Message from the Editors XXV

List of Abbreviations XXVII

Named and Unnamed Reactions XXXI

List of Contributors XXXIII

Part I Chiral Auxiliaries in Asymmetric Synthesis

Introductory Chapter 3

David A. Evans, Günter Helmchen and Magnus Rüping

Background 3

Results 4

Summary 7

CV of David A. Evans 8

CV of Günter Helmchen 8

CV of Magnus Rüping 9

Selected Publications 9

Asymmetric Epoxidation of Pentadienols 10

Reinhard Brückner

Background 10

Objective: Making Building Blocks for the

Synthesis of 1,3,5,7,...-Polyols from Epoxyalcohols 11

Results 12

Asymmetric Epoxidation of a Conjugated Pentadienol 12

Asymmetric Epoxidation of a Nonconjugated Pentadienol 13

CV of Reinhard Brückner 15

Selected Publications 16

Asymmetric Synthesis – The Essentials. 2nd, completely revised edition.

Edited by Mathias Christmann and Stefan Bräse

Copyright © 2008 WILEY-VCH Verlag GmbH & Co. KGaA, Weinheim

ISBN: 978-3-527-32093-6

Asymmetric Synthesis using Sulfur–Nitrogen Reagents 17

Franklin A. Davis

Background 17

Results 17

Asymmetric Oxidations using *N*-Sulfonyloxaziridines 17

Asymmetric Fluorination of Enolates with *N*-Fluoro-2,10-Camphorsultams 19

Asymmetric Synthesis of Amine Derivatives using
Enantiopure Sulfinimines (*N*-Sulfinyl Imines) 19

Outlook 20

CV of Franklin A. Davis 20

Selected Publications 22

Asymmetric Syntheses with SAMP-/RAMP-Hydrazones 23

Dieter Enders and Wolfgang Bettray

Background 23

Strategy 24

Results 25

Application for the Synthesis of Natural Products 26

Other Asymmetric Syntheses from the Enders Group 27

Conclusions and Future Perspectives 27

CV of Dieter Enders 27

Selected Publications 28

Asymmetric Allylation Reactions 29

Reinhard W. Hoffmann

Background 29

Results 29

Type (I) Allylmetallation of Aldehydes 29

Second Generation Allylmetallation Reagents 31

CV of Reinhard W. Hoffmann 32

Selected Publications 33

Carbohydrates as Chiral Auxiliaries 34

Horst Kunz

Introduction 34

Results 34

Carbohydrate Auxiliaries in Cycloaddition Reactions 34

Conjugate Addition Reactions Directed by Carbohydrate Auxiliaries 35

Glycosylamines in Stereoselective Synthesis 36

Conclusions 38

CV of Horst Kunz 38

Selected Publications 38

The Use of Chiral Oxazolines in early C–C Bond Forming Reactions 39*Albert I. Meyers*

Background 39

Results 40

CV of Albert I. Meyers 41

Selected Publications 41

Asymmetric Synthesis of Amines and Amino Acids from Amines 42*Shun-Ichi Murahashi and Yasushi Imada*

Background 42

Strategy 43

Results 43

Diastereoselective Reactions of Nitrones 43

Enantioselective Reactions of Nitrones 44

Conclusions and Future Perspectives 46

CV of Shun-Ichi Murahashi 46

Selected Publications 47

Part II Metal-catalyzed Asymmetric Synthesis**Introductory Chapter** 51*Masakatsu Shibasaki and Shigeki Matsunaga*

Introduction 51

Design of Asymmetric Metal Catalysis 52

Future Prospects for Metal-catalyzed Asymmetric Synthesis 53

CV of Masakatsu Shibasaki 54

CV of Shigeki Matsunaga 54

Selected Publications 55

Catalytic Asymmetric Sulfur Ylide Mediated Epoxidation of Carbonyl Compounds 56*Varinder Aggarwal*

