Contents

Preface		**xiii**
Air Pollutants and Their Adverse Effects		**1**
1.1	***Characteristics of Air Pollutants***	**1**
1.1.1	*Gas, vapor, particulate matter, soot, smoke, fog, aerosol and smog*	1
1.1.2	*Inorganics, organics, or microbial*	2
1.1.3	*Volatile organic compounds (VOCs)*	2
1.1.4	*Primary and secondary air pollutants*	3
1.2	***Groups of Air Pollutants***	**3**
1.2.1	*Criteria air pollutants*	3
1.2.2	*Hazardous air pollutants*	4
1.2.3	*Greenhouse gases*	4
1.2.4	*Indoor air pollutants*	4
1.3	***Sources of Air Pollutants***	**5**
1.3.1	*Natural, biogenic, and anthropogenic sources*	5
1.3.2	*Stationary vs. mobile sources*	5
1.3.3	*Point, area, line and volume sources*	5
1.3.4	*Major and area sources*	6
1.3.5	*Fugitive emissions*	6
1.4	***Adverse Effects of Air Pollution***	**6**
1.4.1	*Human health*	6
1.4.2	*Ecosystems*	8
1.4.3	*Properties*	9
1.4.4	*Global environment*	9
1.4.5	*Useful data sources*	9
Properties of Air and Compounds of Concern		**11**
2.1	***Our Atmosphere***	**11**
2.2	***Factors Affecting Properties of Air***	**13**
2.2.1	*Temperature*	13
2.2.2	*Pressure*	14
2.2.3	*Properties of ideal gases*	15
2.3	***Basic Properties of Air***	**16**
2.3.1	*Molecular weight*	16
2.3.2	*Density*	16
2.3.3	*Viscosity*	17
2.3.4	*Specific heat capacity*	19
2.3.5	*Reynolds number*	21
2.4	***Properties of Compounds of Concern in Air***	**21**
2.4.1	*Vapor pressure*	21
2.4.2	*Humidity*	25
2.4.3	*Heating value*	27
2.5	***Interaction among Gas, Liquid, and Solid***	**29**
2.5.1	*Diffusion*	29
2.5.2	*Vapor-liquid equilibrium*	30
2.5.3	*Vapor-solid equilibrium*	34

Bibliography **35**
Exercise Questions **35**

Regulatory Approaches to Solve Air Pollution Problems **37**
3.1 Regulatory Framework **37**
3.2 Clean Air Act **38**
3.2.1 National ambient air quality standards (NAAQS) 38
3.2.2 Air quality implementation plans 41
3.2.3 Emission standards for new and modified sources 41
3.2.4 Emission standards for existing sources 42
3.2.5 Emission standards for HAPs 42
3.2.6 Permits 42
3.2.7 Other air pollution control programs 43
3.3 Ambient Air Monitoring **43**
3.3.1 Sample collection for criteria pollutants 44
3.3.2 Analytical methods for criteria pollutants 48
3.3.3 Air Quality Index 49
3.3.4 Sampling and analysis of ambient HAPs 50
3.4 Emission Monitoring and Measurements **51**
3.4.1 Stationary source emission sampling 52
3.4.2 Continuous emission monitoring (CEM) 56
3.5 Emission Inventory and Emission Factors **56**
3.5.1 Emission inventory 56
3.5.2 Emission factors 60
3.6 Air Pollution Management **60**
3.6.1 Air pollution control philosophies 61
3.6.2 Air pollution control strategies 61
Bibliography **62**
Exercise Questions **63**

Basic Principles for Engineering Calculations **64**
4.1 Flow Rate and Velocity **64**
4.2 Concentrations **67**
4.3 Mass Loading Rate and Residence Time **69**
4.4 Emission Capture and Gas Handling System **70**
4.4.1 Hood system 71
4.4.2 Ductwork 73
4.4.3 Fan system 73
4.4.4 Sizing a fan/blower 76
Bibliography **77**
Exercise Questions **77**

Air Pollution Meteorology and Air Pollutant Concentration Models **80**
5.1 The troposphere **80**
5.2 Horizontal Movement of Air **82**

