Affine mappings and transformations 221
5.3.1 Affine mappings of manifolds with affine connection 221
5.3.2 Affine mappings onto Riemannian manifolds 223
5.3.3 Product manifolds and affine mappings 223
5.3.4 Affine motions 224
5.4 Isometric mappings and transformations 225
5.4.1 Fundamental equations of isometric mappings 225
5.4.2 On local isometry of spaces of constant curvature 226
5.4.3 On local isometry of spaces of constant holomorphic curvature 226
5.4.4 Groups of motions 227
5.5 Homothetic mappings and transformations 229
5.5.1 Homothetic mappings 229
5.5.2 Groups of homothetic motions 229
5.5.3 Transformation groups and special mappings 230
5.6 Metric connections, Metrization problem 233
5.6.1 Metrization according to Eisenhart and Veblen 234
5.6.2 Application to the calculus of variations 237
5.6.3 Metrization in dimension two 238
5.6.4 Metrization via holonomy groups and holonomy algebras . . . 244

5.6.5 Decision Algorithm 253
5.6.6 Metrization of connections with regular curvature 255
5.7 Harmonic diffeomorphisms and transformations 261
5.7.1 Harmonic diffeomorphisms 261
5.7.2 Harmonic transformations 262

6 CONFORMAL MAPPINGS AND TRANSFORMATIONS 267
6.1 Conformal and isometric mappings 267
6.1.1 Introduction to the theory of conformal and isometric mappings 267
6.2 Main properties of conformal mappings 269
6.2.1 Fundamental equations of conformal mappings 269
6.2.2 Equivalence classes of conformal mappings 269
6.3 Some geometric objects under conformal mappings . . 270
6.3.1 Christoffel symbols under conformal mappings 270
6.3.2 Riemannian and Ricci tensor under conformal mappings 271
6.3.3 Weyl tensor of conformal curvature 271
6.4 Conformally flat manifolds 272
6.5 Conformal mappings onto Einstein spaces 274
6.5.1 Linear equations of conformal mappings onto Einstein spaces . 274
6.5.2 On the quantity of the solution's parameters 275
6.5.3 Conformal mappings onto 4-dimensional Einstein spaces 276
6.5.4 Conformal mappings from symmetric spaces onto Einstein spaces 276
6.5.5 Conformal mappings onto Einstein spaces "in the large" 278
6.6 Concircular mappings 279
6.6.1 Concircular mappings 279
6.6.2 Conformal mappings preserving the Einstein tensor 280
6.6.3 Conformal mappings between Einstein spaces 281
6.7 Conformal transformations 282
6.7.1 Groups of conformal transformations 282
6.7.2 Criterion of conformal flatness 283
6.7.3 On the lacunarity of the degree of conformal motions 285
6.7.4 Riemannian space of second lacunarity of conformal motions . 287

7 GEODESIC MAPPINGS OF MANIFOLDS WITH AFFINE CONNECTION 289
7.1 Geodesic mappings 289
7.1.1 Introduction to geodesic mappings theory 289
7.1.2 Examples of geodesic mappings 290
7.2 Fundamental properties of geodesic mappings 291
7.2.1 Levi-Civita equations of geodesic mappings 291
7.2.2 Equivalence classes of geodesic mappings 294
7.2.3 Thomas projective parameter 294
7.2.4 Manifold with projective connection 295
7.2.5 Riemannian and Ricci tensor under geodesic mappings 297
7.2.6 Weyl tensor of projective curvature 297
7.2.7 Geodesic mappings of equiaffine manifolds 298

7.3 Projectively flat manifolds 301
7.3.1 Geodesic mappings of projectively flat manifolds 301
7.3.2 Characterization of projectively flat manifolds 302
7.4 Projective transformations 304