Background 56

Results 57

Other Reactions of Sulfur Ylides from the Aggarwal Group 59

Conclusions and Future Perspectives 59

CV of Varinder Aggarwal 60

Selected Publications 61

Asymmetric Baeyer-Villiger Reactions 62*Carsten Bolm*

Background 62

Strategy 63

Results 64

Other Research Topics from the Bolm Group 65

CV of Carsten Bolm 65

Selected Publications 66

Planar Chiral Ligands Based on [2.2]Paracyclophanes 67*Stefan Bräse*

Background 67

Strategy 68

Results 69

Application for the Synthesis of Natural Products 70

Other Asymmetric Syntheses from the Bräse Group 70

Conclusions and Future Perspectives 71

CV of Stefan Bräse 71

Selected Publications 71

**Asymmetric Syntheses of 3-(*trans*-2-Nitrocyclopropyl)alanine
and 3-(*trans*-2-Aminocyclopropyl)alanine 72***Armin de Meijere and Oleg V. Larionov*

Background 72

Strategy and Results 73

Outlook 75

CV of Armin de Meijere 75

CV of Oleg V. Larionov 76

Selected Publications 76

**Copper-Bis(oxazoline) Catalyzed Synthesis of β -Lactams –
Enantioselective Reaction of Alkynes with Nitrones 77***David A. Evans, Florian Kleinbeck and Magnus Rüping*

Background 77

Results 78

Summary 80

CV of David A. Evans 81

CV of Magnus Rüping 81

CV of Florian Kleinbeck 81

Selected Publications 81

Catalytic Asymmetric Conjugate Addition Reactions of Organometallic Reagents 83*Fernando López and Ben L. Feringa*

Background 83

The First Catalytic Enantioselective Approaches 83

Results 84

Cu-catalyzed Enantioselective CA of Organozinc Reagents 84

Highly Enantioselective Cu-catalyzed CA of Grignard Reagents 86

Conclusion and Future Perspectives 87

CV of Fernando López 87

CV of Ben L. Feringa 88

Selected Publications 88

Catalytic Asymmetric Synthesis of Allylic Alcohols via Dynamic Kinetic Resolution 90*Hans-Joachim Gais*

Introduction 90

Strategy 91

Results 91

Application to the Synthesis of Natural Products 94

Other Asymmetric Syntheses from the Gais Group 94

Conclusion and Future Perspectives 94

CV of Hans-Joachim Gais 94

Selected Publications 95

Asymmetric Cross-coupling Reactions 97*Tamio Hayashi*

Background 97

Results 97

Asymmetric Cross-coupling of Secondary Alkyl Grignard Reagents 97

Asymmetric Cross-Coupling Forming Axially Chiral Biaryls 99

Conclusions and Future Perspectives 100

CV of Tamio Hayashi 101

Selected Publications 101

Asymmetric Allylic Substitutions 102*Günter Helmchen*

Background 102

Results 103

Pd-Catalyzed Allylic Substitutions 103

Ir-Catalyzed Allylic Substitutions 104

Application for the Synthesis of Biologically Active Compounds 104

Other Asymmetric Syntheses from the Helmchen Group 105

Conclusions and Future Perspectives 105

CV of Günter Helmchen 105

Selected Publications 106

Asymmetric Homoaldol Reactions	107
<i>Dieter Hoppe</i>	
Background	107
Results	108
Enantioselective Additions via Stereospecific Deprotonation	108
Enantioselective Additions via (–)-Sparteine-mediated α -Deprotonations	109
Enantioselective γ -Deprotonations	110
Synthetic Applications	110
CV of Dieter Hoppe	111
Selected Publications	111
Asymmetric Vinylogous Mukaiyama Aldol Reaction	112
<i>Markus Kalesse and Jorma Hassfeld</i>	
Introduction	112
Results	112
Conclusions and Further Perspectives	115
CV of Markus Kalesse	116
CV of Jorma Hassfeld	116
Selected Publications	116
Chiral Lewis Acid Catalysis in Aqueous Media	117
<i>Shū Kobayashi and Chikako Ogawa</i>	
Background	117
Results	117
Water-compatible Lewis Acid	117
Asymmetric Aldol Reactions	118
Asymmetric Hydroxymethylation Reactions	119
Asymmetric Mannich-type Reactions	120
CV of Shū Kobayashi	121
CV of Chikako Ogawa	121
Selected Publications	122
Asymmetric Epoxidation of Non-activated Olefins	123
<i>Kazuhiro Matsumoto and Tsutomu Katsuki</i>	
Introduction	123
Results	123
Manganese(salen) Catalyst	123
Ruthenium(salen) Catalyst	124
Titanium(salalen) Catalyst	125
Conclusion	126
CV of Tsutomu Katsuki	127
CV of Kazuhiro Matsumoto	127
Selected Publications	127