5.2.1	*Horizontal air circulation*	82
5.2.2	*Wind*	82
5.3	***Vertical Movement of Air***	**84**
5.3.1	*Lapse rates*	84
5.3.2	*Atmospheric stability*	85
5.3.3	*Types of inversion*	87
5.4	***Air Pollution Plume***	**88**
5.4.1	*Atmospheric stability and plume behavior*	88
5.4.2	*Topographical features*	91
5.5	***Effective Stack Height***	**93**
5.6	***Air Pollutant Concentration Models***	**94**
5.6.1	*A simple box model*	94
5.6.2	*Gaussian plume dispersion model*	96
5.6.3	*Special cases for the Gaussian dispersion equation*	100
5.6.4	*Location of the maximum ground-level concentration*	102
5.6.5	*EPA models*	105
5.7	***Summary***	**106**
	Bibliography	**106**
	Exercise Questions	**107**
Control of Particulate Emissions		**110**
6.1	***Introduction***	**110**
6.1.1	*Sources of particulate emissions*	111
6.1.2	*Particulate removal and commonly-used removal devices*	116
6.1.3	*Characteristics of particulates and gas stream relevant to removal*	116
6.2	***Particle Size, Size Distribution, and Removal Mechanisms***	**117**
6.2.1	*Particle size*	117
6.2.2	*Particle size distribution (PSD)*	120
6.2.3	*Reynolds number for particulate travel*	125
6.2.4	*Particle collection/removal mechanisms*	127
6.3	***Gravity Settling Chamber***	**138**
6.3.1	*Principles of gravity settling*	139
6.3.2	*Gravity settling systems and their components*	141
6.3.3	*Factors affecting particle removal by gravity settling*	141
6.3.4	*Design calculations for gravity settlers*	142
6.4	***Cyclones***	**145**
6.4.1	*Principles of cyclones*	145
6.4.2	*Cyclones and their components*	147
6.4.3	*Factors affecting performance of cyclones*	148
6.4.4	*Design calculations for cyclones*	148
6.5	***Electrostatic Precipitators***	**153**
6.5.1	*Principles of electrostatic precipitators*	154
6.5.2	*ESP systems and their components*	155
6.5.3	*Factors affecting performance of ESPs*	158
6.5.4	*Design calculations for ESPs*	160

6.6	***Fabric Filters***	**162**
6.6.1	*Principles of filtration*	162
6.6.2	*Fabric filtration systems and their components*	163
6.6.3	*Factors affecting performance of fabric filters*	167
6.6.4	*Design calculations for fabric filters*	170
6.7	***Wet Scrubbers***	**171**
6.7.1	*Principles of wet scrubbing*	171
6.7.2	*Wet scrubbing systems and their components*	173
6.7.3	*Factors affecting performance of wet scrubbers*	177
6.7.4	*Design calculations for wet scrubbers*	178
6.8	***Considerations in Selection of Types of Removal Devices***	**183**
6.9	***Conclusion***	**184**
	Bibliography	**184**
	Exercise Questions	**186**
Control of Organic and Inorganic Gaseous Emission		**190**
7.1	***Introduction***	**190**
7.1.1	*Sources and emissions of VOCs*	191
7.1.2	*Types of emission reduction technologies*	193
7.1.3	*Important gas stream characteristics*	193
7.2	***Adsorption***	**193**
6.2.1	*Principles of adsorption*	194
6.2.2	*Adsorption systems and their components*	195
6.2.3	*Factors affecting adsorption*	197
6.2.4	*Design considerations for adsorbers*	198
7.3	***Absorption***	**206**
7.3.1	*Principles of absorption*	206
7.3.2	*Absorption systems and their components*	208
7.3.3	*Factors affecting absorption*	210
7.3.4	*Design calculations*	210
7.4	***Thermal Oxidation***	**215**
7.4.1	*Principle of thermal oxidation*	215
7.4.2	*Thermal oxidation systems and their components*	218
7.4.3	*Factors affecting thermal oxidation*	221
7.4.4	*Design calculations for thermal oxidizers*	223
7.5	***Catalytic Incineration***	**234**
7.5.1	*Principles of catalytic incineration*	234
7.5.2	*Catalytic incineration systems and their components*	234
7.5.3	*Factors affecting catalytic incineration*	235
7.5.4	*Design calculations for catalytic thermal oxidizers*	236
7.6	***Condensers***	**238**
7.6.1	*Principles of condensation*	239
7.6.2	*Condensation systems and their components*	239
7.6.3	*Factors affecting condensation*	241
7.6.4	*Design calculations for condensers*	242
7.7	***Bioreactors***	**247**
7.7.1	*Principles of bio-reaction*	247

7.7.2	*Bioreactors and their components*	247
7.7.3	*Factors affecting performance of bioreactors*	251
7.7.4	*Design calculations for bioreactors*	252
	Bibliography	**253**
	Exercise Questions	**255**
Control of Nitrogen Oxides Emissions		**258**
8.1	***Introduction***	**258**
8.1.1	*Nitrogen oxides and NO_x*	258
8.1.2	*Sources and emissions of NOx*	259
8.1.3	*The problems associated with NO_x*	262
8.2	***Stationary Combustion Systems***	**262**
8.2.1	*Diffusion and premixed flame*	262
8.2.2	*Combustion temperature*	263
8.2.3	*Stationary combustion systems*	263
8.3	***Formation Mechanisms of NO_x***	**266**
8.3.1	*Formation of thermal NO_x*	267
8.3.2	*Formation of fuel NO_x*	269
8.3.3	*Formation of prompt NO_x*	269
8.4	***Approaches to Reduce NO_x Emissions***	**269**
8.5	***Combustion Modification***	**270**
8.5.1	*Low excess-air combustion*	270
8.5.2	*Off-stoichiometric combustion*	271
8.5.3	*Flue gas recirculation (FGR)*	273
8.5.4	*Low NO_x burner*	274
8.5.5	*Gas reburning*	275
8.6	***Flue-gas Treatment***	**276**
8.6.1	*Selective non-catalytic reduction (SNCR)*	277
8.6.2	*Selective catalytic reduction (SCR)*	278
8.7	***Fuel Switching***	**279**
8.8	***Process Selection and Design Considerations***	**279**
8.8.1	*Process selection*	279
8.8.2	*Design calculation*	280
8.9	***Summary***	**284**
	Bibliography	**284**
	Exercise Questions	**286**
Control of Sulfur Oxides Emissions		**287**
9.1	***Introduction***	**287**
9.1.1	*The problems*	287
9.1.2	*Sources of the problems*	288
9.1.3	*Overview of control alternatives to the problems*	290
9.2	***Chemistry of Sulfur and Sulfur Oxides***	**290**
9.3	***Wet Flue Gas Desulfurization***	**291**
9.3.1	*Lime scrubbing*	292
9.3.2	*Limestone scrubbing*	293
9.3.3	*Sodium carbonate scrubbing*	293