8 GEODESIC MAPPINGS ONTO RIEMANNIAN MANIFOLDS **307**
8.1 Fundamental equations of GM: $\mathbb{A}_n \to \overline{\mathbb{V}}_n$ 307
8.1.1 Levi-Civita equations of geodesic mappings 307
8.1.2 Cauchy type equations of GM of $\mathbb{A}_n$ onto $\overline{\mathbb{V}}_n$ 308
8.1.3 On the mobility degree with respect to geodesic mappings . . . 309
8.2 Linear equations of the theory of geodesic mappings . . 312
8.2.1 Mikeš-Berezovski equations of geodesic mappings 312
8.2.2 Linear equations of geodesic mappings $\mathbb{A}_n \to \overline{\mathbb{V}}_n$ 314
8.2.3 Geodesic mappings $\mathbb{P}_n \to \overline{\mathbb{V}}_n$ for $\mathbb{P}_n \in C^2$ and $\overline{\mathbb{V}}_n \in C^1$ 315
8.2.4 Example 317
8.3 Geodesic mappings of special manifolds 318
8.3.1 Geodesic mappings of semisymmetric manifolds 318
8.3.2 Geodesic mappings of generalized recurrent manifolds 324

9 GEODESIC MAPPINGS BETWEEN RIEMANNIAN MANIFOLDS **329**
9.1 General results on geodesic mappings between $\mathbb{V}_n$ . . . 329
9.1.1 Levi-Civita and Sinyukov equations of geodesic mappings . . . 329
9.1.2 Sinyukov Γ-transformations of geodesic mappings 330
9.2 Classical examples of geodesic mappings 331
9.2.1 Lagrange and Beltrami projections 331
9.2.2 Dimension two 331
9.2.3 Levi-Civita metrics 332
9.3 Geodesic mappings and equidistant spaces 333
9.4 Manifods $\mathbb{V}_n(B)$ 335
9.4.1 Geodesic mappings of $\mathbb{V}_n(B)$ spaces 335
9.4.2 Properties of the spaces $\mathbb{V}_n(B)$ 337
9.4.3 Projective transformations and manifolds $\mathbb{V}_n(B)$ 338
9.4.4 Geodesically complete manifolds $\mathbb{V}_n(B)$ 340
9.5 GM and its field of symmetric linear endomorphisms . 343
9.5.1 Geodesic mappings in terms of linear algebra 343
9.5.2 GM of complete noncompact Riemannian manifolds 347

10 GEODESIC MAPPINGS OF SPECIAL RIEMANNIAN MANIFOLDS **349**
10.1 Geodesic mappings of spaces of constant curvature . . 349
10.1.1 Spaces of constant curvature 349
10.1.2 Geodesic mappings of spaces of constant curvature 350
10.2 Geodesic mappings of Einstein spaces 352
10.2.1 Einstein spaces are closed under geodesic mappings 352

10.2.2 Einstein spaces admit projective transformations 352
10.2.3 Metrics of Einstein manifolds admitting geodesic mappings . . 353
10.2.4 Local structure Theorem 355
10.2.5 Geodesic mappings of four-dimensional Einstein spaces 358
10.2.6 Petrov's conjecture on geodesic mappings of Einstein spaces . 359
10.3 Geodesic mappings of pseudo-symmetric manifolds . . 360
10.3.1 T-pseudo-symmetric manifolds 360
10.3.2 Geodesic mappings of c_i - and c_{ij} - pseudosymmetric $\mathbb{V}_n$ 362
10.3.3 Geodesic mappings of T-pseudosymmetric manifolds 364
10.4 Generalized symmetric, recurrent and semisymmetric $\mathbb{V}_n$ 367
10.4.1 GM of semisymmetric spaces and their generalizations 368
10.4.2 Geodesic mappings of spaces with harmonic curvature 370
10.5 Geodesic mappings of Kähler manifolds 372
10.5.1 Introduction 372
10.5.2 GM of $\mathbb{K}_n$ which preserve the structure tensor 372
10.5.3 Geodesic mappings onto Kähler manifolds 373
10.5.4 Geodesic mappings between Kähler manifolds 374