- Chiral Carbonyl Lewis Acid Complexes in Asymmetric Syntheses** 128
Keiji Maruoka and Takashi Ooi
 Background 128
 Results 128
 Conclusions and Future Perspectives 131
 CV of Keiji Maruoka 131
 CV of Takashi Ooi 131
 Selected Publications 132
- ZACA Reaction: Zr-catalyzed Asymmetric Carboalumination of Alkenes** 133
Ei-ichi Negishi, Bo Liang, Tibor Novak and Ze Tan
 Background and Discovery 133
 Results 134
 ZACA-Pd-catalyzed Cross-coupling Tandem Processes
 for the Synthesis of Deoxypolypropionates and Related Compounds 134
 Synthesis of 2-Methyl- or 2-Ethyl-1-alkanols Not Readily
 Purifiable by Chromatography or Recrystallization 137
 CV of Ei-ichi Negishi 137
 Selected Publications 138
- Bisoxazolines – a Privileged Ligand Class for Asymmetric Catalysis** 139
Andreas Pfaltz
 Background 139
 Results 140
 Semicorrins 140
 C₂-Symmetric Bisoxazolines 140
 Boron-bridged Bisoxazolines 142
 Conclusion 142
 CV of Andreas Pfaltz 142
 Selected Publications 143
- Enantioselective Cycloaddition Reactions Catalyzed by Hydrogen Bonding** 144
Viresh H. Rawal and Avinash N. Thadani
 Background 144
 Strategy 146
 Results 146
 Application to Other Reactions 147
 Conclusions and Future Perspectives 147
 CV of Viresh H. Rawal 147
 Selected Publications 148

Direct Catalytic Asymmetric Aldol-Tishchenko Reaction 149*Masakatsu Shibasaki and Takashi Ohshima*

Background 149

Strategy 150

Results 150

Mechanistic Studies 152

Conclusions and Future Perspectives 153

CV of Masakatsu Shibasaki 153

CV of Takashi Ohshima 153

Selected Publications 154

Asymmetric Heck and other Palladium-catalyzed Reactions 155*Lutz F. Tietze and Florian Lotz*

Background 155

Enantioselective Heck Reactions with Allylsilanes as the Alkene Component 155

CV of Lutz F. Tietze 159

CV of Florian Lotz 159

Selected Publications 160

Asymmetric Catalysis with Chiral Acid 161*Hisashi Yamamoto*

Background 161

Results 162

 C_2 Symmetric Chiral Lewis Acid Catalysts 162

Combined Acid Catalyst 162

CV of Hisashi Yamamoto 165

Selected Publications 165

**Part III Biocatalysis and Organocatalysis:
Asymmetric Synthesis Inspired by Nature****Introductory Chapter** 169*Benjamin List*

Introduction 169

The Aldol Reaction as an Example 169

Asymmetric Chemical Aldolizations 170

Conclusions and Outlook 172

CV of Benjamin List 173

Selected Publications 173

Enantioselective Photochemical Reactions 174*Thorsten Bach*

Background 174

Concept 175

Results 175

Perspectives 176

CV of Thorsten Bach 178

Selected Publications 178

Asymmetric Catalysis via Dynamic Kinetic Resolution 179*Jan-E. Bäckvall*

Background 179

Combined Enzyme and Metal Catalysis for Efficient DKR 180

Results 180

Extension to DKR of Amines 182

Conclusions and Future Perspectives 183

CV of Jan-E. Bäckvall 183

Selected Publications 183

Catalytic Asymmetric Epoxidation of Enones and Related Compounds 185*Albrecht Berkessel*

General 185

Electrophilic Catalytic Epoxidation 186

Nucleophilic Catalytic Epoxidation 186

Conclusions and Future Perspectives 188

CV of Albrecht Berkessel 188

Selected Publications 189

Kinetic Investigations of the Soai Autocatalytic Reaction 190*Donna G. Blackmond*

Background 190

Kinetic Studies using Reaction Calorimetry 191

CV of Donna G. Blackmond 194

Selected Publications 194

Planar-chiral Heterocycles as Enantioselective Organocatalysts 195*Gregory C. Fu*