9.3.4	*Dual-alkali scrubbing*	294
9.3.5	*Magnesium oxide scrubbing*	296
9.3.6	*Well-Lord scrubbing*	297
9.3.7	*Citrate process*	297
9.4	***Dry Flue Gas Desulfurization***	**297**
9.4.1	*Spray-dryer absorption*	297
9.4.2	*Dry-injection absorption*	298
9.5	***Alternatives to End-of-the-Pipe Control***	**300**
9.5.1	*Removal of reduce sulfur compounds in natural gas and petroleum*	300
9.5.2	*Coal liquefaction and gasification*	301
9.5.3	*Coal cleaning*	301
9.5.4	*Low-sulfur fuel*	301
9.5.5	*Recovery for beneficial reuses*	301
9.6	***Process Selection and Design Considerations***	**302**
9.6.1	*Process selection*	302
9.6.2	*Design calculations*	302
9.7	***Summary***	**304**
	Bibliography	**304**
	Exercise Questions	**306**
Control of Mobile Source Pollution		**307**
10.1	***Overview of Mobile Source Pollution***	**307**
10.1.1	*Mobile sources of air pollution*	307
10.1.2	*Pollutants emitted by mobile sources*	307
10.2	***Emissions from Mobile Sources***	**312**
10.2.1	*Sources of emissions from automobiles*	312
10.2.2	*Reciprocating engines*	313
10.2.3	*Factors affecting the pollutant formation and emissions*	314
10.3	***Control of Emissions from Mobile Sources***	**315**
10.3.1	*Control of evaporative and fueling losses*	315
10.3.2	*Control of tail-pipe emissions*	316
10.3.3	*Reformulated gasoline*	317
10.3.4	*Alternative fuels*	317
10.3.5	*Other measures*	318
10.4	***Summary***	**318**
	Bibliography	**318**
	Exercise Questions	**319**
Fugitive Emissions and Control		**320**
11.1	***Introduction***	**320**
11.1.1	*Definition*	320
11.1.2	*Regulations affecting fugitive emissions*	321
11.1.3	*Sources of Fugitive Emissions*	321
11.1.4	*Control of Emissions from Equipment Leaks*	322
11.2	***LDAR Program***	**323**
11.2.1	*Objectives of LADR programs*	323
11.2.2	*Elements of an LDAR program*	323

11.2.3 Federal Reference Method 21 324
11.3 Protocol for Equipment Leak Emission Estimates **324**
11.3.1 Types of emission factors 324
11.3.2 Derivations of EFs 325
11.3.3 Uses of EFs 327
11.4 Summary **328**
Bibliography **328**
Exercise Questions **331**

Ozone, Acid Rains, and Greenhouse Gases **332**
12.1 Photochemical Smog **332**
12.1.1 Basic photochemical cycle 333
12.1.2 Roles of VOCs in photochemical smog 335
12.2 Ozone **336**
12.2.1 Tropospheric ozone 337
12.2.2 Stratospheric ozone 337
12.3 Acid Rain **338**
12.3.1 Acid rain basics 339
12.3.2 Effects of acid rain 339
12.3.3 Measures to control acid rain 340
12.4 Greenhouse Gases **340**
12.4.1 Greenhouse gases 340
12.4.2 Global warming and global warming potential 341
12.4.3 Sources of GHGs 342
12.4.4 Sources and reduction of CO_2 emissions 344
12.4.5 Sources and reduction of CH_4 emissions 345
12.4.6 Sources and reduction of N_2O emissions 346
12.4.7 Sources and reduction of fluorinated gases emissions 346
Bibliography **347**
Exercise Questions **348**

Other Topics **349**
13.1 Visibility and Haze **349**
13.2 Odor **350**
13.3 Lead **351**
13.4 Indoor Air Pollution **351**
13.4.1 Sources of indoor air pollutants 351
13.4.2 Categories of indoor air pollutants 351
13.4.3 Effects of indoor air pollution 352
13.4.4 Measures to reduce exposure indoor air pollution 353
13.4.5 Air exchange rate 354
13.5 OSHA permissible exposure limits **354**
Bibliography **354**

Index **356**