11 GLOBAL GEODESIC MAPPINGS AND DEFORMATIONS 377
11.1 On the theory of geodesic mappings of Riemannian manifolds "in the large" 377
11.1.1 GM between Riemannian manifolds of different dimensions . . 378
11.1.2 Geodesic immersions 380
11.1.3 Geodesic submersions 380
11.2 Projective transformations and deformation of surfaces 382
11.2.1 Global projective transformation of n-sphere 382
11.2.2 Surface of revolution 385
11.2.3 On global geodesic mappings of ellipsoids 388
11.2.4 Compact orientable spaces L_n 392
11.2.5 Global geodesic mappings $\mathbb{V}_n$ onto $\overline{\mathbb{V}}_n$ with boundary 392
11.2.6 GM and principal orthonormal basis 393
11.3 On geodesic mappings with certain initial conditions . 394
11.3.1 On geodesic mappings with certain initial conditions 394
11.3.2 The first quadratic integral of a geodesic 396
11.3.3 On first quadratic integral of geodesics with initial conditions 397
11.4 Geodesic deformations of hypersurfaces in Riemannian spaces 398
11.4.1 Infinitesimal deformations of Riemannian spaces 398
11.4.2 Geodesic deformations and geodesic maps 400
11.4.3 Geodesic deformations of subspaces of Riemannian spaces . . 401
11.4.4 Basic equations of geodesic deformations of hypersurfaces . . 401
11.4.5 A system of equations of Cauchy type for geodesic deformations of a hypersurface 403

12 APLICATIONS OF GEODESIC MAPPINGS **407**
12.1 Applications of geodesic mappings to general relativity . 407
12.1.1 Agreement on terminology 407
12.1.2 Killing-Yano tensors 407
12.1.3 Geodesic mappings and integrals of the Killing-Yano equations 408
12.1.4 Closed conformal Killing-Yano tensors 408
12.1.5 Conformal Killing-Yano tensors 410
12.1.6 The pre-Maxwell equations 411
12.1.7 Operators of symmetries of Dirac equations 412
12.2 Three invariant classes of the Einstein equations and geodesic mappings 413
12.2.1 The Einstein equations 413
12.2.2 Invariantly defined seven classes of the Einstein equations . . 413
12.2.3 Einstein like manifolds of Killing type 413
12.2.4 Einstein like manifolds of Codazzi type 414
12.2.5 The class of Einstein like manifolds of Sinyukov type 415
12.3 Differentiable structure on elementary geometries . . . 416
12.3.1 Introduction 416
12.3.2 A Riccati differential equation 417
12.3.3 Differentiable $\mathbb{R}^2$-planes 418
12.3.4 Generalized shift $\mathbb{R}^2$-planes 418
12.3.5 Generalized affine Moulton planes 422
12.3.6 Groups of affine mappings in the Moulton planes $\mathcal{A}(s,p)$ . . . 425
12.3.7 Appendix 431

13 ROTARY MAPPINGS AND TRANSFORMATIONS **433**
13.1 Rotary diffeomorphism 433
13.1.1 Definition of rotary diffeomorphism 433
13.1.2 Conditions of rotary diffeomorphisms 434
13.1.3 Fundamental equations of rotary diffeomorphisms 435
13.2 On spaces admitting rotary mappings 437
13.2.1 Counterexample of spaces admitting rotary mappings 437
13.2.2 On equations (13.18) 439
13.2.3 On rotary vector field 440
13.3 On rotary mappings of surfaces of revolution 442
13.4 Infinitesimal rotary transformation 445
13.4.1 Basic definition of infinitesimal rotary transformation 445
13.4.2 Basic equations of infinitesimal rotary transformations 446

14 F-PLANAR MAPPINGS AND TRANSFORMATIONS **449**
14.1 On F-planar mappings of spaces with affine connections 449
14.1.1 Definitions of F-planar curves and F-planar mappings 449
14.1.2 Preliminary lemmas of linear and bilinear forms and operators 451
14.1.3 F-planar mappings which preserve F-structures 454
14.1.4 F-planar mappings which do not preserve F-structures . . . 455
14.1.5 F-planar mappings for dimension $n = 2$ 456