Background and Design 195

Applications 195

Conclusions and Future Perspectives 199

CV of Gregory C. Fu 199

Selected Publications 199

An Organocatalytic Approach to Optically Active Six-membered Rings	200
<i>Karl Anker Jørgensen</i>	
Background	200
Strategy	201
Results	202
Synthesis of γ - and ϵ -lactones	204
Conclusions and Future Perspectives	204
CV of Karl Anker Jørgensen	204
Selected Publications	205
Non-linear Effects in Asymmetric Catalysis	206
<i>Henri B. Kagan</i>	
Background	206
Enantiomerically Impure Chiral Auxiliaries	206
Non-linear Effects	206
Results	207
Examples of Asymmetric Amplifications	207
Kinetic Models	208
Applications of Non-linear Effects	209
Conclusion and Perspectives	209
CV of Henri B. Kagan	209
Selected Publications	210
Asymmetric Organocatalysis	211
<i>Steven V. Ley</i>	
Background	211
Results	212
Conclusions and Future Perspectives	216
CV of Steven V. Ley	216
Selected Publications	216
Directed Evolution of Enzymes for Asymmetric Syntheses	217
<i>Manfred T. Reetz</i>	
Background	217
Strategy and Early Results	217
Generalizing the Concept	219
New Strategies	219
Conclusions and Perspectives	220
CV of Manfred T. Reetz	220
Selected Publications	221

Asymmetric Autocatalysis and Its Implications in the Origin of Chiral Homogeneity of Biomolecules 222

Kenso Soai and Tsuneomi Kawasaki

Background 222

Results 223

Chiral Amplification by Asymmetric Autocatalysis 223

Asymmetric Autocatalysis as a Link Between the Origin

of Chirality and Highly Enantioenriched Molecules 223

Spontaneous Absolute Asymmetric Synthesis 224

Conclusions and Future Perspectives 226

CV of Kenso Soai 226

CV of Tsuneomi Kawasaki 227

Selected Publications 227

Asymmetric Synthesis using Deoxyribose-5-phosphate Aldolase 228

Chi-Huey Wong and William A. Greenberg

Background 228

Results 229

Catalytic Mechanism 229

Synthetic Applications 229

Application to the Synthesis of Epothilones and Statins 230

Conclusion 231

CV of Chi-Huey Wong 232

CV of William A. Greenberg 232

Selected Publications 232

Part IV Asymmetric Reactions in Total Synthesis

Introductory Chapter 235

K. C. Nicolaou and Paul G. Bulger

Background 235

Reactions 235

Aldol 235

Alkylation 237

Diels–Alder 239

Allylation 240

Palladium-catalyzed Cross-coupling 241

Epoxidation 244

Dihydroxylation/aminohydroxylation 247

Organocatalytic Reductions 248

Metal-catalyzed Hydrogenations 248

Enzymatic 250

Conclusions 250

CV of K. C. Nicolaou 251

CV of Paul G. Bulger 251

Selected Publications 252

Ring Rearrangement Metathesis (RRM) in Alkaloid Synthesis 254*Nicole Holub and Siegfried Blechert*

Background and Strategy 254

Results 255

Tetraonerines 255

Trans-195A 256

Lasubine II 256

Astrophylline and Dendrochrysin 257

Conclusions and Future Perspectives 258

CV of Siegfried Blechert 259

Selected Publications 259

Asymmetric Synthesis of Biaryls by the 'Lactone Method' 260*Gerhard Bringmann, Tanja Gulder and Tobias A. M. Gulder*

Introduction 260

The Basic Concept of the 'Lactone Method' 260

Application of the 'Lactone Concept' to Natural Product Synthesis 261

Conclusions and Further Perspectives 263

CV of Gerhard Bringmann 263

Selected Publications 264

Asymmetric Synthesis of Merrilactone A 265*Samuel J. Danishefsky*

Background 265

Synthetic Strategy 265

Synthesis of Merrilactone A 267

CV of Samuel J. Danishefsky 269

Selected Publications 270

**Asymmetric Synthesis of Cyclic Ketal
and Spiroaminal-containing Natural Products** 271*Craig J. Forsyth*

Background 271

Results 272

Okadaic Acid – Three Spiroketalization Methods 272

Additional Ketals via Double Intramolecular Hetero Michael Additions 273

Synthesis of the Azaspiracid Spiroaminal 274

Conclusion and Future Perspectives 275

CV of Craig J. Forsyth 275

Selected Publications 276

Case Studies at the Metathesis/Asymmetric Synthesis Interface 277*Alois Fürstner*