14.1.6 F-planar mappings with covariantly constant structure 456
14.2 F-planar mappings onto Riemannian manifolds 458
14.2.1 Fundamental equations of F-planar mappings onto $\mathbb{V}_n$ 458
14.2.2 Equations of F-planar mappings in Cauchy form 458
14.2.3 Special F-planar mappings onto Riemannian manifolds 462
14.2.4 Fundamental equations of F_1-planar mappings 463
14.2.5 Fundamental linear equations of F_2-planar mappings 466
14.2.6 Generating F-planar mappings 468
14.3 Infinitesimal F-planar transformations 469
14.3.1 Definition of infinitesimal F-planar transformations 469
14.3.2 Basic equations of infinitesimal F-planar transformations . . . 469
14.4 F-planar transformations 472
14.5 On F_2^ε-planar mappings of Riemannian manifolds . . . 476
14.5.1 PQ^ε-projective Riemannian manifolds 476
14.5.2 Simplification of conditions (14.72) for $\varepsilon \neq 0$ 477
14.5.3 F_2^ε-projective mapping with $\varepsilon \neq 0$ 477
14.5.4 F_2^ε-planar mappings with the $\overline{g} = k \cdot g$ condition 479

15 HOLOMORPHICALLY PROJECTIVE MAPPINGS OF KÄHLER MANIFOLDS **481**
15.1 Fundamental properties of HP mappings 482
15.1.1 Definition of holomorphically projective mappings 482
15.1.2 Equivalence classes of holomorphically projective mappings . 484
15.1.3 Some geometric objects under HPM 484
15.1.4 Holomorphically projectively flat Kähler manifolds 485
15.2 Fundamental theorems of the theory of HP mappings 488
15.2.1 Linear fundamental equations of the theory of HPM 488
15.2.2 The first quadratic integral of geodesics and HP mappings . . 489
15.2.3 Fundamental equations of HPM in Cauchy form 490
15.2.4 Integrability conditions of fundamental equations of HPM . . 492
15.2.5 Reduction of fundamental equations of HP mappings 493
15.2.6 HP mappings of generalized recurrent Kähler manifolds . . . 494
15.2.7 HP mappings with certain initial conditions 495
15.3 Manifolds $\mathbb{K}_n[B]$ 496
15.3.1 Holomorphically projective mappings of $\mathbb{K}_n[B]$ spaces 496
15.3.2 Properties of the spaces $\mathbb{K}_n[B]$ 498
15.3.3 On the degree of mobility of $\mathbb{K}_n$ relative to HPM 498
15.3.4 HP transformations and manifolds $\mathbb{K}_n[B]$ 499
15.3.5 K-concircular vector fields and HPM 501
15.3.6 Holomorphically complete manifolds $\mathbb{K}_n[B]$ 501
15.4 HPM of special Kähler manifolds 503
15.4.1 HPM of T-k-pseudosymmetric Kähler manifolds 503
15.4.2 HPM of Einstein spaces and of their generalizations 505
15.4.3 Spaces that locally do not admit nontrivial HPM 506
15.5 HP mappings of parabolic Kähler spaces $\mathbb{K}_n^{o(m)}$ 507
15.5.1 HP mappings theory for $\mathbb{K}_n^{o(m)} \to \overline{\mathbb{K}}_n^{o(\overline{m})}$ 507

15.5.2 HP mappings of parabolic Kähler space of class C^2 510
15.5.3 HP mappings $\mathbb{K}_n^{o(m)} \to \overline{\mathbb{K}}_n^{o(\overline{m})}$ for $\mathbb{K}_n^{o(m)} \in C^r$ and $\overline{\mathbb{K}}_n^{o(\overline{m})} \in C^2$. 511
15.5.4 Holomorphically projective flat parabolic Kähler spaces 513
15.5.5 On isometries between holomorphically-projective flat $\mathbb{K}_n^{o(m)}$. 514
15.5.6 HP mappings of holomorphically-projective flat $\mathbb{K}_n^{o(m)}$ 515
15.5.7 Metric of holomorphically-projective flat $\mathbb{K}_n^{o(m)}$ 516

16 ALMOST GEODESIC MAPPINGS 519
16.1 Almost geodesic mappings 519
16.1.1 Almost geodesic curves 519
16.1.2 Almost geodesic mappings, basic definitions 521
16.1.3 On a classification of almost geodesic mappings 523
16.1.4 On a completeness classification of almost geodesic mappings 525
16.2 Almost geodesic mappings of type π_1 527
16.2.1 Canonical almost geodesic mappings $\tilde{\pi}_1$ 527
16.2.2 Properties of the fundamental equations of $\tilde{\pi}_1$ 528
16.2.3 Canonical almost geodesic mappings $\tilde{\pi}_1$ onto Riemannian spaces 530
16.2.4 Ricci-symmetric and generalized Ricci-symmetric spaces . . . 533
16.2.5 AG mappings $\tilde{\pi}_1$ onto generalized Ricci-symmetric manifolds 534
16.3 π_1 mappings preserving n-orthogonal hypersurfaces . . 537
16.3.1 Mappings of $\mathbb{V}_n$ preserving a system n-orthogonal hypersurfaces 537
16.3.2 Special almost geodesic mappings of the type π_1 538
16.4 On special almost geodesic mappings of type π_1 of $\mathbb{A}_n$ 541
16.4.1 Almost geodesic mappings π_1^* 541
16.4.2 An invariant object of mappings π_1^* 542
16.4.3 Mappings π_1^* of affine and projective-euclidean spaces 543
16.4.4 Examples of almost geodesic mappings π_1^* 544

17 RIEMANN-FINSLER SPACES 545
17.1 Riemann-Finsler spaces 545
17.1.1 Douglas spaces, Previous results 549
17.1.2 Douglas spaces 550
17.1.3 A generalization of Douglas spaces 556
17.2 Riemann-Finsler spaces with h-curvature tensor 557
17.2.1 Projective invariants 557
17.2.2 Q^3-invariants 559
17.2.3 Behaviour of the Weyl tensor in Douglas spaces 560
17.2.4 On the rectifiability condition of a second ordinary differential equation 561
17.3 Riemann-Finsler spaces with h-curvature (Berwald curvature) tensor dependent on position alone 563
17.4 Projective changes between Riemann-Finsler spaces with (α, β)-metric 566
17.4.1 Preliminaries 566
17.4.2 The two-dimensional case 570

17.5 Geodesic mappings of weakly Berwald spaces and Berwald spaces onto Riemannian spaces ($\mathbb{V}_n$) 573
17.5.1 Geodesic mappings of weakly Berwald spaces onto $\mathbb{V}_n$ 573
17.5.2 Geodesic mappings of Berwald spaces onto $\mathbb{V}_n$ 574
17.5.3 Riemannian metrics having common geodesics with a Berwald metric 575

18 KLINGENBERG GEOMETRY OVER CERTAIN LOCAL ALGEBRAS 577
18.1 A-spaces and their homomorphisms 578
18.1.1 A-spaces. . . . 579
18.1.2 Submodules and subspaces of A-spaces 580
18.1.3 Endomorphisms of A-spaces 583
18.1.4 Dual A-spaces 587
18.2 λ-Bilinear Forms on A-Spaces 591
18.2.1 Bilinear forms on A-spaces 591
18.2.2 Inertial laws of λ-bilinear forms on A-spaces. . . . 592
18.2.3 Quadratic forms on A-spaces. . . . 595
18.2.4 Equivalence of λ-bilinear forms on A-spaces 597
18.3 Projective Klingenberg Spaces 597
18.3.1 Main properties of projective Klingenberg spaces 597
18.3.2 Homologies of projective Klingenberg spaces 603
18.3.3 Desargues theorem on projective Klingenberg planes 606
18.3.4 Projective equivalence of quadrics in projective Klingenberg spaces 607
18.4 Maxwell equations in plural algebra formalism 609