Background 277

Results 277

(-)-Gloeosporone 277

(-)-Isooncinotine 279

Conclusions and Future Perspectives 281

CV of Alois Fürstner 281

Selected Publications 281

Asymmetric Synthesis of Amino Acids by Rhodium and Ruthenium Catalysis 282*Jean Pierre Genet*

Introduction 282

Asymmetric Hydrogenation Reactions 282

Chiral Diphosphine Ligands and Diversity of Chiral Ru Catalysts 283

Results 283

Asymmetric Hydrogenation of Dehydroamino Acids 283

Asymmetric Syntheses of α -Amino β -Hydroxy Acids (DKR) 284

Asymmetric Syntheses of Natural Products 285

Tandem-1,4 addition/Enantioselective Protonation Catalyzed by Rhodium 285

Conclusions 286

CV of Jean Pierre Genet 286

Selected Publications 287

Asymmetric Syntheses of Pheromones 288*Kenji Mori*

Background 288

Strategy and Results 288

Derivation from Optically Active Starting Materials 289

Enantiomer Separation 289

Asymmetric Synthesis 290

Conclusion and Future Perspective 292

CV of Kenji Mori 292

Selected Publications 292

Total Synthesis of Polyketides Using Asymmetric Aldol Reactions 293*Ian Paterson*

Background 293

Results 294

Stereocontrol in the Boron Aldol Reactions of Ketones 294

Application to the Total Synthesis of Althohyrin A (Spongistatin 1) 296

Conclusions and Future Perspectives 296

CV of Ian Paterson 296

Selected Publications 298

Asymmetric Synthesis on the Solid Phase 299*Torben Leßmann and Herbert Waldmann*

Introduction 299

Results 299

Asymmetric Aldol Reactions 299

Asymmetric Cycloadditions 300

Asymmetric Epoxide Openings 302

Other Reactions 302

Conclusion 302

CV of Herbert Waldmann 302

CV of Torben Leßmann 303

Selected Publications 303

Part V Asymmetric Synthesis in Industry**Introductory Chapter** 307*Herbert Hugl*

Background 307

Industrial Production of Chiral Compounds 307

Outlook 310

CV of Herbert Hugl 310

Selected Publications 310

Industrial Application of Enantioselective Catalysis 311*Hans-Ulrich Blaser*

The Potential of Enantioselective Catalysis 311

Hurdles on the Way to an Industrial Process 311

Catalyst Performance 312

Availability and Cost of the Catalyst 312

Development Time 313

Selected Milestones in Industrial Application 313

Conclusions and Future Perspectives 315

CV of Hans-Ulrich Blaser 315

Selected Publications 315

Crystallization-Induced Diastereoselection for the Synthesis of Aprepitant 316*J. Brands, P. Pye and K. Rossen*

Background 316

Results 317

Bicyclic Acetal Approach 317

Lactam Approach 318

Conclusion 320

CV of Karel M. Jos Brands 320

CV of Philip Pye 320

CV of Kai Rossen 320

Selected Publications 321

Combinatorial Methods in Asymmetric Syntheses 322*Stefan Dahmen*

Background 322

Results 322

Ligand Screening 322

Additive Screening 324

Arylzinc Precursors 324

CV of Stefan Dahmen 326

Selected Publications 326

Biocatalytic Production of Optically Active Amines 327*Klaus Ditrich*

Background 327

Results 327

Conclusions and Future Perspectives 331

CV of Klaus Ditrich 331

Selected Publications 331

The Monsanto L-Dopa Process 332*William S. Knowles*

Background 332

L-DOPA Process 332

Other Industrial Applications 335

Conclusions 335

CV of William S. Knowles 335

Selected Publications 336

Asymmetric Hydrogenation through Metal–Ligand Bifunctional Catalysis 337*Ryoji Noyori, Takeshi Ohkuma, Christian A. Sandoval and Kilian Muñiz*

Background 337

Strategy 337

Results 337

Catalytic Cycle 339

CV of Ryoji Noyori 340
